

# FreeFlow Customer Bulletin

---

**Configuration: FreeFlow**

**Release: 2.0.0.4**

FreeFlow Number:	92
Distribution Date:	11/04
Expiration:	<b>Next Release</b>

**Announcing: Version 2.0.0.4 software for FreeFlow Makeready, FreeFlow Process Manager and FreeFlow Web Services and the color- enabled Xerox FreeFlow 665 Scanner.**

## **ANNOUNCEMENT:**

We are pleased to announce the availability of FreeFlow Makeready / Process Manager / Web Services 2.0.0.4 software as the new base software for FreeFlow. This software enables, among other things, the color scanning option for FreeFlow Scanner 665. The 2.0.0.4 software is being shipped to all Customer Service Engineers (CSEs) in the field. Please contact your local Xerox Representative to have 2.0.0.4 software installed. Below you will find some of the new enhancements:

- **Color Enablement** – Customers now have a consistent workflow for both black/white and color scanning. The image quality mode renders clean text and sharp color images automatically.
- **Hue and Saturation Controls** – The Xerox FreeFlow Scanner 665 hue rotation, saturation and color cast adjustment controls enable you to add or remove color cast in virtually any hue direction. Some of the features of Hue and Saturation control are listed below:
  - The hue rotation control also allows the user to change the intensity or strength of a color.
  - The saturation control enables the user to increase the saturation to double the amount in the originally scanned image; over- saturated colors are allowed to clip.
  - The saturation control enables the user to attenuate to 0%, resulting in gray image devoid of color.
  - The scanner saturation control now includes visual and graphical feedback to aid the user, both pre-scan and post-scan in preview mode.
- **Deskew** - The Xerox FreeFlow Scanner 665 now provides electronic page (ADH) deskew for color as well as black and white.
- **Auto-windowing** - The Xerox FreeFlow Scanner 665 now supports use of the automatic mode for improved print quality of scans for the following:
  - DocuTech 135
  - DocuTech Publisher 6100/6115/6135/6155/6180
  - DocuPrint 100/115/135/155/180
  - DocuTech 128/155/180 HLC

- **Additional Printer Support** - The 2.0.0.4 software also provides support for the following printers:
  - DocuPrint 525/1050 CF
  - DocuTech 128 HLC
  - DocuTech 155 HLC
  - DocuTech 180 HLC

**Xerox Representatives can find additional information in the following areas:**

**XRXGSN Site**

The ISA can be found on GSN at:
