Any litigation relating to this License shall be subject to the exclusive jurisdiction of the Federal Courts of the Northern District of California (or, absent subject matter jurisdiction in such courts, the courts of the State of California), with venue lying exclusively in Santa Clara County, California, with the losing party responsible for costs, including without limitation, court costs and reasonable attorneys fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation that provides that the language of a contract shall be construed against the drafter shall not apply to this License.

Exhibit A - License Applicability. Except to the extent portions of this file are made subject to an alternative license as permitted in the SGI Free Software License B, Version 1.1 (the "License"), the contents of this file are subject only to the provisions of the License. You may not use this file except in compliance with the License. You may obtain a copy of the License at Silicon Graphics, Inc., attn: Legal Services, 1600 Amphitheatre Parkway, Mountain View, CA 94043-1351, or at: http://oss.sgi.com/projects/FreeB

Note that, as provided in the License, the Software is distributed on an "AS IS" basis, with ALL EXPRESS AND IMPLIED WARRANTIES AND CONDITIONS DISCLAIMED, INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY, SATISFACTORY QUALITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT.

Original Code. The Original Code is: [name of software, version number, and release date], developed by Silicon Graphics, Inc. The Original Code is **Copyright (c)** [dates of first publication, as appearing in the Notice in the Original Code] **Silicon Graphics, Inc.** Copyright in any portions created by third parties is as indicated elsewhere herein. **All Rights Reserved.**

Additional Notice Provisions: [such additional provisions, if any, as appear in the Notice in the Original Code under the heading "Additional Notice Provisions"]

Export Requirements - You may not export or re-export this software or any copy or adaptation in violation of any applicable laws or regulations. Without limiting the generality of the foregoing, hardware, software, technology or services provided under this license agreement may not be exported, reexported, transferred or downloaded to or within (or to a national resident of) countries under U.S. economic embargo including

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

the following countries: Cuba, Iran, Libya, North Korea, Sudan and Syria. This list is subject to change.

Hardware, software, technology or services may not be exported, reexported, transferred or downloaded to persons or entities listed on the U.S. Department of Commerce Denied Persons List, Entity List of proliferation concern or on any U.S. Treasury Department Designated Nationals exclusion list, or to parties directly or indirectly involved in the development or production of nuclear, chemical, biological weapons or in missile technology programs as specified in the U.S. Export Administration Regulations (15 CFR 744).

By accepting this license agreement you confirm that you are not located in (or a national resident of) any country under U.S. economic embargo, not identified on any U.S. Department of Commerce Denied Persons List, Entity List or Treasury Department Designated Nationals exclusion list, and not directly or indirectly involved in the development or production of nuclear, chemical, biological weapons or in missile technology programs as specified in the U.S. Export Administration Regulations.

Software available on this web site contains cryptography and is therefore subject to US government export control under the U.S. Export Administration Regulations ("EAR"). EAR Part 740.13(e) allows the export and reexport of publicly available encryption source code that is not subject to payment of license fee or royalty payment.

Object code resulting from the compiling of such source code may also be exported and reexported under this provision if publicly available and not subject to a fee or payment other than reasonable and customary fees for reproduction and distribution. This kind of encryption source code and the corresponding object code may be exported or reexported without prior U.S. government export license authorization provided that the U.S. government is notified about the Internet location of the software.

The open source software available on this web site is publicly available without license fee or royalty payment, and all binary software is compiled from the source code. The U.S. government has been notified about this site and the location site for the source code. Therefore, the source code and compiled object code may be downloaded and exported under U.S. export license exception (without a U.S. export license) in accordance with the further restrictions outlined above regarding embargoed countries, restricted persons and restricted end uses.

Local Country Import Requirements - The software you are about to download contains cryptography technology. Some countries regulate the import, use and/or export of certain products with cryptography. The X.org Foundation makes no claims as to the applicability of local country import, use and/or export regulations in relation to the download of this product. If you are located outside the U.S. and Canada you are advised to consult your local country regulations to insure compliance.

libXklavier 3.2.orig

Software:	libxklavier
Version:	3.2.orig
File or Package:	libxklavier_3.2.orig.tar.gz
OSI Licenses:	GPLv2, GPLv2+ w/exception, LGPLv2, LGPLv2+, MIT/X11
Other Licenses:	Custom
URL:	http://archive.ubuntu.com/ubuntu/pool/main/libx/libxklavier/libxklavier_3.2.orig.tar.gz
Group:	Development/Libraries
Description:	libxklavier is a library providing high-level API for X Keyboard Extension known as XKB. This library is indended to support XFree86 and other commercial X servers. It is useful for creating XKB-related software (layout indicators etc).
Common Usage:	Library
Package Size:	2.9 MB
Folders / Files:	9 / 94
Source Path:	wrlinux-4.0/layers/wrll-userspace/graphics/packages

NewsML is a trademark of IPTC

DO NOT REMOVE THESE LICENCE CONDITIONS - LICENCE OF THE IPTC NewsML TRADEMARK TO NON-MEMBERS OF THE IPTC
Use of the IPTC trademark shall be licensed by the IPTC ("the Licensor") to a Non-Member ("the Licensee") in consideration of the following obligations undertaken by the Licensee under the terms of this contract.

1. The Licensee recognises the Licensor as the sole owner of the intellectual property protected by the trademark.

2. The Licensee recognises that the Licensor has the right to grant licenses of the intellectual property protected by the trademark and has agreed to grant such a licence to the Licensee in the terms set out in this contract.

3. The Licensee shall not during the subsistence of this contract or at any future time register to use in its own name as proprietor any of the intellectual property protected by the trademark.

4. The Licensee shall not claim any right title or interest in the intellectual property or any part of it save as is granted by this contract.

5. The Licensee shall immediately call to the attention of the Licensor the use of any part of the intellectual property by any third party or any activity of any third party which might in the opinion of the Licensee amount to infringement of the rights protected by the trademark.

6. The Licensee shall not assign the benefit of this contract or grant any sub-licence without the prior written consent of the Licensor.

7. Use of the IPTC trademark is licensed only to those Licensees who comply with the requirements of the official published description of NewsML.

8. The Licensee promises to respect the integrity and quality standard of the trademark and shall refrain from all acts and omissions which threaten the integrity of the trademark as a mark of quality.

9. The Licensee shall communicate immediately to the IPTC any instances of actual or suspected misuse or non-compliance with the official published description of NewsML which come to the attention of the Licensee.

10. The Licensee shall, at the request of the IPTC Management Committee acting unanimously, accede to any reasonable request of the IPTC to inspect the address of the Licensee to verify compliance and each Licensee shall afford to the IPTC such assistance as is requested by the IPTC in response to the latter's reasonable enquiries in instances of suspected non-compliance with the official published description of NewsML requirements. The Licensee shall from time to time provide the IPTC with the full address of its place of business and that place will be deemed the Licensee's address. The IPTC reserves the right to terminate the use of the trademark by the Licensee at any time without notice or without the need to give reasons to the Licensee for such termination.

This contract shall be governed and construed in accordance with the laws of England and Wales whose courts shall be courts of competent jurisdiction.

libXslt 1.1.24-2

Software: libxslt

Version:	1.1.24-2
File or Package:	libxslt-1.1.24-2.fc9.src.rpm
OSI Licenses:	GPLv2+, GPLv2+ w/exception, FDLv1.1, MIT/X11
Other Licenses:	Custom
URL:	ftp://195.220.108.108/linux/fedora/updates/9/SRPMS.newkey/libxslt-1.1.24-2.fc9.src.rpm
Group:	Development/Libraries
Description:	Library providing the Gnome XSLT engine. Libxslt is the XSLT C library developed for the GNOME project. It provides an implementation of XSLT 1.0, plus most of the EXSLT set of processor-portable extensions functions and some of Saxon's evaluate and expressions extensions. Libxslt is based on libxml2, which it uses for XML parsing, tree manipulation and XPath support.
Common Usage:	Library
Package Size:	30.8 MB
Folders / Files:	78 / 2,024
Source Path:	wrlinux-4.0/layers/wrll-userspace/graphics/packages

lksctp-tools 1.0.9

Software:	lksctp-tools
Version:	1.0.9
File or Package:	lksctp-tools-1.0.9.tar.gz
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2.1, MIT/X11, BSDv2
Other Licenses:	Custom
URL:	http://superb-east.dl.sourceforge.net/sourceforge/lksctp/lksctp-tools-1.0.9.tar.gz
Group:	System Environment/Libraries
Description:	User-space access to Linux Kernel SCTP. The Linux Kernel Stream Control Transmission Protocol (lksctp) project is an implementation of the Stream Control Transmission Protocol (SCTP) in the Linux kernel. The primary goal of this project is to provide users with the state of art implementation of SCTP protocol and various extensions. For the list of supported specifications see Current Features. In addition to the ongoing development effort, this project also aims to disseminate information about SCTP and to encourage deployment of SCTP in real user environments.
Common Usage:	Utility, Library
Package Size:	4.1 MB

The Linux Kernel SCTP Reference Implementation is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2, or (at your option) any later version. For more information on licensing terms, please see the file COPYING in this directory.

SCTP (Stream Control Transmission Protocol) is a message oriented, reliable transport protocol, with congestion control, support for transparent multi-homing, and multiple ordered streams of messages. RFC2960 defines the core protocol. The IETF SIGTRAN Working Group developed SCTP. The primary architects are Randy Stewart and Qiaobing Xie.

The Kernel Reference is first and foremost an exposition of RFC2960 and related documents. You will find that the comments and variable names tie closely back to the RFC and Internet Drafts. This work was started by a small team of developers at Motorola. Throughout this document, "we" refers to that team. We intend for the meaning of "we" to expand to include the whole development community, all 27 million programmers on the planet. The Kernel Reference has loose origins in the SCTP User Space Reference by Randy Stewart and Qiaobing Xie.

The set of programs and documentation known as "lmbench" are distributed under the Free Software Foundation's General Public License with the following additional restrictions (which override any conflicting restrictions in the GPL):

© 2009-2010 Wind River Sysrtems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

1. You may not distribute results in any public forum, in any publication, or in any other way if you have modified the benchmarks.

2. You may not distribute the results for a fee of any kind. This includes web sites which generate revenue from advertising.

If you have modifications or enhancements that you wish included in future versions, please mail those to me, Larry McVoy, at lm@bitmover.com.

Rationale for the publication restrictions:

In summary:

a) LMbench is designed to measure enough of an OS that if you do well in all catagories, you've covered latency and bandwidth in networking, disks, file systems, VM systems, and memory systems.

b) Multiple times in the past people have wanted to report partial results. Without exception, they were doing so to show a skewed view of whatever it was they were measuring (for example, one OS fit small processes into segments and used the segment register to switch them, getting good results, but did not want to report large process context switches because those didn't look as good).

c) We insist that if you formally report LMbench results, you have to report all of them and make the raw results file easily available. Reporting all of them means in that same publication, a pointer does not count. Formally, in this context, means in a paper, on a web site, etc., but does not mean the exchange of results between OS developers who are tuning a particular subsystem.

We have a lot of history with benchmarking and feel strongly that there is little to be gained and a lot to be lost if we allowed the results to be published in isolation, without the complete story being told. There has been a lot of discussion about this, with people not liking this restriction, more or less on the freedom principle as far as I can tell. We're not swayed by that, our position is that we are doing the right thing for the OS community and will stick to our guns on this one.

It would be a different matter if there were 3 other competing benchmarking systems out there that did what LMbench does and didn't have the same reporting rules. There aren't and as long as that is the case, I see no reason to change my mind and lots of reasons not to do so. I'm sorry if I'm a pain in the ass on this topic, but I'm doing the right thing for you and the sooner people realize that the sooner we can get on to real work.

Operating system design is a largely an art of balancing tradeoffs. In many cases improving one part of the system has negative effects on other parts of the system. The art is choosing which parts to optimize and which to not optimize. Just like in computer architecture, you can optimize the common instructions (RISC) or the uncommon instructions (CISC), but in either case there is usually a cost to pay (in RISC uncommon instructions are more expensive than common instructions, and in CISC common instructions are more expensive than required). The art lies in knowing which operations are important and optmizing those while minimizing the impact on the rest of the system.

Since lmbench gives a good overview of many important system features, users may see the performance of the system as a whole, and can see where tradeoffs may have been made. This is the driving force behind the publication restriction: any idiot can optimize certain subsystems while completely destroying overall system performance. If said idiot publishes only the numbers relating to the optimized subsystem, then the costs of the optimization are hidden and readers will mistakenly believe that the optimization is a good idea. By including the publication restriction readers would be able to detect that the optimization improved the subsystem performance while damaging the rest of the system performance and would be able to make an informed decision as to the merits of the optimization.

Note that these restrictions only apply to publications. We intend and encourage lmbench's use during design, development, and tweaking of systems and applications. If you are tuning the linux or BSD TCP stack, then by all means, use the networking benchmarks to evaluate the performance effects of various modifications; Swap results with other developers; use the networking numbers in isolation. The restrictions only kick in when you go to publish the results. If you sped up the TCP stack by a factor of 2 and want to publish a paper with the various tweaks or algorithms used to accomplish this goal, then you can publish the networking numbers to show the improvement. However, the paper must also include the rest of the standard lmbench numbers to show how your tweaks may (or may not) have impacted the rest of the system. The full set of numbers may be included in an appendix, but they must be included in the paper.

This helps protect the community from adopting flawed technologies based on incomplete data. It also helps protect the community from misleading marketing which tries to sell systems based on partial (skewed) lmbench performance results. We have seen many cases in the past where partial or misleading benchmark results have caused great harm to the community, and we want to ensure that our benchmark is not used to perpetrate further harm and support false or misleading claims.

logrotate 3.7.8-4

Software:	logrotate
Version:	3.7.8-4
File or Package:	logrotate-3.7.8-4.fc12.src.rpm
OSI Licenses:	GPLv2
Other Licenses:	
URL:	
Group:	System Environment/Base
Description:	A bash script which can rotate log files and multilog log directories and archive them in a central location. The logrotate utility is designed to simplify the administration of log files on a system which generates a lot of log files.Logrotate allows for the automatic rotation compression, removal and mailing of log files.Logrotate can be set to handle a log file daily, weekly, monthly or when the log file gets to a certain size.Normally, logrotate runs as a daily cron job. Install the logrotate package if you need a utility to deal with the log files on your system.
Common Usage:	Utility

Copyright (C) 1989, 1997 Aladdin Enterprises. All rights reserved.

ansi2knr is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY. No author or distributor accepts responsibility to anyone for the consequences of using it or for whether it serves any particular purpose or works at all, unless he says so in writing. Refer to the GNU General Public License (the "GPL") for full details.

Everyone is granted permission to copy, modify and redistribute ansi2knr, but only under the conditions described in the GPL. A copy of this license is supposed to have been given to you along with ansi2knr so you can know your rights and responsibilities. It should be in a file named COPYLEFT, or, if there is no file named COPYLEFT, a file named COPYING. Among other things, the copyright notice and this notice must be preserved on all copies.

We explicitly state here what we believe is already implied by the GPL: if the ansi2knr program is distributed as a separate set of sources and a separate executable file which are aggregated on a storage medium together with another program, this in itself does not bring the other program under the GPL, nor does the mere fact that such a program or the procedures for constructing it invoke the ansi2knr executable bring any other part of the program under the GPL.

SENDMAIL LICENSE
The following license terms and conditions apply, unless a different license is obtained from Sendmail, Inc., 1401 Park Avenue, Emeryville, CA 94608, or by electronic mail at license@sendmail.com.

License Terms:
Use, Modification and Redistribution (including distribution of any modified or derived work) in source and binary forms is permitted only if each of the following conditions is met:

1. Redistributions qualify as "freeware" or "Open Source Software" under one of the following terms:

(a) Redistributions are made at no charge beyond the reasonable cost of materials and delivery.

(b) Redistributions are accompanied by a copy of the Source Code or by an irrevocable offer to provide a copy of the Source Code for up to three years at the cost of materials and delivery. Such redistributions must allow further use, modification, and redistribution of the Source Code under substantially the same terms as this license. For the purposes of redistribution "Source Code" means the complete source code of sendmail including all modifications.

Other forms of redistribution are allowed only under a separate royalty-free agreement permitting such redistribution subject to standard commercial terms and conditions. A copy of such agreement may be obtained from Sendmail, Inc. at the above address.

2. Redistributions of source code must retain the copyright notices as they appear in each source code file, these license terms, and the disclaimer/limitation of liability set forth as paragraph 6 below.

3. Redistributions in binary form must reproduce the Copyright Notice, these license terms, and the disclaimer/limitation of liability set forth as paragraph 6 below, in the documentation and/or other materials provided with the distribution. For the purposes of binary distribution the "Copyright Notice" refers to the following language:
"**Copyright (c) 1998 Sendmail, Inc. All rights reserved**."

4. Neither the name of Sendmail, Inc. nor the University of California nor the names of their contributors may be used to endorse or promote products derived from this software without specific prior written permission. The name "sendmail" is a trademark of Sendmail, Inc.

5. All redistributions must comply with the conditions imposed by the University of California on certain embedded code, whose copyright notice and conditions for redistribution are as follows:

(a) **Copyright (c) 1988, 1993 The Regents of the University of California. All rights reserved.**

(b) Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

(i) Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.

(ii) Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

(iii) All advertising materials mentioning features or use of this software must display the following acknowledgement: "This product includes software developed by the University of California, Berkeley and its contributors."

Description:	The Linux Test Project is a joint project with SGI, IBM, OSDL, and Bull with a goal to deliver test suites to the open source community that validate the reliability, robustness, and stability of Linux. The Linux Test Project is a collection of tools for testing the Linux kernel and related features. Our goal is to improve the Linux kernel by bringing test automation to the kernel testing effort. Interested open source contributors are encouraged to join the project.

From:
http://www.opencontent.org/openpub
Open Publication License v1.0, 8 June 1999

I. REQUIREMENTS ON BOTH UNMODIFIED AND MODIFIED VERSIONS
The Open Publication works may be reproduced and distributed in whole or in part, in any medium physical or electronic, provided that the terms of this license are adhered to, and that this license or an incorporation of it by reference (with any options elected by the author(s) and/or publisher) is displayed in the reproduction.

Proper form for an incorporation by reference is as follows:

Copyright (c) <year> by <author's name or designee>. This material may be distributed only subject to the terms and conditions set forth in the Open Publication License, vX.Y or later (the latest version is presently available at http://www.opencontent.org/openpub/).

The reference must be immediately followed with any options elected by the author(s) and/or publisher of the document (see section VI).

Commercial redistribution of Open Publication-licensed material is permitted.

Any publication in standard (paper) book form shall require the citation of the original publisher and author. The publisher and author's names shall appear on all outer surfaces of the book. On all outer surfaces of the book the original publisher's name shall be as large as the title of the work and cited as possessive with respect to the title.

II. COPYRIGHT
The copyright to each Open Publication is owned by its author(s) or designee.

III. SCOPE OF LICENSE
The following license terms apply to all Open Publication works, unless otherwise explicitly stated in the document.

Mere aggregation of Open Publication works or a portion of an Open Publication work with other works or programs on the same media shall not cause this license to apply to those other works. The aggregate work shall contain a notice specifying the inclusion of the Open Publication material and appropriate copyright notice.

SEVERABILITY. If any part of this license is found to be unenforceable in any jurisdiction, the remaining portions of the license remain in force.

NO WARRANTY. Open Publication works are licensed and provided "as is" without warranty of any kind, express or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose or a warranty of non-infringement.

IV. REQUIREMENTS ON MODIFIED WORKS
All modified versions of documents covered by this license, including translations, anthologies, compilations and partial documents, must meet the following requirements:

1. The modified version must be labeled as such.

2. The person making the modifications must be identified and the modifications dated.

3. Acknowledgement of the original author and publisher if applicable must be retained according to normal academic citation practices.

4. The location of the original unmodified document must be identified.

5. The original author's (or authors') name(s) may not be used to assert or imply endorsement of the resulting document without the original author's (or authors') permission.

V. GOOD-PRACTICE RECOMMENDATIONS
In addition to the requirements of this license, it is requested from and strongly recommended of redistributors that:

1. If you are distributing Open Publication works on hardcopy or CD-ROM, you provide email notification to the authors of your intent to redistribute at least thirty days before your manuscript or media freeze, to give the authors time to provide updated documents. This notification should describe modifications, if any, made to the document.

2. All substantive modifications (including deletions) be either clearly marked up in the document or else described in an attachment to the document.

3. Finally, while it is not mandatory under this license, it is considered good form to offer a free copy of any hardcopy and CD-ROM expression of an Open Publication-licensed work to its author(s).

VI. LICENSE OPTIONS

© 2009-2010 Wind River Sysrtems, Inc. document version 1.0

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

The author(s) and/or publisher of an Open Publication-licensed document may elect certain options by appending language to the reference to or copy of the license. These options are considered part of the license instance and must be included with the license (or its incorporation by reference) in derived works.

A. To prohibit distribution of substantively modified versions without the explicit permission of the author(s). "Substantive modification" is defined as a change to the semantic content of the document, and excludes mere changes in format or typographical corrections.

To accomplish this, add the phrase `Distribution of substantively modified versions of this document is prohibited without the explicit permission of the copyright holder.' to the license reference or copy.

B. To prohibit any publication of this work or derivative works in whole or in part in standard (paper) book form for commercial purposes unless prior permission is obtained from the copyright holder.

To accomplish this, add the phrase 'Distribution of the work or derivative of the work in any standard (paper) book form is prohibited unless prior permission is obtained from the copyright holder.' to the license reference or copy.

ltrace 0.5.1

Software:	ltrace
Version:	0.5.1
File or Package:	ltrace_0.5.1.orig.tar.gz
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, MIT/X11
Other Licenses:	Custom
URL:	ftp://sunsite.cnlab-switch.ch/mirror/debian/pool/main/l/ltrace/ltrace_0.5.1.orig.tar.gz
Group:	Development/Debuggers
Description:	Tracks runtime library calls from dynamically linked executables. ltrace is a debugging program which runs a specified command until it exits. While the command is executing, ltrace intercepts and records the dynamic library calls which are called by the executed process and the signals

received by that process. It can also intercept and print the system calls executed by the program. The program to be traced need not be recompiled for this, so you can use it on binaries for which you don't have the source handy. You should install ltrace if you need a sysadmin tool for tracking the execution of processes.

Common Usage: utility

lttv-0.12.31-04072010/lttv-0.12.31-04072010/LTTngManual.html
Licenses - LTTng, UST and LTTV are developed by an open community. LTTng is released under a dual Gnu LGPLv2.1/GPLv2 license, except for very few kernel-specific files which are derived work from the Linux kernel. LTTV is available under the Gnu GPLv2. The low-level LTTV trace reading library is released under Gnu LGPLv2.1. The Eclipse LTTng trace analysis tool is released under the EPL and uses the LTTV trace reading library (LGPLv2.1). The UST (Userspace Tracing) and the Userspace RCU libraries are released under the LGPLv2.1 license, which allows linking with non-GPL (BSD, proprietary...) applications. The associated headers are released under MIT-style/BSD-style licenses. Please refer to each particular file licensing for details.

lua 5.1.4-7.5.moblin2

Software:	lua
Version:	5.1.4-7.5.moblin2
File or Package:	lua-5.1.4-7.5.moblin2.src.rpm
OSI Licenses:	GPLv2+ w/exception, MIT/X11
Other Licenses:	
URL:	http://ftp.moblin.org/moblin/releases/2.1/source/ lua-5.1.4-7.5.moblin2.src.rpm
Group:	User Space Apps
Description:	Lua is a powerful, light-weight programming language designed for extending applications. Lua is also frequently used as a general-purpose, stand-alone language. Lua is free software. Lua is a powerful, fast, lightweight, embeddable scripting language. Lua combines simple procedural syntax with powerful data description constructs based on associative arrays and extensible semantics. Lua is dynamically typed, runs by interpreting bytecode for a register-based virtual machine, and has automatic memory management with incremental garbage collection, making it ideal for configuration, scripting, and rapid prototyping.
Common Usage:	Interpreter, Library
Package Size:	3.2 MB
Folders / Files:	7 / 108
Source Path:	wrlinux-4.0/layers/wrll-userspace/core/packages

NOTICES:

From:
http://www.lua.org/license.html
License - Lua is free software: it can be used for any purpose, including commercial purposes, at absolutely no cost. No paperwork, no royalties, no GNU-like "copyleft" restrictions, either. Just download it and use it. Lua is certified Open Source software. Its licenses are compatible with GPL. Lua is not in the public domain and PUC-Rio keeps its copyright. The legal details are below. License for Lua 5.0 and later versions:

Since Lua 5.0, Lua is licensed under the terms of the MIT license reproduced below.

License for Lua 4.0 and earlier versions:
Until Lua 4.0, Lua used its own license, which was very close to the zlib license and others, but not quite the same. The spirit of both licenses is that you are free to use Lua for any purpose at no cost without having to ask us. The only requirement is that if you do use Lua, then you should give us credit by including the appropriate copyright notice somewhere in your product or its documentation. A nice, but optional, way to give us further credit is to include a Lua logo and a link to our site in a web page for your product. The Lua language is entirely designed, implemented, and maintained by a team at PUC-Rio in Brazil. The implementation is not derived from licensed software.

License for Lua 5.0 and later versions

lzma 4.32.7

Software:	lzma
Version:	4.32.7
File or Package:	lzma-4.32.7.tar.bz2
OSI Licenses:	GPLv3, GPLv3+, GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2+, LGPLv2.1, LGPLv2.1+, MIT/X11, Common Public (CPL), Public Domain
Other Licenses:	Custom
URL:	http://tukaani.org/lzma/lzma-4.32.7.tar.bz2
Group:	User Space Apps
Description:	LZMA Utils are legacy data compression software with high compression ratio. LZMA Utils are no longer developed, although critical bugs may be fixed as long as fixing them doesn't require huge changes to the code. LZMA Utils is an attempt to provide LZMA compression to POSIX-like systems. The idea is to have a gzip-like command line tool and a zlib-like library, which would make it easy to adapt the new compression technology to existing applications.
Common Usage:	Standalone
Package Size:	2.7 MB
Folders / Files:	29 / 146
Source Path:	wrlinux-4.0/layers/ldat-tools/packages

Description:	LZO is a portable lossless data compression library written in ANSI C. It offers pretty fast compression and very fast decompression. Decompression requires no memory. In addition there are slower compression levels achieving a quite competitive compression ratio while still decompressing at this very high speed. Lempel-Ziv-Oberhumer (LZO) is a lossless data compression algorithm that is focused on decompression speed. A free software tool which implements it is lzop. The original library was written in ANSI C, and it has been made available under the GNU General Public License. Versions of LZO are available for the Perl, Python and Java languages.
Common Usage:	Library
Package Size:	5.5 MB

m4 1.4.8-2

Software:	m4
Version:	1.4.8-2
File or Package:	m4-1.4.8-2.fc7.src.rpm
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, FDLv1.2, MIT/X11
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/7/Fedora/source/SRPMS/m4-1.4.8-2.fc7.src.rpm
Group:	Applications/Text
Description:	A GNU implementation of the traditional UNIX macro processor. M4 is useful for writing text files which can be logically parsed, and is used by many programs as part of their build process. M4 has built-in functions for including files, running shell commands, doing arithmetic, etc. The autoconf program needs m4 for generating configure scripts, but not for running configure scripts. Install m4 if you need a macro processor.
Common Usage:	Utility

m4 1.4.13-4

Software:	m4
Version:	1.4.13-4
File or Package:	m4-1.4.13-4.fc12.src.rpm
OSI Licenses:	GPLv2+ w/exception, GPLv3, GPLv3+, GPLv3+ w/exception, FDLv1.2+, FDLv1.3, MIT/X11
Other Licenses:	Custom
URL:	http://www.gnu.org/software/m4/
Group:	Applications/Text
Description:	A GNU implementation of the traditional UNIX macro processor. M4 is useful for writing text files which can be logically parsed, and is used by many programs as part of their build process. M4 has built-in functions for including files, running shell commands, doing arithmetic, etc. The autoconf program needs m4 for generating configure scripts, but not for running configure scripts. Install m4 if you need a macro processor.
Common Usage:	Utility
Package Size:	9.3 MB
Folders / Files:	15 / 823
Source Path:	wrlinux-4.0/layers/ldat-tools/packages

See file `COPYING' for copying conditions. Note that M4 is distributed under the GNU Public License version 3 or later. Some files in the distribution are copied from the gnulib project, and hence bear the designation version 2 or later because they are unmodified from gnulib; however, if you modify these files using M4 rather than gnulib as the source, you must update the license to be GPLv3 or later.

This is the copyright holder that gets inserted into the header of the $(DOMAIN).pot file. Set this to the copyright holder of the surrounding package. (Note that the msgstr strings, extracted from the package's sources, belong to the copyright holder of the package.) Translators are expected to transfer the copyright for their translations to this person or entity, or to disclaim their copyright. The empty string stands for the public domain; in this case the translators are expected to disclaim their copyright. **COPYRIGHT_HOLDER = Free Software Foundation, Inc.**

make 3.81-18

Software:	make
Version:	3.81-18
File or Package:	make-3.81-18.fc12.src.rpm
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2, LGPLv2+, MIT/X11, FDLv1.1+, FDLv1.2, FDLv1.2+, Public Domain, Academic
Other Licenses:	Custom
URL:	http://www.gnu.org/software/make/
Group:	Development/Tools
Description:	A GNU tool which simplifies the build process for users. A GNU tool for controlling the generation of executables and other non-source files of a program from the program's source files. Make allows users to build and install packages without any significant knowledge about the details of the build process. The details about how the program should be built are provided for make in the program's makefile. make is a utility for automatically building executable programs and libraries from source code. Files called makefiles specify how to derive the target program from each of its dependencies. Make typically decides where to start through topological sorting. Though Integrated Development Environments and language-specific compiler features can also be used to manage the build process in modern systems, make remains widely used, especially in Unix-based platforms.

This document is in the public domain. The author requests, however, that semantically altered versions are not distributed without permission of the author, assuming the author can be contacted without an unreasonable effort.

In particular, please don't sent patches for this list to Linus, at least not without contacting me first. I do not have any information about these devices beyond what appears on this list. Any such information requests will be deleted without reply.

makedumpfile 1.3.5

Software:	makedumpfile
Version:	1.3.5
File or Package:	makedumpfile-1.3.5.tar.gz
OSI Licenses:	GPLv2, GPLv2+
Other Licenses:	
URL:	
Group:	User Space Apps / Applications/Text
Description:	Custom kdump dumpfile. By using the makedumpfile command, it is possible to shorten the dumpfile of kdump. When obtaining the debugging information from a kernel that crashed, it is possible that only some sections are of importance. makedumpfile allows removing the unnecessary sections and thus shortens the core dump file from potentially several gigabytes to mere megabytes.
Common Usage:	Tool, Others
Package Size:	412 KB (0.40 MB)
Folders / Files:	2 / 15
Source Path:	wrlinux-4.0/layers/wrll-kernel/packages

http://www.opensource.org/licenses/osl-1.0.txt
The Open Software License v. 1.0

This Open Software License (the "License") applies to any original work of authorship (the "Original Work") whose owner (the "Licensor") has placed the following notice immediately following the copyright notice for the Original Work: "Licensed under the Open Software License version 1.0" License Terms

1) Grant of Copyright License.
Licensor hereby grants You a world-wide, royalty-free, non-exclusive, perpetual, non-sublicenseable license to do the following:

a) to reproduce the Original Work in copies;

b) to prepare derivative works ("Derivative Works") based upon the Original Work;

c) to distribute copies of the Original Work and Derivative Works to the public, with the proviso that copies of Original Work or Derivative Works that You distribute shall be licensed under the Open Software License;

d) to perform the Original Work publicly; and

e) to display the Original Work publicly.

2) Grant of Patent License.
Licensor hereby grants You a world-wide, royalty-free, non-exclusive, perpetual, non-sublicenseable license, under patent claims owned or controlled by the Licensor that are embodied in the Original Work as furnished by the Licensor ("Licensed Claims") to make, use, sell and offer for sale the Original Work. Licensor hereby grants You a world-wide, royalty-free, non-exclusive, perpetual, non-sublicenseable license under the Licensed Claims to make, use, sell and offer for sale Derivative Works.

3) Grant of Source Code License.
The term "Source Code" means the preferred form of the Original Work for making modifications to it and all available documentation describing how to access and modify the Original Work. Licensor hereby agrees to provide a machine-readable copy of the Source Code of the Original Work along with each copy of the Original Work that Licensor distributes. Licensor reserves the right to satisfy this obligation by placing a machine-readable copy of the Source Code in an information repository reasonably calculated to permit inexpensive and convenient access by You for as long as Licensor continues to distribute the Original Work, and by publishing the address of that information repository in a notice immediately following the copyright notice that applies to the Original Work.

4) Exclusions From License Grant.
Nothing in this License shall be deemed to grant any rights to trademarks, copyrights, patents, trade secrets or any other intellectual property of Licensor except as expressly stated herein. No patent license is granted to make, use, sell or offer to sell embodiments of any patent claims other than the Licensed Claims defined in Section 2. No right is granted to the trademarks of Licensor even if such marks are included in the Original Work. Nothing in this License shall be interpreted to prohibit Licensor from licensing under different terms from this License any Original Work that Licensor otherwise would have a right to license.

5) External Deployment.
The term "External Deployment" means the use or distribution of the Original Work or Derivative Works in any way such that the Original Work or Derivative Works may be accessed or used by anyone other than You, whether the Original Work or Derivative Works are distributed to those persons, made available as an application intended for use over a computer network, or used to provide services or otherwise deliver content to anyone other than You. As an express condition for the grants of license hereunder, You agree that any External Deployment by You shall be deemed a distribution and shall be licensed to all under the terms of this License, as prescribed in section 1(c) herein.

6) Warranty and Disclaimer of Warranty.
LICENSOR WARRANTS THAT THE COPYRIGHT IN AND TO THE ORIGINAL WORK IS OWNED BY THE LICENSOR OR THAT THE ORIGINAL WORK IS DISTRIBUTED BY LICENSOR UNDER A VALID CURRENT LICENSE FROM THE COPYRIGHT OWNER. EXCEPT AS

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

EXPRESSLY STATED IN THE IMMEDIATELY PRECEEDING SENTENCE, THE ORIGINAL WORK IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" BASIS, WITHOUT WARRANTY, EITHER EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, THE WARRANTY OF NON-INFRINGEMENT AND WARRANTIES THAT THE ORIGINAL WORK IS MERCHANTABLE OR FIT FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY OF THE ORIGINAL WORK IS WITH YOU. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO LICENSE TO ORIGINAL WORK IS GRANTED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

7) Limitation of Liability.
UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL THE LICENSOR BE LIABLE TO ANY PERSON FOR ANY DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER ARISING AS A RESULT OF THIS LICENSE OR THE USE OF THE ORIGINAL WORK INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PERSON SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

8) Acceptance and Termination.
Nothing else but this License (or another written agreement between Licensor and You) grants You permission to create Derivative Works based upon the Original Work, and any attempt to do so except under the terms of this License (or another written agreement between Licensor and You) is expressly prohibited by U.S. copyright law, the equivalent laws of other countries, and by international treaty. Therefore, by exercising any of the rights granted to You in Sections 1 and 2 herein, You indicate Your acceptance of this License and all of its terms and conditions. This license shall terminate immediately and you may no longer exercise any of the rights granted to You by this License upon Your failure to honor the proviso in Section 1(c) herein.

9) Mutual Termination for Patent Action.
This License shall terminate automatically and You may no longer exercise any of the rights granted to You by this License if You file a lawsuit in any court alleging that any OSI Certified open source software that is licensed under any license containing this "Mutual Termination for Patent Action" clause infringes any patent claims that are essential to use that software.

10) Jurisdiction, Venue and Governing Law.
You agree that any lawsuit arising under or relating to this License shall be maintained in the courts of the jurisdiction wherein the Licensor resides or in which Licensor conducts its primary business, and under the laws of that jurisdiction excluding its conflict-of-law provisions. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any use of the Original Work outside the scope of this License or after its termination shall be subject to the requirements and penalties of the U.S. Copyright Act, 17 U.S.C. § 101 et seq., the equivalent laws of other countries, and international treaty. This section shall survive the termination of this License.

11) Attorneys Fees.
In any action to enforce the terms of this License or seeking damages relating thereto, the prevailing party shall be entitled to recover its costs and expenses, including, without limitation, reasonable attorneys' fees and costs incurred in connection with such action, including any appeal of such action. This section shall survive the termination of this License.

12) Miscellaneous.
This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

13) Definition of "You" in This License.
"You" throughout this License, whether in upper or lower case, means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, "You" includes any entity that controls, is controlled by, or is under common control with you. For purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

This license is **Copyright (C) 2002 Lawrence E. Rosen. All rights reserved.**

Permission is hereby granted to copy and distribute this license without modification. This license may not be modified without the express written permission of its copyright owner.

man 1.6e-3

Software:	man
Version:	1.6e-3
File or Package:	man-1.6e-3.fc7.src.rpm
OSI Licenses:	GPLv1+, GPLv2, GPLv2+, MIT/X11, Academic
Other Licenses:	Non-commercial, Custom
URL:	http://archives.fedoraproject.org/pub/archive/fedora/linux/releases/7/Everything/source/SRPMS/man-1.6e-3.fc7.src.rpm
Group:	User Space Apps / System Environment/Base
Description:	A set of documentation tools: man, apropos and whatis Command "man" was requested thus integrated man package and its dependent ones: texinfo and groff. The man package includes three tools for finding information and/or documentation about your Linux system: man, apropos, and whatis. The man system formats and displays on-line manual pages about commands or functions on your system. Apropos searches the whatis database (containing short descriptions of system commands) for a string. Whatis searches its own database for a complete word. The man package should be installed on your system because it is the primary way to find documentation on a Linux system.
Common Usage:	Utility
Package Size:	2.0 MB
Folders / Files:	38 / 250
Source Path:	wrlinux-4.0/layers/wrll-userspace/core/packages

3. Glimpse.
For the glimpse part, I quote Michael Hamilton:

To use the Glimpse full text searching, you will need to install glimpse in /usr/bin. Redhat rpm users can get glimpse from ftp://ftp.redhat.com/pub/contrib/i386/glimpse-4.0-6.i386.rpm The glimpse home ftp site is cs.arizona.edu.

N.B. glimpse is not freely redistributable for commercial use, I'd be very interested in a more liberal alternative.

From:
MesaLib-7.0.1/Mesa-7.0.1/docs/license.html
Disclaimer - Mesa is a 3-D graphics library with an API which is very similar to that of OpenGL. To the extent that Mesa utilizes the OpenGL command syntax or state machine, it is being used with authorization from Silicon Graphics, Inc. (SGI). However, the author does not possess an OpenGL license from SGI, and makes no claim that Mesa is in any way a compatible replacement for OpenGL or associated with SGI. Those who want a licensed implementation of OpenGL should contact a licensed vendor. Please do not refer to the library as MesaGL (for legal reasons). It's just Mesa or The Mesa 3-D graphics library. OpenGL is a trademark of Silicon Graphics Incorporated.

License / Copyright Information - The Mesa distribution consists of several components. Different copyrights and licenses apply to different components. For example, GLUT is **copyrighted by Mark Kilgard**, some demo programs are **copyrighted by SGI**, some of the Mesa device drivers are **copyrighted by their** author**s**. See below for a list of Mesa's main components and the license for each. The core Mesa library is licensed according to the terms of the MIT license. This allows integration with the XFree86, Xorg and DRI projects. The default Mesa license is as follows:

Copyright (C) 1999-2007 Brian Paul All Rights Reserved.

Permission is hereby granted, free of charge, to any person obtaining a copy of this software and associated documentation files (the "Software"), to deal in the Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies of the Software, and to permit persons to whom the Software is furnished to do so, subject to the following conditions: The above copyright notice and this permission notice shall be included in all copies or substantial portions of the Software.

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT.

IN NO EVENT SHALL BRIAN PAUL BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF OR IN CONNECTION WITH THE SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SOFTWARE.

Attention, Contributors - When contributing to the Mesa project you must agree to the licensing terms of the component to which you're contributing. The following section lists the primary components of the Mesa distribution and their respective licenses.

Inc. Copyright in any portions created by third parties is as indicated elsewhere herein. **All Rights Reserved.**

Additional Notice Provisions: The application programming interfaces established by SGI in conjunction with the Original Code are The OpenGL(R) Graphics System: A Specification (Version 1.2.1), released April 1, 1999; The OpenGL(R) Graphics System Utility Library (Version 1.3), released November 4, 1998; and OpenGL(R) Graphics with the X Window System(R) (Version 1.3), released October 19, 1998. This software was created using the OpenGL(R) version 1.2.1 Sample Implementation published by SGI, but has not been independently verified as being compliant with the OpenGL(R) version 1.2.1 Specification.

From:
http://oss.sgi.com/projects/FreeB
SGI Free Software License B
URL: http://oss.sgi.com/projects/FreeB
This is SGI's Free Software License "B", version 1.1, used by several of SGI's projects. The license is available in both PostScript and Microsoft Word formats. Unfortunately, Microsoft Word's HTML converter introduced errors in the section numbering, so we've had to remove the HTML version.

History - Version 1.0 of the FreeB license included one term regarding compliance with defined APIs which posed a problem for some open source developers. We revised the license in response to those concerns, and instead issued a joint statement with developers outside SGI satisfying both SGI's needs and those of the outside developers working with code covered by the FreeB license. The original 1.0 license is available for reference. The version 1.0 license underwent one minor change in section 8 (defining "Modifications") on the morning that we went public with it, due to internal miscommunication. For reference so you can see the change, the originally posted version of the license is here.

From:
http://oss.sgi.com/projects/FreeB/SGIFreeSWLicB.1.1.doc
SGI FREE SOFTWARE LICENSE B (Version 1.1 [02/22/2000])
1. Definitions.
1.1. "Additional Notice Provisions" means such additional provisions as appear in the Notice in Original Code under the heading "Additional Notice Provisions."

1.2. "Covered Code" means the Original Code or Modifications, or any combination thereof.

1.3. "Hardware" means any physical device that accepts input, processes input, stores the results of processing, and/or provides output.

1.4. "Larger Work" means a work that combines Covered Code or portions thereof with code not governed by the terms of this License.

1.5. "Licensable" means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.

1.6. "License" means this document.

1.7. "Licensed Patents" means patent claims Licensable by SGI that are infringed by the use or sale of Original Code or any Modifications provided by SGI, or any combination thereof.

1.8. "Modifications" means any addition to or deletion from the substance or structure of the Original Code or any previous Modifications. When Covered Code is released as a series of files, a Modification is:

> A. Any addition to the contents of a file containing Original Code and/or addition to or deletion from the contents of a file containing previous Modifications.
>
> B. Any new file that contains any part of the Original Code or previous Modifications.

1.9. "Notice" means any notice in Original Code or Covered Code, as required by and in compliance with this License.

1.10. "Original Code" means source code of computer software code that is described in the source code Notice required by Exhibit A as Original Code, and updates and error corrections specifically thereto.

1.11. "Recipient" means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License or a future version of this License issued under Section 8. For legal entities, "Recipient" includes any entity that controls, is controlled by, or is under common control with Recipient. For purposes of this definition, "control" of an entity means (a) the power, direct or indirect, to direct or manage such entity, or (b) ownership of fifty percent (50%) or more of the outstanding shares or beneficial ownership of such entity.

1.12. "Recipient Patents" means patent claims Licensable by a Recipient that are infringed by the use or sale of Original Code or any Modifications provided by SGI, or any combination thereof.

1.13. "SGI" means Silicon Graphics, Inc.

1.14. "SGI Patents" means patent claims Licensable by SGI other than the Licensed Patents.

2. License Grant and Restrictions.
2.1. SGI License Grant. Subject to the terms of this License and any third party intellectual property claims, for the duration of intellectual property protections inherent in the Original Code, SGI hereby grants Recipient a worldwide, royalty-free, non-exclusive license, to do the following:

> (i) under copyrights Licensable by SGI, to reproduce, distribute, create derivative works from, and, to the extent applicable, display and perform the Original Code and/or any Modifications provided by SGI alone and/or as part of a Larger Work; and
>
> (ii) under any Licensable Patents, to make, have made, use, sell, offer for sale, import and/or otherwise transfer the Original Code and/or any Modifications provided by SGI. Recipient accepts the terms and conditions of this License by undertaking any of the aforementioned actions. The patent license shall apply to the Covered Code if, at the time any related Modification is added, such addition of the Modification causes such combination to be covered by the Licensed Patents. The patent license in Section 2.1(ii) shall not apply to any other combinations that include the Modification.

© 2009-2010 Wind River Sysrtems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

No patent license is provided under SGI Patents for infringements of SGI Patents by Modifications not provided by SGI or combinations of Original Code and Modifications not provided by SGI.

2.2. Recipient License Grant. Subject to the terms of this License and any third party intellectual property claims, Recipient hereby grants SGI and any other Recipients a worldwide, royalty-free, non-exclusive license, under any Recipient Patents, to make, have made, use, sell, offer for sale, import and/or otherwise transfer the Original Code and/or any Modifications provided by SGI.

2.3. No License For Hardware Implementations. The licenses granted in Section 2.1 and 2.2 are not applicable to implementation in Hardware of the algorithms embodied in the Original Code or any Modifications provided by SGI.

3. Redistributions.
3.1. Retention of Notice/Copy of License. The Notice set forth in Exhibit A, below, must be conspicuously retained or included in any and all redistributions of Covered Code. For distributions of the Covered Code in source code form, the Notice must appear in every file that can include a text comments field; in executable form, the Notice and a copy of this License must appear in related documentation or collateral where the Recipient's rights relating to Covered Code are described. Any Additional Notice Provisions which actually appears in the Original Code must also be retained or included in any and all redistributions of Covered Code.

3.2. Alternative License. Provided that Recipient is in compliance with the terms of this License, Recipient may, so long as without derogation of any of SGI's rights in and to the Original Code, distribute the source code and/or executable version(s) of Covered Code under

(1) this License;

(2) a license identical to this License but for only such changes as are necessary in order to clarify Recipient's role as licensor of Modifications; and/or

(3) a license of Recipient's choosing, containing terms different from this License, provided that the license terms include this Section 3 and Sections 4, 6, 7, 10, 12, and 13, which terms may not be modified or superseded by any other terms of such license.

If Recipient elects to use any license other than this License, Recipient must make it absolutely clear that any of its terms which differ from this License are offered by Recipient alone, and not by SGI. It is emphasized that this License is a limited license, and, regardless of the license form employed by Recipient in accordance with this Section 3.2, Recipient may relicense only such rights, in Original Code and Modifications by SGI, as it has actually been granted by SGI in this License.

3.3. Indemnity. Recipient hereby agrees to indemnify SGI for any liability incurred by SGI as a result of any such alternative license terms Recipient offers.

4. Termination. This License and the rights granted hereunder will terminate automatically if Recipient breaches any term herein and fails to cure such breach within 30 days thereof. Any sublicense to the Covered Code that is properly granted shall survive any termination of this License, absent termination by the terms of such sublicense. Provisions that, by their nature, must remain in effect beyond the termination of this License, shall survive.

5. No Trademark Or Other Rights. This License does not grant any rights to:

(i) any software apart from the Covered Code, nor shall any other rights or licenses not expressly granted hereunder arise by implication, estoppel or otherwise with respect to the Covered Code;

(ii) any trade name, trademark or service mark whatsoever, including without limitation any related right for purposes of endorsement or promotion of products derived from the Covered Code, without prior written permission of SGI; or

(iii) any title to or ownership of the Original Code, which shall at all times remains with SGI. All rights in the Original Code not expressly granted under this License are reserved.

6. Compliance with Laws; Non-Infringement. There are various worldwide laws, regulations, and executive orders applicable to dispositions of Covered Code, including without limitation export, re-export, and import control laws, regulations, and executive orders, of the U.S. government and other countries, and Recipient is reminded it is obliged to obey such laws, regulations, and executive orders. Recipient may not distribute Covered Code that (i) in any way infringes (directly or contributorily) any intellectual property rights of any kind of any other person or entity or (ii) breaches any representation or warranty, express, implied or statutory, to which, under any applicable law, it might be deemed to have been subject.

7. Claims of Infringement. If Recipient learns of any third party claim that any disposition of Covered Code and/or functionality wholly or partially infringes the third party's intellectual property rights, Recipient will promptly notify SGI of such claim.

8. Versions of the License. SGI may publish revised and/or new versions of the License from time to time, each with a distinguishing version number. Once Covered Code has been published under a particular version of the License, Recipient may, for the duration of the license, continue to use it under the terms of that version, or choose to use such Covered Code under the terms of any subsequent version published by SGI. Subject to the provisions of Sections 3 and 4 of this License, only SGI may modify the terms applicable to Covered Code created under this License.

9. DISCLAIMER OF WARRANTY. COVERED CODE IS PROVIDED "AS IS." ALL EXPRESS AND IMPLIED WARRANTIES AND CONDITIONS ARE DISCLAIMED, INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY, SATISFACTORY QUALITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT.

SGI ASSUMES NO RISK AS TO THE QUALITY AND PERFORMANCE OF THE SOFTWARE. SHOULD THE SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, SGI ASSUMES NO COST OR LIABILITY FOR SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY IS AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED CODE IS AUTHORIZED HEREUNDER EXCEPT SUBJECT TO THIS DISCLAIMER.

10. LIMITATION OF LIABILITY. UNDER NO CIRCUMSTANCES NOR LEGAL THEORY, WHETHER TORT (INCLUDING, WITHOUT LIMITATION, NEGLIGENCE OR STRICT LIABILITY), CONTRACT, OR OTHERWISE, SHALL SGI OR ANY SGI LICENSOR BE LIABLE FOR ANY DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR

© 2009-2010 Wind River Sysrtems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, LOSS OF DATA, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES.

THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SGI's NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THAT EXCLUSION AND LIMITATION MAY NOT APPLY TO RECIPIENT.

11. Indemnity. Recipient shall be solely responsible for damages arising, directly or indirectly, out of its utilization of rights under this License. Recipient will defend, indemnify and hold harmless Silicon Graphics, Inc. from and against any loss, liability, damages, costs or expenses (including the payment of reasonable attorneys fees) arising out of Recipient's use, modification, reproduction and distribution of the Covered Code or out of any representation or warranty made by Recipient.

12. U.S. Government End Users. The Covered Code is a "commercial item" consisting of "commercial computer software" as such terms are defined in title 48 of the Code of Federal Regulations and all U.S. Government End Users acquire only the rights set forth in this License and are subject to the terms of this License.

13. Miscellaneous. This License represents the complete agreement concerning the its subject matter. If any provision of this License is held to be unenforceable, such provision shall be reformed so as to achieve as nearly as possible the same legal and economic effect as the original provision and the remainder of this License will remain in effect. This License shall be governed by and construed in accordance with the laws of the United States and the State of California as applied to agreements entered into and to be performed entirely within California between California residents.

Any litigation relating to this License shall be subject to the exclusive jurisdiction of the Federal Courts of the Northern District of California (or, absent subject matter jurisdiction in such courts, the courts of the State of California), with venue lying exclusively in Santa Clara County, California, with the losing party responsible for costs, including without limitation, court costs and reasonable attorneys fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation that provides that the language of a contract shall be construed against the drafter shall not apply to this License.

Exhibit A
License Applicability. Except to the extent portions of this file are made subject to an alternative license as permitted in the SGI Free Software License B, Version 1.1 (the "License"), the contents of this file are subject only to the provisions of the License. From:
mhash-0.9.9/mhash-0.9.9/lib/md5.c
This code implements the MD5 message-digest algorithm. The algorithm is due to Ron Rivest. This code was written by Colin Plumb in 1993, no copyright is claimed. This code is in the public domain; do with it what you wish.

Equivalent code is available from RSA Data Security, Inc. This code has been tested against that, and is equivalent, except that you don't need to include two pages of legalese with every copy.

Cairo is free software. Every source file in the implementation of cairo is available to be redistributed and/or modified under the terms of either the GNU Lesser General Public License (LGPL) version 2.1 or the Mozilla Public License (MPL) version 1.1. Some files are available under more liberal terms, but we believe that in all cases, each file may be used under either the LGPL or the MPL.

See the following files in this directory for the precise terms and conditions of either license: COPYING-LGPL-2.1, COPYING-MPL-1.1. Please see each file in the implementation for Copyright and licensing information.

From:
midbrowser_0.3.0b5a-2/midbrowser/legal
Please be apprised of the following Legal Notices:

A) The U.S. District Court for the Eastern District of Virginia has ruled that the Netscape Navigator code does not infringe Wang's U.S. Patent No. 4,751,669 ("the '669 Patent") because: 1) HTML is not Videotex as defined by the '669 patent; 2) web servers are not central suppliers; and 3) Navigator does not "connect," as defined by the '669 Patent, to web servers on the Internet. Wang may appeal this decision to the Federal Circuit. Wang contended that its Patent disclosing a "Videotex" system, is infringed by the following functionality in the Netscape Navigator code: 1) the animated logo and status line indicators See Claims 1,8 and 9; 2) the "File Save As" function See Claims 23-27; 3) Bookmarks and Rename Bookmarks in the Properties window See Claims 20-22; 4) storing HTML, GIF, and JPEG files and adding filename extensions See Claim 38

B) Intermind owns pending U.S. patent applications on communications systems which employ metadata ("channel objects") to define a control structure for information transfer. The Netscape code does not infringe as released; however, modifications which utilize channel objects as described by Intermind should be considered carefully. The following is a statement from Intermind: "Intermind's claims fundamentally involve the use of a control structure to automate communications. ...The essence of Intermind's top claim is that two devices sender and receiver have persistent storage, communicate over a network, and exchange a control structure including metadata which describes: 1) what information is to be updated, 2) when to update this information, and 3) how to transfer the updated information. In addition, at least the receiving device must be able to process the metadata in order to perform the update determination and transfer. Any digital communications system which incorporates all of these elements will be covered by Intermind's patents." See Intermind.com.

C) Stac, Inc., and its licensing agent Hi/fn, own several patents which disclose data compression methods implementing an LZS compression algorithm, including U.S. Patent Nos. 4,701,745 and 5,016, 009 ("the Stac Patents"). The Netscape Communicator code does not perform compression. If you modify the Netscape source code to perform compression, please take notice of the Stac Patents.

D) Netscape Communications Corporation ("Netscape") does not guarantee that any source code or executable code available from the mozilla.org domain is Year 2000 compliant.

MOZILLA FIREFOX END-USER SOFTWARE LICENSE AGREEMENT "Version 2.0"

A SOURCE CODE VERSION OF CERTAIN FIREFOX BROWSER FUNCTIONALITY THAT YOU MAY USE, MODIFY AND DISTRIBUTE IS AVAILABLE TO YOU FREE-OF-CHARGE FROM WWW.MOZILLA.ORG UNDER THE MOZILLA PUBLIC LICENSE and other open source software licenses.

The accompanying executable code version of Mozilla Firefox and related documentation (the “Product”) is made available to you under the terms of this MOZILLA FIREFOX END-USER SOFTWARE LICENSE

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

AGREEMENT (THE “AGREEMENT”). BY CLICKING THE “ACCEPT” BUTTON, OR BY INSTALLING OR USING THE MOZILLA FIREFOX BROWSER, YOU ARE CONSENTING TO BE BOUND BY THE AGREEMENT. IF YOU DO NOT AGREE TO THE TERMS AND CONDITIONS OF THIS AGREEMENT, DO NOT CLICK THE “ACCEPT” BUTTON, AND DO NOT INSTALL OR USE ANY PART OF THE MOZILLA FIREFOX BROWSER.

DURING THE MOZILLA FIREFOX INSTALLATION PROCESS, AND AT LATER TIMES, YOU MAY BE GIVEN THE OPTION OF INSTALLING ADDITIONAL COMPONENTS FROM THIRD-PARTY SOFTWARE PROVIDERS. THE INSTALLATION AND USE OF THOSE THIRD-PARTY COMPONENTS MAY BE GOVERNED BY ADDITIONAL LICENSE AGREEMENTS.

1. LICENSE GRANT. The Mozilla Corporation grants you a non-exclusive license to use the executable code version of the Product. This Agreement will also govern any software upgrades provided by Mozilla that replace and/or supplement the original Product, unless such upgrades are accompanied by a separate license, in which case the terms of that license will govern.

2. TERMINATION. If you breach this Agreement your right to use the Product will terminate immediately and without notice, but all provisions of this Agreement except the License Grant (Paragraph 1) will survive termination and continue in effect. Upon termination, you must destroy all copies of the Product.

3. PROPRIETARY RIGHTS. Portions of the Product are available in source code form under the terms of the Mozilla Public License and other open source licenses (collectively, “Open Source Licenses”) at http://mozilla.org. Nothing in this Agreement will be construed to limit any rights granted under the Open Source Licenses. Subject to the foregoing, Mozilla, for itself and on behalf of its licensors, hereby reserves all intellectual property rights in the Product, except for the rights expressly granted in this Agreement. You may not remove or alter any trademark, logo, copyright or other proprietary notice in or on the Product. This license does not grant you any right to use the trademarks, service marks or logos of Mozilla or its licensors.

4. PRIVACY POLICY. You agree to the Mozilla Firefox Privacy Policy, made available online at http://www.mozilla.com/firefox/privacy/, as that policy may be changed from time to time. When Mozilla changes the policy in a material way a notice will be posted on the website at www.mozilla.com and when any change is made in the privacy policy, the updated policy will be posted at the above link. It is your responsibility to ensure that you understand the terms of the privacy policy, so you should periodically check the current version of the policy for changes.

5. DISCLAIMER OF WARRANTY. THE PRODUCT IS PROVIDED “AS IS” WITH ALL FAULTS. TO THE EXTENT PERMITTED BY LAW, MOZILLA AND MOZILLAÕS DISTRIBUTORS, AND LICENSORS HEREBY DISCLAIM ALL WARRANTIES, WHETHER EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION WARRANTIES THAT THE PRODUCT IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR PURPOSE AND NON-INFRINGING. YOU BEAR THE ENTIRE RISK AS TO SELECTING THE PRODUCT FOR YOUR PURPOSES AND AS TO THE QUALITY AND PERFORMANCE OF THE PRODUCT. THIS LIMITATION WILL APPLY NOTWITHSTANDING THE FAILURE OF ESSENTIAL PURPOSE OF ANY REMEDY. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF IMPLIED WARRANTIES, SO THIS DISCLAIMER MAY NOT APPLY TO YOU.

6. LIMITATION OF LIABILITY. EXCEPT AS REQUIRED BY LAW, MOZILLA AND ITS DISTRIBUTORS, DIRECTORS, LICENSORS, CONTRIBUTORS AND AGENTS (COLLECTIVELY, THE “MOZILLA GROUP”) WILL NOT BE LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL OR EXEMPLARY DAMAGES ARISING OUT OF OR IN ANY WAY RELATING TO THIS AGREEMENT OR THE USE OF OR INABILITY TO USE THE PRODUCT, INCLUDING WITHOUT LIMITATION DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, LOST PROFITS, LOSS OF DATA, AND COMPUTER FAILURE OR MALFUNCTION, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES AND REGARDLESS OF THE THEORY (CONTRACT, TORT OR OTHERWISE) UPON WHICH SUCH CLAIM IS BASED. THE MOZILLA GROUPÕS COLLECTIVE LIABILITY UNDER THIS AGREEMENT WILL NOT EXCEED THE GREATER OF $500 (FIVE HUNDRED DOLLARS) AND THE FEES PAID BY YOU UNDER THE LICENSE (IF ANY). SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

7. EXPORT CONTROLS. This license is subject to all applicable export restrictions. You must comply with all export and import laws and restrictions and regulations of any United States or foreign agency or authority relating to the Product and its use.

8. U.S. GOVERNMENT END-USERS. This Product is a “commercial item,” as that term is defined in 48 C.F.R. 2.101, consisting of “commercial computer software” and “commercial computer software documentation,” as such terms are used in 48 C.F.R. 12.212 (Sept. 1995) and 48 C.F.R. 227.7202 (June 1995). Consistent with 48 C.F.R. 12.212, 48 C.F.R. 27.405(b)(2) (June 1998) and 48 C.F.R. 227.7202, all U.S. Government End Users acquire the Product with only those rights as set forth therein.

9. MISCELLANEOUS.
(a) This Agreement constitutes the entire agreement between Mozilla and you concerning the subject matter hereof, and it may only be modified by a written amendment signed by an authorized executive of Mozilla.

(b) Except to the extent applicable law, if any, provides otherwise, this Agreement will be governed by the laws of the state of California, U.S.A., excluding its conflict of law provisions.

(c) This Agreement will not be governed by the United Nations Convention on Contracts for the International Sale of Goods.

(d) If any part of this Agreement is held invalid or unenforceable, that part will be construed to reflect the parties original intent, and the remaining portions will remain in full force and effect.

(e) A waiver by either party of any term or condition of this Agreement or any breach thereof, in any one instance, will not waive such term or condition or any subsequent breach thereof.

(f) Except as required by law, the controlling language of this Agreement is English.

(g) You may assign your rights under this Agreement to any party that consents to, and agrees to be bound by, its terms; the Mozilla Corporation may assign its rights under this Agreement without condition.

(h) This Agreement will be binding upon and inure to the benefit of the parties, their successors and permitted assigns.

This package was debianized by Alexander Sack <asac@ubuntu.com> Fri, 20 Jul 2007 12:00:00 +0200. The orig.tar.gz content was exported from git repo at http://people.ubuntu.com/~asac/git-repo/mobile.browser.1.8.git/
Commit: cf9e94f464d130d68bca5d7b178ce770e30d
Date: 20 Jul 2007
Other works include gzip, bzip2, sqlite, libjpeg, libpng, cairo, and others. Please see the sections following the copyright statements for firefox for these.

Midbrowser is based on firefox source base and uses the same licensing scheme as firefox. Overall, the firefox project is licensed under the terms of the Mozilla Public License version 1.1 or, at your option, under the terms of the GNU eneral Public License version 2 or subsequent, or the terms of the GNU Lesser General Public License version 2.1 or subsequent. On Debian systems, the complete text of the GNU General Public License can be found in the file `/usr/share/common-licenses/GPL'; the complete text of the GNU Lesser General Public License can be found in the file `/usr/share/common-licenses/LGPL'. The complete text of the Mozilla Public License can be found in the MPL file in the same directory as this file.

Some files may still contain licensing notices claiming licensing under other combinations of NPL, MPL, GPL and LGPL. They are files that were missed by the upstream relicensing script, but all the permissions required for relicensing were indeed provided. The file db/mork/src/morkQuickSort.cpp is licensed under the following terms:

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

This software is
copyright (C) 1991-1998, Thomas G. Lane. All Rights Reserved except as specified below.

Permission is hereby granted to use, copy, modify, and distribute this software (or portions thereof) for any purpose, without fee, subject to these conditions:

(1) If any part of the source code for this software is distributed, then this README file must be included, with this copyright and no-warranty notice unaltered; and any additions, deletions, or changes to the original files must be clearly indicated in accompanying documentation.

(2) If only executable code is distributed, then the accompanying documentation must state that "this software is based in part on the work of the Independent JPEG Group".

(3) Permission for use of this software is granted only if the user accepts full responsibility for any undesirable consequences; the authors accept NO LIABILITY for damages of any kind.

These conditions apply to any software derived from or based on the IJG code, not just to the unmodified library. If you use our work, you ought to acknowledge us.

Permission is NOT granted for the use of any IJG author's name or company name in advertising or publicity relating to this software or products derived from it. This software may be referred to only as "the Independent JPEG Group's software".

We specifically permit and encourage the use of this software as the basis of commercial products, provided that all warranty or liability claims are assumed by the product vendor.

W3C Intellectual Rights Notice and Legal Disclaimers
This page includes notices and disclaimers related to:
Copyright 1994-2009 W3C (Massachusetts Institute of Technology, European Research Consortium for Informatics and Mathematics, Keio University), All Rights Reserved.

World Wide Web Consortium (W3C) web site pages may contain other proprietary notices and copyright information, the terms of which must be observed and followed. Specific notices do exist for W3C documents and software. Also, there are specific usage policies associated with some of the W3C Icons. Please see our Intellectual Rights FAQ for common questions about using materials from our site.

Notice and Disclaimers
1. Unless otherwise noted, all materials contained in this Site are copyrighted and may not be used except as provided in these terms and conditions or in the copyright notice (documents and software) or other proprietary notice provided with the relevant materials.

2. The materials contained in the Site may be downloaded or copied provided that ALL copies retain the copyright and any other proprietary notices contained on the materials. No material may be modified, edited or taken out of context such that its use creates a false or misleading statement or impression as to the positions, statements or actions of W3C.

3. The name and trademarks of copyright holders may NOT be used in advertising or publicity pertaining to the Web site, its content, specifications, or software without specific, written prior permission. Title to copyright in Web site documents will at all times remain with copyright holders. Use of W3C trademarks and service marks is covered by the W3C Trademark and Servicemark License.

4. Caches of W3C materials should comply with the "maximum time to live" information provided with the materials. After such materials have expired they should not be served from caches without first validating the contents of the W3C Site. Organizations that want to mirror W3C content must abide by the W3C Mirroring Policy.

W3CTrademarks and Generic Terms
Trademarks owned by W3C host institutions on behalf of W3C and generic terms used by the W3C

5. The trademarks, logos, and service marks (collectively the "Trademarks") displayed on the Site are registered and unregistered Trademarks of the Massachusetts Institute of Technology (MIT), European Research Consortium for Informatics and Mathematics (ERCIM), or Keio University (Keio). All use of the W3C Trademarks is governed by the W3C Trademark and Servicemark License. No additional rights are granted by implication, estoppel, or otherwise. Terms which claimed as generic are not governed by any W3C license and are used as common descriptors by the W3C.

The following is a list of W3C terms claimed as a trademark or generic term by MIT, ERCIM, and/or Keio on behalf of the W3C:
W3C, World Wide Web Consortium (registered in numerous countries)
Amaya™, a Web Browser/Editor
ACSS (generic), Aural Cascading Style Sheets
CSS (generic), Cascading Style Sheets Specification
DOM (generic), Document Object Model
DSig (generic), Digital Signature Initiative
HTML (generic), HyperText Markup Language

© 2009-2010 Wind River Sysrtems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

HTTP (generic), Hypertext Transfer Protocol
JEP (generic)I, Joint Electronic Payment Initiative
Jigsaw™, Java Web Server
MathML (generic), Mathematical Markup Language
Metadata (generic)
P3P, Platform for Privacy Preferences Project
PICS (generic), Platform for Internet Content Selection
PICSRules (generic), Rules Language for PICS
RDF (generic), Resource Description Framework
SMIL (generic), Synchronized Multimedia Integration Language
SVG (generic), Scalable Vector Graphics
WAI™, Web Accessibility Initiative
WebFonts (generic)
XENC (generic), XML Encryption
XHTML (generic), The Extensible HyperText Markup Language
XML (generic), Extensible Markup Language
XMLDSIG (generic), XML Signatures
XSL (generic), Extensible Stylesheet Language

The absence of a product or service name or logo from this list does not constitute a waiver of MIT's, ERCIM's, or Keio's trademark, ability to use a generic term, or other intellectual rights concerning that name or logo. Any questions concerning the use, status, or standing of W3C trademarks should be directed to: site-policy@w3.org or to W3C, Computer Science and Artificial Intelligence Laboratory, Massachusetts Institute of Technology, 77 Massachusetts Ave., Cambridge, MA 02139 USA.

Non-W3C Trademarks; Member Trademarks
The trademarks, logos, and service marks not owned on behalf of the W3C and that are displayed on the Site are the registered and unregistered marks of their respective owners. No rights are granted by the W3C to use such marks, whether by implication, estoppel, or otherwise.

"METADATA" is a trademark of the Metadata Company. W3C uses the term "metadata" in a descriptive sense, meaning "data about data". W3C is not in any way affiliated with the Metadata Company.

Legal Disclaimers
6. W3C has not reviewed any or all of the web sites linked to this Site and is not responsible for the content of any off-site pages or any other web sites linked to this Site. Please understand that any non-W3C web site is independent from W3C, and W3C has no control over the content on that web site. In addition, a link to a non-W3C web site does not mean that W3C endorses or accepts any responsibility for the content, or the use, of such site. It is the user's responsibility to take precautions to ensure that whatever is selected is free of such items as viruses, worms, Trojan horses and other items of a destructive nature.

7. Information W3C publishes on its Site may contain references or cross references to W3C specifications, projects, programs and services that are not announced or available in your country. Such references do not imply that W3C intends to announce such specifications, projects, programs or services in your country.

8. Information on this Site may contain technical inaccuracies or typographical errors. Information may be changed or updated without notice. W3C may make improvements and/or changes in the materials contained in or described on this site at any time without notice. W3C may also make changes in these Terms and Conditions without notice. User is bound by such revisions and should therefore periodically visit this page to review the then current Terms and Conditions.

9. Limitation on Warranties.
ALL MATERIALS ON THE W3C SITE ARE PROVIDED "AS IS." W3C, MIT, ERCIM, AND KEIO MAKE NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE OR NON-INFRINGEMENT. AS TO DOCUMENTS AND GRAPHICS PUBLISHED ON THIS SITE, W3C, MIT, ERCIM, AND KEIO MAKE NO REPRESENTATION OR WARRANTY THAT THE CONTENTS OF SUCH DOCUMENT OR GRAPHICS ARE FREE FROM ERROR OR SUITABLE FOR ANY PURPOSE; NOR THAT IMPLEMENTATION OF SUCH CONTENTS WILL NOT INFRINGE ANY THIRD PARTY PATENTS, COPYRIGHTS, TRADEMARKS OR OTHER RIGHTS.

Please note that some jurisdictions may not allow the exclusion of implied warranties, so some of the above exclusions may not apply to you.

10. Limitation on Liability.
IN NO EVENT WILL W3C, MIT, ERCIM, AND KEIO BE LIABLE TO ANY PARTY FOR ANY DIRECT, INDIRECT, SPECIAL OR CONSEQUENTIAL DAMAGES FOR ANY USE OF THIS SITE, OR ON ANY OTHER HYPERLINKED WEB SITE, INCLUDING, WITHOUT LIMITATION, ANY LOST PROFITS, BUSINESS INTERRUPTION, LOSS OF PROGRAMS OR OTHER DATA ON YOUR INFORMATION HANDLING SYSTEM OR OTHERWISE, EVEN IF W3C, MIT, ERCIM, OR KEIO IS EXPRESSLY ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Academic Free License v. 2.1
Copyright (c) 2005 Bob Ippolito. All rights reserved.

This Academic Free License (the "License") applies to any original work of authorship (the "Original Work") whose owner (the "Licensor") has placed the following notice immediately following the copyright notice for the Original Work:

Licensed under the Academic Free License version 2.1
1) Grant of Copyright License. Licensor hereby grants You a world-wide, royalty-free, non-exclusive, perpetual, sublicenseable license to do the following:

a) to reproduce the Original Work in copies;

b) to prepare derivative works ("Derivative Works") based upon the Original Work;

c) to distribute copies of the Original Work and Derivative Works to the public;

d) to perform the Original Work publicly; and

e) to display the Original Work publicly.

2) Grant of Patent License. Licensor hereby grants You a world-wide, royalty-free, non-exclusive, perpetual, sublicenseable license, under patent claims owned or controlled by the Licensor that are embodied in the Original Work as furnished by the Licensor, to make, use, sell and offer for sale the Original Work and Derivative Works.

3) Grant of Source Code License. The term "Source Code" means the preferred form of the Original Work for making modifications to it and all available documentation describing how to modify the Original Work. Licensor hereby agrees to provide a machine-readable copy of the Source Code of the Original Work along with each copy of the Original Work that Licensor distributes. Licensor reserves the right to satisfy this obligation by placing a machine-readable copy of the Source Code in an information repository reasonably calculated to permit inexpensive and convenient access by You for as long as Licensor continues to distribute the Original Work, and by publishing the address of that information repository in a notice immediately following the copyright notice that applies to the Original Work.

4) Exclusions From License Grant. Neither the names of Licensor, nor the names of any contributors to the Original Work, nor any of their trademarks or service marks, may be used to endorse or promote products derived from this Original Work without express prior written permission of the Licensor. Nothing in this License shall be deemed to grant any rights to trademarks, copyrights, patents, trade secrets or any other intellectual property of Licensor except as expressly stated herein.

No patent license is granted to make, use, sell or offer to sell embodiments of any patent claims other than the licensed claims defined in Section 2. No right is granted to the trademarks of Licensor even if such marks are included in the Original Work. Nothing in this License shall be interpreted to prohibit Licensor from licensing under different terms from this License any Original Work that Licensor otherwise would have a right to license.

5) This section intentionally omitted.

6) Attribution Rights. You must retain, in the Source Code of any Derivative Works that You create, all copyright, patent or trademark notices from the Source Code of the Original Work, as well as any notices of licensing and any descriptive text identified therein as an "Attribution Notice." You must cause the Source Code for any Derivative Works that You create to carry a prominent Attribution Notice reasonably calculated to inform recipients that You have modified the Original Work.

7) Warranty of Provenance and Disclaimer of Warranty. Licensor warrants that the copyright in and to the Original Work and the patent rights granted herein by Licensor are owned by the Licensor or are sublicensed to You under the terms of this License with the permission of the contributor(s) of those copyrights and patent rights.

Except as expressly stated in the immediately proceeding sentence, the Original Work is provided under this License on an "AS IS" BASIS and WITHOUT WARRANTY, either express or implied, including, without limitation, the warranties of NON-INFRINGEMENT, MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY OF THE ORIGINAL WORK IS WITH YOU. This DISCLAIMER OF WARRANTY constitutes an essential part of this License. No license to Original Work is granted hereunder except under this disclaimer.

8) Limitation of Liability. Under no circumstances and under no legal theory, whether in tort (including negligence), contract, or otherwise, shall the Licensor be liable to any person for any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or the use of the Original Work including, without limitation, damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses. This limitation of liability shall not apply to liability for death or personal injury resulting from Licensor's negligence to the extent applicable law prohibits such limitation. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so this exclusion and limitation may not apply to You.

9) Acceptance and Termination. If You distribute copies of the Original Work or a Derivative Work, You must make a reasonable effort under the circumstances to obtain the express assent of recipients to the terms of this License. Nothing else but this License (or another written agreement between Licensor and You) grants You permission to create Derivative Works based upon the Original Work or to exercise any of the rights granted in Section 1 herein, and any attempt to do so except under the terms of this License (or another written agreement between Licensor and You) is expressly prohibited by U.S. copyright law, the equivalent laws of other countries, and by international treaty. Therefore, by exercising any of the rights granted to You in Section 1 herein, You indicate Your acceptance of this License and all of its terms and conditions.

10) Termination for Patent Action. This License shall terminate automatically and You may no longer exercise any of the rights granted to You by this License as of the date You commence an action, including a cross-claim or counterclaim, against Licensor or any licensee alleging that the Original Work infringes a patent. This termination provision shall

© 2009-2010 Wind River Sysrtems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

not apply for an action alleging patent infringement by combinations of the Original Work with other software or hardware.

11) Jurisdiction, Venue and Governing Law. Any action or suit relating to this License may be brought only in the courts of a jurisdiction wherein the Licensor resides or in which Licensor conducts its primary business, and under the laws of that jurisdiction excluding its conflict-of-law provisions. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any use of the Original Work outside the scope of this License or after its termination shall be subject to the requirements and penalties of the U.S. Copyright Act, 17 U.S.C. § 101 et seq., the equivalent laws of other countries, and international treaty. This section shall survive the termination of this License.

12) Attorneys Fees. In any action to enforce the terms of this License or seeking damages relating thereto, the prevailing party shall be entitled to recover its costs and expenses, including, without limitation, reasonable attorneys' fees and costs incurred in connection with such action, including any appeal of such action. This section shall survive the termination of this License.

13) Miscellaneous. This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

14) Definition of "You" in This License. "You" throughout this License, whether in upper or lower case, means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, "You" includes any entity that controls, is controlled by, or is under common control with you. For purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

15) Right to Use. You may use the Original Work in all ways not otherwise restricted or conditioned by this License or by law, and Licensor promises not to interfere with or be responsible for such uses by You.

midbrowser_0.3.0b5a-2/midbrowser/extensions/spellcheck/locales/en-US/hunspell/README.txt
COPYRIGHT, SOURCES, and CREDITS:
The en_US and en_CA dictionaries come directly from SCOWL (up to level 60) and is thus under the same copyright of SCOWL. The affix file is a heavily modified version of the original english.aff file which was released as part of Geoff Kuenning's Ispell and as such is covered by his BSD license. Part of SCOWL is also based on Ispell thus the Ispell copyright is included with the SCOWL copyright. The collective work is **Copyright 2000-2007 by Kevin Atkinson** as well as any of the copyrights mentioned below:

Copyright 2000-2007 by Kevin Atkinson

Permission to use, copy, modify, distribute and sell these word lists, the associated scripts, the output created from the scripts, and its documentation for any purpose is hereby granted without fee, provided that the above copyright notice appears in all copies and that both that copyright notice and this permission notice appear in supporting documentation. Kevin Atkinson makes no representations about the suitability of this array for any purpose. It is provided "as is" without express or implied warranty.

Alan Beale <biljir@pobox.com> also deserves special credit as he has, in addition to providing the 12Dicts package and being a major contributor to the ENABLE word list, given me an incredible amount of feedback and created a number of special lists (those found in the Supplement) in order to help improve the overall quality of SCOWL.

The 10 level includes the 1000 most common English words (according to the Moby (TM) Words II [MWords] package), a subset of the 1000 most common words on the Internet (again, according to Moby Words II), and frequently class 16 from Brian Kelk's "UK English Wordlist with Frequency Classification".

The MWords package was explicitly placed in the public domain:
The Moby lexicon project is complete and has been place into the public domain. Use, sell, rework, excerpt and use in any way on any platform. Placing this material on internal or public servers is also encouraged. The compiler is not aware of any export restrictions so freely distribute world-wide.

You can verify the public domain status by contacting Grady Ward, 3449 Martha Ct., Arcata, CA 95521-4884
grady@netcom.com grady@northcoast.com

The "UK English Wordlist With Frequency Classification" is also in the Public Domain:
Date: Sat, 08 Jul 2000 20:27:21 +0100
From:
Brian Kelk <Brian.Kelk@cl.cam.ac.uk>

I was wondering what the copyright status of your "UK English Wordlist With Frequency Classification" word list as it seems to be lacking any copyright notice.

There were many many sources in total, but any text marked "copyright" was avoided. Locally-written documentation was one source. An earlier version of the list resided in a filespace called PUBLIC on the University mainframe, because it was considered public domain.

Date: Tue, 11 Jul 2000 19:31:34 +0100
So are you saying your word list is also in the public domain?
That is the intention.

The 20 level includes frequency classes 7-15 from Brian's word list. The 35 level includes frequency classes 2-6 and words appearing in at least 11 of 12 dictionaries as indicated in the 12Dicts package. All words from the 12Dicts package have had likely inflections added via my inflection database. The 12Dicts package and Supplement is in the Public Domain.

The WordNet database, which was used in the creation of the Inflections database, is under the following copyright:

This software and database is being provided to you, the LICENSEE, by **Princeton University** under the following license. By obtaining, using and/or copying this software and database, you agree that you have read, understood, and will comply with these terms and conditions.:

Permission to use, copy, modify and distribute this software and database and its documentation for any purpose and without fee or royalty is hereby granted, provided that you agree to comply with the following copyright notice and statements, including the disclaimer, and that the same appear on ALL copies of the software, database and documentation, including modifications that you make for internal use or for distribution.

WordNet 1.6

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

appearing in at least 5 of 12 of the dictionaries as indicated in the 12Dicts package, and uppercase words in at least 4 of the previous 12 dictionaries. A decent number of proper names is also included: The top 1000 male, female, and Last names from the 1990 Census report; a list of names sent to me by Alan Beale; and a few names that I added myself. Finally a small list of abbreviations not commonly found in other word lists is included. The name files form the Census report is a government document which I don't think can be copyrighted.

The file special-jargon.50 uses common.lst and word.lst from the "Unofficial Jargon File Word Lists" which is derived from "The Jargon File". All of which is in the Public Domain. This file also contain a few extra UNIX terms which are found in the file "unix-terms" in the special/ directory. The 55 level includes words from Alan's 2of4brif list found in version 4.0 of his 12dicts package. Like his other stuff the 2of4brif is also in the public domain. The 60 level includes Brian's frequency class 0 and all words appearing in at least 2 of the 12 dictionaries as indicated by the 12Dicts package. A large number of names are also included: The 4,946 female names and the 3,897 male names from the MWords package.

The 70 level includes the 74,550 common dictionary words and the 21,986 names list from the MWords package The common dictionary words, like those from the 12Dicts package, have had all likely inflections added. The 70 level also included the 5desk list from version 4.0 of the 12Dics package which is the public domain. The 80 level includes the ENABLE word list, all the lists in the ENABLE supplement package (except for ABLE), the "UK Advanced Cryptics Dictionary" (UKACD), the list of signature words in from YAWL package, and the 10,196 places list from the MWords package.

The ENABLE package, mainted by M/Cooper
<thegrendel@theriver.com>, is in the Public Domain:

The ENABLE master word list, WORD.LST, is herewith formally released into the Public Domain. Anyone is free to use it or distribute it in any manner they see fit. No fee or registration is required for its use nor are "contributions" solicited (if you feel you absolutely must contribute something for your own peace of mind, the authors of the ENABLE list ask that you make a donation on their behalf to your favorite charity). This word list is our gift to the Scrabble community, as an alternate to "official" word lists. Game designers may feel free to incorporate the WORD.LST into their games. Please mention the source and credit us as originators of the list. Note that if you, as a game designer, use the WORD.LST in your product, you may still copyright and protect your product, but you may not legally copyright or in any way restrict redistribution of the WORD.LST portion of your product. This may under law restrict your rights to restrict your users' rights, but that is only fair.

UKACD, by J Ross Beresford <ross@bryson.demon.co.uk>, is under the following copyright:
Copyright (c) J Ross Beresford 1993-1999. All Rights Reserved.

The following restriction is placed on the use of this publication: if The UK Advanced Cryptics Dictionary is used in a software package or redistributed in any form, the copyright notice must be prominently displayed and the text of this document must be included verbatim. There are no other restrictions: I would like to see the list distributed as widely as possible.

The 95 level includes the 354,984 single words and 256,772 compound words from the MWords package, ABLE.LST from the ENABLE Supplement, and some additional words found in my part-of-speech database that were not found anywhere else.

Accent information was taken from UKACD. My VARCON package was used to create the American, British, and Canadian word list. Since the original word lists used used in the VARCON package came from the Ispell distribution they are under the Ispell copyright:

URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/9/Fedora/source/SRPMS/minicom-2.3-2.fc9.src.rpm
Group:	Applications/Communications
Description:	A text-based modem control and terminal emulation program. minicom is a communication program which somewhat resembles the shareware program TELIX but is free with source code and runs under most unices. Features include dialing directory with auto-redial, support for UUCP-style lock files on serial devices, a separate script language interpreter, capture to file, multiple users with individual configurations, and more.
Common Usage:	Utility
Package Size:	4.7 MB

Copyright (C) 1998, 2001, 2002, 2003 Free Software Foundation, Inc.

This file contains parts of sha1.c, bithelp.h, g10lib.h, and misc.c from the Libgcrypt software library package. It has been modified to provide standalone SHA-1 functionality. Libgcrypt is licensed under the LGPL. See Libgcrypt home page for more information and complete library: http://directory.fsf.org/security/libgcrypt.html

HMAC-SHA1 functionality has been added. This is a modified version of HMAC-MD5 example in RFC2104 (code not from libgcrypt), and has been tested with HMAC-SHA1 test cases as described in RFC2202. Also, random_bytes() function was added. These random bytes should be good enough for MIPv6 use (no guarantees though). Use Libgcrypt or OpenSSL, if you need better.

mklibs r60232

Software:	mklibs
Version:	r60232
File or Package:	mklibs-r60232.tar.bz2
OSI Licenses:	
Other Licenses:	

© 2009-2010 Wind River Sysrtems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

URL:	
Group:	
Description:	Shared library reduction script; mklibs produces cut-down shared libraries that contain only the routines required by a particular set of executables. This is useful when building closed systems where disk space is at a premium, such as the Debian installer.
Common Usage:	Library
Package Size:	
Folders / Files:	
Source Path:	wrlinux-4.0/layers/wrll-toolchain-4.4-250/common/packages
Notes:	The following software is intended to be used as a host utility to facilitate development of a target runtime image. If you choose to include it on a target runtime image, you may be subject to additional open source license compliance considerations. It is recommend you consult with your legal counsel for guidance and advice on your particular situation.

mktemp 1.5-25

Software:	mktemp
Version:	1.5-25
File or Package:	mktemp-1.5-25.fc7.src.rpm
OSI Licenses:	GPLv2+ w/exception, BSDv1, BSDv2
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/8/Fedora/source/SRPMS/mktemp-1.5-25.fc7.src.rpm
Group:	System Environment/Base
Description:	A small utility for safely making /tmp files. The mktemp utility takes a given file name template and overwrites a portion of it to create a unique file name. This allows shell scripts and other programs to safely create and use /tmp files. Install the mktemp package if you need to use shell scripts or other programs which will create and use unique /tmp files.
Common Usage:	Utility
Package Size:	480 KB (0.48 MB)
Folders / Files:	3 / 26
Source Path:	wrlinux-4.0/layers/wrll-userspace/core/packages

NOTICES:

mpatrol 1.4.8

Software:	mpatrol
Version:	1.4.8
File or Package:	mpatrol_1.4.8.tar.gz
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2, LGPLv2+, MIT/X11
Other Licenses:	Custom
URL:	http://voxel.dl.sourceforge.net/sourceforge/mpatrol/mpatrol_1.4.8.tar.gz
Group:	Development/Tools
Description:	application memory usage trace utility; mpatrol is a memory handling library developed by Graeme S. Roy. It serves as a memory debugger in that it allows the programmer to detect memory access errors and memory leaks.
Common Usage:	utility
Package Size:	17.4 MB
Folders / Files:	38 / 314
Source Path:	wrlinux-4.0/layers/wrll-analysis-1.0/packages

NOTICES:

From:
mpfr-2.3.1/mpfr-2.3.1/ansi2knr.c
Copyright (C) 1989, 2000 Aladdin Enterprises. All rights reserved.

ansi2knr is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY. No author or distributor accepts responsibility to anyone for the consequences of using it or for whether it serves any particular purpose or works at all, unless he says so in writing. Refer to the GNU General Public License (the "GPL") for full details.

Everyone is granted permission to copy, modify and redistribute ansi2knr, but only under the conditions described in the GPL. A copy of this license is supposed to have been given to you along with ansi2knr so you can know your rights and responsibilities. It should be in a file named COPYLEFT, or, if there is no file named COPYLEFT, a file named COPYING. Among other things, the copyright notice and this notice must be preserved on all copies.

We explicitly state here what we believe is already implied by the GPL: if the ansi2knr program is distributed as a separate set of sources and a separate executable file which are aggregated on a storage medium together with another program, this in itself does not bring the other program under the GPL, nor does the mere fact that such a program or the procedures for constructing it invoke the ansi2knr executable bring any other part of the program under the GPL.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

This code was altered September 2001
Changes are **Copyright (c) Erik Andersen** <andersen@codepoet.org>

In compliance with (2) above, this is hereby marked as an altered version of this software. It has been altered as follows:
*) Listing a directory now mimics the behavior of 'ls -l'
*) Support for recursive listing has been added
*) Without options, does a recursive 'ls' on the whole filesystem
*) option parsing now uses getopt()
*) Now uses printf, and error messages go to stderr.
*) The copyright notice has been cleaned up and reformatted
*) The code has been reformatted
*) Several twisty code paths have been fixed so I can understand them.
-Erik, 1 September 2001

*) Made it show major/minor numbers for device nodes
*) Made it show symlink targets
-Erik, 13 September 2001

crc32.h and crc32.c were copied from mtd-utils and amended.
ubifs-media.h is fs/ubifs/ubifs-media.h from the linux kernel
ubifs.h is a selection of definitions from fs/ubifs/ubifs.h from the linux kernel.
key.h is copied from fs/ubifs/key.h from the linux kernel.
defs.h is a bunch of definitions to smooth things over.
lpt.c is a selection of functions copied from fs/ubifs/lpt.c from the linux kernel, and amended.
hashtable/ was downloaded from
http://www.cl.cam.ac.uk/~cwc22/hashtable/

This code was taken from the AX.25 HDLC packet driver in LINUX.

mtools 3.9.11

Software:	mtools
Version:	3.9.11
File or Package:	mtools-3.9.11.tar.bz2
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2+
Other Licenses:	Custom
URL:	
Group:	Applications/System
Description:	Mtools is a public domain collection of tools to allow Unix systems to manipulate MS-DOS files: read, write, and move around files on an MS-DOS filesystem (typically a floppy disk). Where reasonable, each program attempts to emulate the MS-DOS equivalent command. However, unnecessary restrictions and oddities of DOS are not emulated. Mtools is sufficient to give access to MS-DOS filesystems.
Common Usage:	tool
Package Size:	1.8 MB
Folders / Files:	3 / 160
Source Path:	wrlinux-4.0/layers/ldat-tools/installer/packages

mutagen 1.11

Software:	mutagen
Version:	1.11
File or Package:	mutagen_1.11.orig.tar.gz
OSI Licenses:	GPLv2
Other Licenses:	Custom
URL:	http://us.archive.ubuntu.com/ubuntu/pool/main/m/mutagen/mutagen_1.11.orig.tar.gz
Group:	Python
Description:	Mutagen is a Python module to handle audio metadata. It supports ASF, FLAC, M4A, Monkey's Audio, MP3, Musepack, Ogg FLAC, Ogg Speex, Ogg Theora, Ogg Vorbis, True Audio, WavPack and OptimFROG audio files. All versions of ID3v2 are supported, and all standard ID3v2.4 frames are parsed. It can read Xing headers to accurately calculate the bitrate and length of MP3s. ID3 and APEv2 tags can be edited regardless of audio format. It can also manipulate Ogg streams on an individual packet/page level.
Common Usage:	library
Package Size:	1.9 MB

mysql-5.0.45/mysql-5.0.45/debian/copyright

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

The Debian package of MySQL was first debianzed on 1997-04-12 by Christian Schwarz <schwarz@debian.org> and ist maintained since 1999-04-20 by Christian Hammers <ch@debian.org>. It can be downloaded from http://www.mysql.com/

Copyright: According to the file "COPYING" all parts of this package are licenced under the terms of the GNU GPL Version 2 of which a copy is available in /usr/share/common-licenses. To allow free software with other licences than the GPL to link against the shared library, special terms for "derived works" are defined in the file "EXCEPTIONS-CLIENT" which is quoted below. More information can be found on http://www.mysql.com/company/legal/licensing/ The manual had to be removed as it is not free in the sense of the Debian Free Software Guidelines (DFSG).

Appendix I MySQL FLOSS License Exception Version 0.3, 10 February 2005

The MySQL AB Exception for Free/Libre and Open Source Software-only Applications Using MySQL Client Libraries (the "FLOSS Exception").

Exception Intent - We want specified Free/Libre and Open Source Software ("FLOSS") applications to be able to use specified GPL-licensed MySQL client libraries (the "Program") despite the fact that not all FLOSS licenses are compatible with version 2 of the GNU General Public License (the "GPL").

Legal Terms and Conditions - As a special exception to the terms and conditions of version 2.0 of the GPL:

1. You are free to distribute a Derivative Work that is formed entirely from the Program and one or more works (each, a "FLOSS Work") licensed under one or more of the licenses listed below in section 1, as long as:

> a. You obey the GPL in all respects for the Program and the Derivative Work, except for identifiable sections of the Derivative Work which are not derived from the Program, and which can reasonably be considered independent and separate works in themselves,
>
> b. all identifiable sections of the Derivative Work which are not derived from the Program, and which can reasonably be considered independent and separate works in themselves,
>
> > i) are distributed subject to one of the FLOSS licenses listed below, and
> >
> > ii) the object code or executable form of those sections are accompanied by the complete corresponding machine-readable source code for those sections on the same medium and under the same FLOSS license as the corresponding object code or executable forms of those sections, and
>
> c. any works which are aggregated with the Program or with a Derivative Work on a volume of a storage or distribution medium in accordance with the GPL, can reasonably be considered independent and separate works in themselves which are not derivatives of either the Program, a Derivative Work or a FLOSS Work.

If the above conditions are not met, then the Program may only be copied, modified, distributed or used under the terms and conditions of the GPL or another valid licensing option from MySQL AB.

Zlib/libpng License
Zope Public License 2.0

Due to the many variants of some of the above licenses, we require that any version follow the 2003 version of the Free Software Foundation's Free Software Definition (`http://www.gnu.org/philosophy/free-sw.html') or version 1.9 of the Open Source Definition by the Open Source Initiative (`http://www.opensource.org/docs/definition.php').

3. Definitions
a. Terms used, but not defined, herein shall have the meaning provided in the GPL.

b. Derivative Work means a derivative work under copyright law.

4. Applicability This FLOSS Exception applies to all Programs that contain a notice placed by MySQL AB saying that the Program may be distributed under the terms of this FLOSS Exception. If you create or distribute a work which is a Derivative Work of both the Program and any other work licensed under the GPL, then this FLOSS Exception is not available for that work; thus, you must remove the FLOSS Exception notice from that work and comply with the GPL in all respects, including by retaining all GPL notices. You may choose to redistribute a copy of the Program exclusively under the terms of the GPL by removing the FLOSS Exception notice from that copy of the Program, provided that the copy has never been modified by you or any third party.

Some random bits of interest.
Arjen about OpenSSL http://bugs.mysql.com/?id=6924
Updated by: Arjen Lentz Date: 2005-11-05

Linking with the client library is covered by the FLOSS exception which includes OpenSSL now. So that's clean. Indeed, the OpenSSL is not compliant with the FSF free software guidelines, however it is compliant with the OSI guidelines. And that's good enough for us. Christian is correct in saying that the author of a GPL app that links with MySQL may find themselves in a licensing headache (or may not realize that OpenSSL is involved) but that is their responsibility. The MySQL client can be linked with a number of other licenses, it would not be feasible for

MySQL to take over the responsibility for "the next level" of how combinations of licenses work out. There are too many possibilities, and combinations of more just 2 licenses.

Steve Langasek about OpenSSL vs libmysqlclient
Subject: Bug 291945: eleventh-hour transition for mysql-using packages related to apache
Date: Sat, 12 Feb 2005 00:39:58 -0800
From:
Steve Langasek <vorlon@debian.org>

that's great to hear! i'm cc'ing the relevant wishlist bug i have open against mysql-server. christian: any chance of getting an openssl enabled version of the mysql-client and mysql-server packages?

Yes, I will re-enable openssl in the next upload. Please make sure this does not introduce an openssl dependency to libmysqlclient itself; just because MySQL AB have granted a license exception for OpenSSL does not mean everyone who links to libmysqlclient has done so. I know of at least one GPL-without-exception package that is now using libmysqlclient12 in Debian.

Nice, so we should check that any linked GPL library directly (obviuolsy) or indirectly (with N=1,2,3... levels of indirection) linked against openssl adds the exception.

No, we should simply not be linking libmysqlclient against OpenSSL. The exemption was needed because there exists software that uses both libmysqlclient and libssl, but making libmysqlclient itself use libssl just because we now have the exemption will cause licensing problems for applications which currently do not depend on libssl.

This is a great reason to move asap all possible programs to gnutls, indeed. There are plenty of reasons to move software to gnutls, but doing so is non-trivial.

mysql-5.0.45/mysql-5.0.45/dbug/dbug.c
Copyright Abandoned, 1987, Fred Fish

This previously copyrighted work has been placed into the public domain by the author and may be freely used for any purpose, private or commercial. Because of the number of inquiries I was receiving about the use of this product in commercially developed works I have decided to simply make it public domain to further its unrestricted use.

I specifically would be most happy to see this material become a part of the standard Unix distributions by AT&T and the Berkeley Computer Science Research Group, and a standard part of the GNU system from the Free Software Foundation. I would appreciate it, as a courtesy, if this notice is left in all copies and derivative works. Thank you.

The author makes no warranty of any kind with respect to this product and explicitly disclaims any implied warranties of merchantability or fitness for any particular purpose.

This code implements the MD5 message-digest algorithm. The algorithm is due to Ron Rivest. This code was written by Colin Plumb in 1993, no copyright is claimed. This code is in the public domain; do with it what you wish.

Equivalent code is available from RSA Data Security, Inc. This code has been tested against that, and is equivalent, except that you don't need to include two pages of legalese with every copy.

Copyright (c) 1986 by University of Toronto.
Written by Henry Spencer.

Not derived from licensed software. Permission is granted to anyone to use this software for any purpose on any computer system, and to redistribute it freely, subject to the following restrictions:

1. The author is not responsible for the consequences of use of this software, no matter how awful, even if they arise from defects in it.

2. The origin of this software must not be misrepresented, either by explicit claim or by omission.

3. Altered versions must be plainly marked as such, and must not be misrepresented as being the original software.

Beware that some of this code is subtly aware of the way operator precedence is structured in regular expressions. Serious changes in regular-expression syntax might require a total rethink.

SciTech MGL Public License Version 1.0

PREAMBLE - SciTech Software has made a tremendous investment over many years in the development of SciTech MGL. SciTech is releasing this source code under the SciTech MGL Public License in order to give all developers the power to enhance and extend it even further. Since SciTech MGL compliments other SciTech products, SciTech is continuing active development of SciTech MGL under the terms of this License.

From:

© 2009-2010 Wind River Sysrtems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

This public license agreement balances SciTech Software's goals and those of the free software development community. SciTech has used Netscape's 'Mozilla Public License' as the model for the SciTech MGL Public License. This license agreement is identical to the Mozilla Public License, except for the substitution of company and product names to SciTech and SciTech MGL respectively, and the addition of the Amendments section at the end.

1. Definitions.
1.1. ``Contributor'' means each entity that creates or contributes to the creation of Modifications.

1.2. ``Contributor Version'' means the combination of the Original Code, prior Modifications used by a Contributor, and the Modifications made by that particular Contributor.

1.3. ``Covered Code'' means the Original Code or Modifications or the combination of the Original Code and Modifications, in each case including portions thereof.

1.4. ``Electronic Distribution Mechanism'' means a mechanism generally accepted in the software development community for the electronic transfer of data.

1.5. ``Executable'' means Covered Code in any form other than Source Code.

1.6. ``Initial Developer'' means the individual or entity identified as the Initial Developer in the Source Code notice required by Exhibit A.

1.7. ``Larger Work'' means a work which combines Covered Code or portions thereof with code not governed by the terms of this License.

1.8. ``License'' means this document.

1.9. ``Modifications'' means any addition to or deletion from the substance or structure of either the Original Code or any previous Modifications. When Covered Code is released as a series of files, a Modification is:

> A. Any addition to or deletion from the contents of a file containing Original Code or previous Modifications.
>
> B. Any new file that contains any part of the Original Code or previous Modifications.

1.10. ``Original Code'' means Source Code of computer software code which is described in the Source Code notice required by Exhibit A as Original Code, and which, at the time of its release under this License is not already Covered Code governed by this License.

1.11. ``Source Code'' means the preferred form of the Covered Code for making modifications to it, including all modules it contains, plus any associated interface definition files, scripts used to control compilation and installation of an Executable, or a list of source code differential comparisons against either the Original Code or another well known, available Covered Code of the Contributor's choice. The Source Code can be in a compressed or archival form, provided the appropriate decompression or de-archiving software is widely available for no charge.

1.12. ``You'' means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License or a future version of this License issued under Section 6.1. For legal entities, ``You'' includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, ``control'' means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of fifty percent (50%) or more of the outstanding shares or beneficial ownership of such entity.

2. Source Code License.
2.1. The Initial Developer Grant.
The Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license, subject to third party intellectual property claims:

> (a) to use, reproduce, modify, display, perform, sublicense and distribute the Original Code (or portions thereof) with or without Modifications, or as part of a Larger Work; and
>
> (b) under patents now or hereafter owned or controlled by Initial Developer, to make, have made, use and sell (``Utilize'') the Original Code (or portions thereof), but solely to the extent that any such patent is reasonably necessary to enable You to Utilize the Original Code (or portions thereof) and not to any greater extent that may be necessary to Utilize further Modifications or combinations.

2.2. Contributor Grant.
Each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license, subject to third party intellectual property claims:

> (a) to use, reproduce, modify, display, perform, sublicense and distribute the Modifications created by such Contributor (or portions thereof) either on an unmodified basis, with other Modifications, as Covered Code or as part of a Larger Work; and
>
> (b) under patents now or hereafter owned or controlled by Contributor, to Utilize the Contributor Version (or portions thereof), but solely to the extent that any such patent is reasonably necessary to enable You to Utilize the Contributor Version (or portions thereof), and not to any greater extent that may be necessary to Utilize further Modifications or combinations.

3. Distribution Obligations.
3.1. Application of License.
The Modifications which You create or to which You contribute are governed by the terms of this License, including without limitation Section 2.2. The Source Code version of Covered Code may be distributed only under the terms of this License or a future version of this License released under Section 6.1, and You must include a copy of this License with every copy of the Source Code You distribute. You may not offer or impose any terms on any Source Code version that alters or restricts the applicable version of this License or the recipients' rights hereunder. However, You may include an additional document offering the additional rights described in Section 3.5.

3.2. Availability of Source Code.
Any Modification which You create or to which You contribute must be made available in Source Code form under the terms of this License either on the same media as an Executable version or via an accepted Electronic Distribution Mechanism to anyone to whom you made an Executable version available; and if made available via Electronic Distribution Mechanism, must remain available for at least twelve (12) months after the date it initially became available, or at least six (6) months after a subsequent version of that particular Modification has been made available to such recipients. You are responsible for ensuring that the Source Code version remains available even if the Electronic Distribution Mechanism is maintained by a third party.

© 2009-2010 Wind River Sysrtems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

3.3. Description of Modifications.
You must cause all Covered Code to which you contribute to contain a file documenting the changes You made to create that Covered Code and the date of any change. You must include a prominent statement that the Modification is derived, directly or indirectly, from Original Code provided by the Initial Developer and including the name of the Initial Developer in (a) the Source Code, and (b) in any notice in an Executable version or related documentation in which You describe the origin or ownership of the Covered Code.

3.4. Intellectual Property Matters

(a) Third Party Claims. - If You have knowledge that a party claims an intellectual property right in particular functionality or code (or its utilization under this License), you must include a text file with the source code distribution titled ``LEGAL'' which describes the claim and the party making the claim in sufficient detail that a recipient will know whom to contact. If you obtain such knowledge after You make Your Modification available as described in Section 3.2, You shall promptly modify the LEGAL file in all copies You make available thereafter and shall take other steps (such as notifying appropriate mailing lists or newsgroups) reasonably calculated to inform those who received the Covered Code that new knowledge has been obtained.

(b) Contributor APIs. - If Your Modification is an application programming interface and You own or control patents which are reasonably necessary to implement that API, you must also include this information in the LEGAL file.

3.5. Required Notices. You must duplicate the notice in Exhibit A in each file of the Source Code, and this License in any documentation for the Source Code, where You describe recipients' rights relating to Covered Code. If You created one or more Modification(s), You may add your name as a Contributor to the notice described in Exhibit A. If it is not possible to put such notice in a particular Source Code file due to its structure, then you must include such notice in a location (such as a relevant directory file) where a user would be likely to look for such a notice.

You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Code. However, You may do so only on Your own behalf, and not on behalf of the Initial Developer or any Contributor. You must make it absolutely clear than any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of warranty, support, indemnity or liability terms You offer.

3.6. Distribution of Executable Versions.
You may distribute Covered Code in Executable form only if the requirements of Section 3.1-3.5 have been met for that Covered Code, and if You include a notice stating that the Source Code version of the Covered Code is available under the terms of this License, including a description of how and where You have fulfilled the obligations of Section 3.2. The notice must be conspicuously included in any notice in an Executable version, related documentation or collateral in which You describe recipients' rights relating to the Covered Code.

You may distribute the Executable version of Covered Code under a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License and that the license for the Executable version does not attempt to limit or alter the recipient's rights in the Source Code version from the rights set forth in this License. If You distribute the Executable version under a different license You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer or any Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You offer.

3.7. Larger Works.
You may create a Larger Work by combining Covered Code with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Covered Code.

4. Inability to Comply Due to Statute or Regulation.
If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Covered Code due to statute or regulation then You must:

(a) comply with the terms of this License to the maximum extent possible; and

(b) describe the limitations and the code they affect. Such description must be included in the LEGAL file described in Section 3.4 and must be included with all distributions of the Source Code. Except to the extent prohibited by statute or regulation, such description must be sufficiently detailed for a recipient of ordinary skill to be able to understand it.

5. Application of this License.
This License applies to code to which the Initial Developer has attached the notice in Exhibit A, and to related Covered Code.

6. Versions of the License.
6.1. New Versions.
SciTech Software, Inc. (``SciTech'') may publish revised and/or new versions of the License from time to time. Each version will be given a distinguishing version number.

6.2. Effect of New Versions.
Once Covered Code has been published under a particular version of the License, You may always continue to use it under the terms of that version. You may also choose to use such Covered Code under the terms of any subsequent version of the License published by SciTech. No one other than SciTech has the right to modify the terms applicable to Covered Code created under this License.

6.3. Derivative Works.
If you create or use a modified version of this License (which you may only do in order to apply it to code which is not already Covered Code governed by this License), you must (a) rename Your license so that the phrases ``SciTech'', ``SciTech MGL Public License'', ``SMPL'', or any confusingly similar phrase do not appear anywhere in your license and (b) otherwise make it clear that your version of the license contains terms which differ from the SciTech MGL Public License. (Filling in the name of the Initial Developer, Original Code or Contributor in the notice described in Exhibit A shall not of themselves be deemed to be modifications of this License.)

7. DISCLAIMER OF WARRANTY.
COVERED CODE IS PROVIDED UNDER THIS LICENSE ON AN ``AS IS'' BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION,

© 2009-2010 Wind River Sysrtems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

WARRANTIES THAT THE COVERED CODE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGING.

THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED CODE IS WITH YOU. SHOULD ANY COVERED CODE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED CODE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

8. TERMINATION.
This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses to the Covered Code which are properly granted shall survive any termination of this License. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

9. LIMITATION OF LIABILITY.
UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED CODE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO YOU OR ANY OTHER PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THAT EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

10. U.S. GOVERNMENT END USERS.
The Covered Code is a ``commercial item,'' as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of ``commercial computer software'' and ``commercial computer software documentation,'' as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Code with only those rights set forth herein.

11. MISCELLANEOUS.
This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by California law provisions (except to the extent applicable law, if any, provides otherwise), excluding its conflict-of-law provisions. With respect to disputes in which at least one party is a citizen of, or an entity chartered or registered to do business in, the United States of America:

(a) unless otherwise agreed in writing, all disputes relating to this License (excepting any dispute relating to intellectual property rights) shall be subject to final and binding arbitration, with the losing party paying all costs of arbitration;

(b) any arbitration relating to this Agreement shall be held in Butte County, California, under the auspices of JAMS/EndDispute; and

(c) any litigation relating to this Agreement shall be subject to the jurisdiction of the Federal Courts of the Northern District of California, with venue lying in Butte County, California, with the losing party responsible for costs, including without limitation, court costs and reasonable attorneys fees and expenses.

The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License.

12. RESPONSIBILITY FOR CLAIMS.
Except in cases where another Contributor has failed to comply with Section 3.4, You are responsible for damages arising, directly or indirectly, out of Your utilization of rights under this License, based on the number of copies of Covered Code you made available, the revenues you received from utilizing such rights, and other relevant factors. You agree to work with affected parties to distribute responsibility on an equitable basis.

AMENDMENTS - Additional Terms applicable to the SciTech MGL Public License.

I. Effect.
These additional terms described in this SciTech MGL Public License -- Amendments shall apply to the SciTech MGL Source Code and to all Original Code under this License.

II. Use of Original Code by Initial Developer.
V.1. In General. - The obligations of Section 3 apply to SciTech, except to the extent specified in this Amendment, Section V.2.

V.2. Other Products. - SciTech may include Original Code and Modifications contributed by SciTech in products other than the SciTech MGL, without such additional products becoming subject to the terms of this License, and may license such additional products on different terms from those contained in this License.

EXHIBIT A.
``The contents of this file are subject to the SciTech MGL Public License Version 1.0 (the "License"); you may not use this file except in compliance with the License. You may obtain a copy of the License at http://www.scitechsoft.com/mgl-license.txt. Software distributed under the License is distributed on an "AS IS" basis, WITHOUT WARRANTY OF ANY KIND, either express or implied. See the License for the specific language governing rights and limitations under the License.

The Original Code is **Copyright (C) 1991-1998 SciTech Software, Inc.** The Initial Developer of the Original Code is SciTech Software, Inc.

Portions created by _____ are
Copyright (C) _____. All Rights Reserved.
Contributor(s): _____."
[NOTE: The text of this exhibit A may differ slightly from the text of the notices in the Source Code files of the Original Code. This is due to time constraints encountered in getting the license agreement finalised and preparing the Original Code for release. You should use the text of this Exhibit A rather than the text found in the Original Code for Your Modifications.]

nautilus 2.20.0

Software:	nautilus
Version:	2.20.0
File or Package:	nautilus-2.20.0.tar.bz2
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2, LGPLv2+, FDLv1.1, MIT/X11
Other Licenses:	Custom
URL:	http://ftp.gnome.org/pub/gnome/sources/nautilus/2.20/nautilus-2.20.0.tar.bz2
Group:	User Interface/Desktops
Description:	Nautilus is a file manager for GNOME; Nautilus is the official file manager for the GNOME desktop. The name is a play on words, evoking the shell of a nautilus to represent an operating system shell. Nautilus integrates access to files, applications, media, Internet-based resources and the Web.
Common Usage:	utility
Package Size:	36.7 MB
Folders / Files:	23 / 579
Source Path:	wrlinux-4.0/layers/wrll-userspace/graphics/packages

Group:	User Space Apps / Applications/System
Description:	Network Block Device user-space tools (TCP version) - Tools for the Linux Kernel`s network block device, allowing you to use remote block devices over a TCP/IP network. Network Block Device user-space tools (TCP version). In Linux, a network block device is a device node whose content is provided by a remote machine. Typically, network block devices are used to access a storage device that does not physically reside in the local machine but on a remote one. As an example, the local machine can access a fixed disk that is attached to another computer.

NOTICES:

From:
nc110/README
Netcat is entirely my own creation, although plenty of other code was used as examples. It is freely given away to the Internet community in the hope that it will be useful, with no restrictions except giving credit where it is due. No GPLs, Berkeley copyrights or any of that nonsense. The author assumes NO responsibility for how anyone uses it.

If netcat makes you rich somehow and you're feeling generous, mail me a check. If you are affiliated in any way with Microsoft Network, get a life. Always ski in control. Comments, questions, and patches to hobbit@avian.org.

ncurses 5.7-3.20090207

Software:	ncurses
Version:	5.7-3.20090207
File or Package:	ncurses-5.7-3.20090207.fc12.src.rpm
OSI Licenses:	GPLv2+ w/exception, MIT/X11, BSDv1 (UCB), Public Domain
Other Licenses:	Custom
URL:	http://ftp.linux.ncsu.edu/pub/fedora/linux/releases/12/Fedora/source/SRPMS/ncurses-5.7-3.20090207.fc12.src.rpm
Group:	User Space libraries/System Environment/Libraries
Description:	A terminal handling library. ncurses is a programming library providing an API, allowing the programmer to write text user interfaces in a terminal-independent manner. It's a toolkit for developing "GUI-like" apps which run under a terminal emulator. It also optimizes screen changes, in order to reduce the latency experienced when using remote shells.
Common Usage:	Library
Package Size:	20.5 MB
Folders / Files:	30 / 1,038
Source Path:	wrlinux-4.0/layers/ldat-tools/packages

NOTICES:

From:
ncurses-5.7-3.20090207.fc12.src/ncurses-5.7/ncurses-5.7/misc/terminfo.src
This version of terminfo.src is distributed with ncurses and is maintained by Thomas E. Dickey (TD). Report bugs and new terminal descriptions to bug-ncurses@gnu.org

The original header is preserved below for reference. It is noted that there is a "newer" version which differs in some cosmetic details (but actually stopped updates several years ago); we have decided to not change the header unless there is also a change in content.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

To further muddy the waters, it is noted that changes to this file as part of maintenance of ncurses (since 1996) are generally conceded to be copyright under the ncurses MIT-style license. That was the effect of the agreement which the principal authors of ncurses made in 1998. However, since much of the file itself is of unknown authorship (and the disclaimer below makes it obvious that Raymond cannot or will not convey rights over those parts), there is no explicit copyright notice on the file itself.

It would also be a nuisance to split the file into unknown/known authorship and move pieces as they are maintained, since many of the maintenance changes have been small corrections to Raymond's translations to/from termcap format, correcting the data but not the accompanying annotations.

In any case, note that almost half of this file is not data but annotations which reflect creative effort. Furthermore, the structure of entries to reuse common chunks also is creative (and subject to copyright). Finally, some portions of the data are derivative work under a compatible MIT-style license from xterm.

Some information has been merged in from terminfo files distributed by USL and SCO (see COPYRIGHTS AND OTHER DELUSIONS below). Much information comes from vendors who maintain official terminfos for their hardware (notably DEC and Wyse).

COPYRIGHTS AND OTHER DELUSIONS
The BSD ancestor of this file had a standard Regents of the University of California copyright with dates from 1980 to 1993.

Some information has been merged in from a terminfo file SCO distributes. It has an obnoxious boilerplate copyright which I'm ignoring because they took so much of the content from the ancestral BSD versions of this file and didn't attribute it, thereby violating the BSD Regents' copyright.

Not that anyone should care. However many valid functions copyrights may serve, putting one on a termcap/terminfo file with hundreds of anonymous contributors makes about as much sense as copyrighting a wall-full of graffiti -- it's legally dubious, ethically bogus, and patently ridiculous.

This file deliberately has no copyright. It belongs to no one and everyone. If you claim you own it, you will merely succeed in looking like a fool. Use it as you like. Use it at your own risk. Copy and redistribute freely. There are no guarantees anywhere. Svaha!

ncurses-5.7-3.20090207.fc12.src/ncurses-5.7/ncurses-5.7/test/tclock.c
tclock - analog/digital clock for curses.

If it gives you joy, then
(a) I'm glad
(b) you need to get out more :-)

This program is **copyright Howard Jones, September 1994** (ha.jones@ic.ac.uk).

It may be freely distributed as long as this copyright message remains intact, and any modifications are clearly marked as such. [In fact, if you modify it, I wouldn't mind the modifications back, especially if they add any nice features. A good one would be a precalc table for the 60 hand positions, so that the floating point stuff can be ditched. As I said, it was a 20 hackup minute job.]

COMING SOON: tfishtank. Be the envy of your mac-owning colleagues.

net-snmp 5.4-13

Software:	net-snmp
Version:	5.4-13
File or Package:	net-snmp-5.4-13.fc7.src.rpm
OSI Licenses:	GPLv2+ w/exception, BSDv1, BSDv2, MIT/X11, Perl Artistic
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/core/development/source/SRPMS/net-snmp-5.4-13.fc7.src.rpm
Group:	System Environment/Daemons
Description:	Net-SNMP is a suite of software for using and deploying the SNMP protocol (v1, v2c and v3 and the AgentX subagent protocol). It supports IPv4, IPv6, IPX, AAL5, Unix domain sockets and other transports. It contains a generic client library, a suite of command line applications, a highly extensible SNMP agent, perl modules and python modules. This package was originally based on the CMU 2.1.2.1 snmp code. It has been greatly modified, restructured, enhanced and fixed. It hardly looks the same as anything that CMU has ever released. It was renamed from cmu-snmp to ucd-snmp in 1995 and later renamed from ucd-snmp to net-snmp in November 2000.
Common Usage:	utilities
Package Size:	38.9 MB
Folders / Files:	151 / 1,788
Source Path:	wrlinux-4.0/layers/wrll-userspace/networking/packages

NOTICES:

From:
net-snmp-5.4-13.fc7.src/net-snmp-5.4/net-snmp-5.4/copying
Various copyrights apply to this package, listed in various separate parts below. Please make sure that you read all the parts. Up until 2001, the project was based at UC Davis, and the first part covers all code written during this time. From 2001 onwards, the project has been based at SourceForge, and Networks Associates Technology, Inc hold the copyright on behalf of the wider Net-SNMP community, covering all derivative work done since then. An additional copyright section has been added as Part 3 below also under a BSD license for the work contributed by Cambridge Broadband Ltd. to the project since 2001.

An additional copyright section has been added as Part 4 below also under a BSD license for the work contributed by Sun Microsystems, Inc. to the project since 2003. Code has been contributed to this project by many people over the years it has been in development, and a full list of contributors can be found in the README file under the THANKS section.

net-tools 1.60-95

Software:	net-tools
Version:	1.60-95
File or Package:	net-tools-1.60-95.fc12.src.rpm
OSI Licenses:	GPLv2, GPLv2+
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/12/Everything/source/SRPMS/net-tools-1.60-95.fc12.src.rpm
Group:	User Space Apps / System Environment/Base
Description:	Basic networking tools. A collection of programs that form the base set of the NET-3 networking distribution for the Linux operating system. The net-tools package contains a collection of programs that form the base set of the NET-3 networking distribution for the Linux operating system. It contains the important tools for controlling the network subsystem of the Linux kernel including arp, hostname, ifconfig, netstat, rarp and route.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Additionally, this package contains utilities relating to particular network hardware types (plipconfig, slattach) and advanced aspects of IP configuration (iptunnel, ipmaddr).

Common Usage: Utilities
Package Size: 2.4 MB
Folders / Files: 25 / 256
Source Path: wrlinux-4.0/layers/wrll-userspace/core/packages

1. Overview
This package contains all necessary programs to make your Linux machine act as an NFS server, being an NFS daemon (rpc.nfsd), a mount daemon (rpc.mountd), optionally, the uid mapping daemon (rpc.ugidd), and the showmount utility. It was originally developed by Mark Shand, and further enhanced by Donald Becker, Rick Sladkey, Orest Zborowski, Fred van Kempen, and Olaf Kirch.

7. **Copyright**
Much of the code in this package was originally written by **Mark Shand**, and is placed under the following **copyright**:

This software may be used for any purpose provided the above copyright notice is retained. It is supplied as is, with no warranties expressed or implied. Other code, especially that written by Rick Sladkey and some replacement routines included from the GNU libc, are covered by the GNU General Public License, version 2, or (at your option) any later version.

URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/9/Fedora/source/SRPMS/nfs-utils-1.1.2-2.fc9.src.rpm
Group:	System Environment/Daemons
Description:	NFS utilities and supporting clients and daemons for the kernel NFS server. The nfs-utils package provides a daemon for the kernel NFS server and related tools, which provides a much higher level of performance than the traditional Linux NFS server used by most users. This package also contains the showmount program. Showmount queries the mount daemon on a remote host for information about the NFS (Network File System) server on the remote host.
Common Usage:	utility, daemon
Package Size:	5.9 MB
Folders / Files:	31 / 316
Source Path:	wrlinux-4.0/layers/wrll-userspace/core/packages

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Version:	4.8.2-1
File or Package:	nspr-4.8.2-1.fc12.src.rpm
OSI Licenses:	GPLv2+, GPLv2+ w/exception, LGPLv2.1+, Mozilla (MPL) v1.1, MIT/X11, Beer-Ware v.42
Other Licenses:	Custom
URL:	http://mirror.cpsc.ucalgary.ca/mirror/fedora/linux/releases/12/Fedora/source/SRPMS/nspr-4.8.2-1.fc12.src.rpm
Group:	User Space libraries / Development/Libraries
Description:	Netscape Portable Runtime (NSPR) provides a platform-neutral API for system level and libc like functions. The API is used in the Mozilla clients and many of Red Hat`s, Sun`s, and other software offerings. Development libraries for the Netscape Portable Runtime; In computing, the Netscape Portable Runtime, or NSPR, a platform abstraction library, makes all operating systems it supports appear the same to (for example) Mozilla-style web-browsers. NSPR provides platform independence for non-GUI operating system facilities.
Common Usage:	API, Docs, Library, SDK
Package Size:	9.3 MB
Folders / Files:	53 / 690
Source Path:	wrlinux-4.0/layers/wrll-userspace/security/packages

Group:	User Space libraries / System Environment/Base
Description:	Network Security Services (NSS) is a set of libraries designed to support cross-platform development of security-enabled client and server applications. Applications built with NSS can support SSL v2 and v3, TLS, PKCS 5, PKCS 7, PKCS 11, PKCS 12, S/MIME, X.509 v3 certificates, and other security standards. For detailed information on standards supported, see Overview of NSS. NSS is used throughout WR-Linux for cryptographic and security services. Tools for the Network Security Services; Network Security Services (NSS) comprises a set of libraries designed to support cross-platform development of security-enabled client and server applications. NSS provides a complete open-source

If you use the zlib library in a product, we would appreciate not receiving lengthy legal documents to sign. The sources are provided for free but without warranty of any kind. The library has been entirely written by Jean-loup Gailly and Mark Adler; it does not include third-party code. If you redistribute modified sources, we would appreciate that you include in the file ChangeLog history information documenting your changes. Please read the FAQ for more information on the distribution of modified source versions.

ntop 3.2-0

Software:	ntop
Version:	3.2-0
File or Package:	ntop-3.2-0.src.rpm
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2+, MIT/X11, FreeBSD, BSDv1 (UCB), Apple Public Source v1.1
Other Licenses:	Custom
URL:	http://cdnetworks-kr-2.dl.sourceforge.net/project/ntop/ntop/3.2/ntop-3.2-0.src.rpm
Group:	User Space Apps / Networking/Utilities
Description:	Web-based network traffic monitor. ntop is a network and traffic analyzer that provides a wealth of information on various networking hosts and protocols. ntop is primarily accessed via a built-in web interface. Optionally, data may be stored into a database for analysis or extracted from the web server in formats suitable for manipulation in perl or php. ntop shows the network usage. ntop is a network traffic probe that shows the network usage, similar to what the popular top Unix command does. ntop is based on libpcap and it has been written in a portable way in order to virtually run on every Unix platform and on Win32 as well. ntop is a web-based traffic monitor that shows the network usage. It can be used in both interactive or web mode using the embedded web server.
Common Usage:	Utility
Package Size:	23.9 MB
Folders / Files:	43 / 630
Source Path:	wrlinux-4.0/layers/wrll-userspace/cgl/packages

♦♦♦

From:
ntop-3.2-0.src/ntop-3.2/ntop-3.2/packages/debian.official/copyright
This package was debianized by Rocco Carbone <rocco@ntop.org> on Fri, 5 Mar 2004 09:37:13 +0100 from sources at SourceForge mirror: http://switch.dl.sourceforge.net/sourceforge/ntop/ntop-3.0pre2.tgz

This is an unofficial distribution mainly because I have no time to become a Debian maintainer.

General Public Licence for the software known as MSNTP
(c) Copyright, N.M. Maclaren, 1996, 1997, 2000
(c) Copyright, University of Cambridge, 1996, 1997, 2000

Free use of MSNTP in source and binary forms is permitted, provided that this entire licence is duplicated in all copies, and that any documentation, announcements, and other materials related to use acknowledge that the software was developed by N.M. Maclaren (hereafter refered to as the Author) at the University of Cambridge. Neither the name of the Author nor the University of Cambridge may be used to endorse or promote products derived from this material without specific prior written permission.

The Author and the University of Cambridge retain the copyright and all other legal rights to the software and make it available non-exclusively. All users must ensure that the software in all its derivations carries a copyright notice in the form:

(c) Copyright N.M. Maclaren,
(c) Copyright University of Cambridge.

NO WARRANTY - Because the MSNTP software is licensed free of charge, the Author and the University of Cambridge provide absolutely no warranty, either expressed or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose. The entire risk as to the quality and performance of the MSNTP software is with you. Should MSNTP prove defective, you assume the cost of all necessary servicing or repair.

In no event, unless required by law, will the Author or the University of Cambridge, or any other party who may modify and redistribute this software as permitted in accordance with the provisions below, be liable for damages for any losses whatsoever, including but not limited to lost profits, lost monies, lost or corrupted data, or other special, incidental or consequential losses that may arise out of the use or inability to use the MSNTP software.

COPYING POLICY - Permission is hereby granted for copying and distribution of copies of the MSNTP source and binary files, and of any part thereof, subject to the following licence conditions:

1. You may distribute MSNTP or components of MSNTP, with or without additions developed by you or by others. No charge, other than an "at-cost" distribution fee, may be charged for copies, derivations, or distributions of this material without the express written consent of the copyright holders.

2. You may also distribute MSNTP along with any other product for sale, provided that the cost of the bundled package is the same regardless of whether MSNTP is included or not, and provided that those interested only in MSNTP must be notified that it is a product freely available from the University of Cambridge.

In some email I received from Harlan Stenn, sie wrote:
Darren,
I'm looking for an async resolver library that I can use with NTP. I noticed your code in the contrib/ subdir of later bind8 distribution and I noticed the Copyright notice in arlib.c:

arlib.c **(C)opyright 1993 Darren Reed. All rights reserved.**
This file may not be distributed without the author's permission in any shape or form. The author takes no responsibility for any damage or loss of property which results from the use of this software.

so I thought I'd ask your permission to distribute your files if I can figure out how to make it all work with ntpd.

http://coombs.anu.edu.au/~avalon/arlib.tar.gz
a few bug fixes (inc. buffer overflow:) and stuff in there. But otherwise, go for it.
Darren

This header file complies with "Pulse-Per-Second API for UNIX-like Operating Systems, Version 1.0", rfc2783. Credit is due Jeff Mogul and Marc Brett, from whom much of this code was shamelessly stolen. this modified timepps.h can be used to provide a PPSAPI interface to a machine running SCO Unix. A full PPSAPI interface to the SCO Unix kernel would be better, but this at least removes the necessity for special coding from the NTP NTP drivers.

Some of this include file **Copyright (c) 1999 by Ulrich Windl**, based on code by Reg Clemens <reg@dwf.com> based on code by Poul-Henning Kamp <phk@FreeBSD.org>

"THE BEER-WARE LICENSE" (Revision 42): <phk@FreeBSD.org> wrote this file. As long as you retain this notice you can do whatever you want with this stuff. If we meet some day, and you think this stuff is worth it, you can buy me a beer in return. **Poul-Henning Kamp**

Automated Options is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with Automated Options. See the file "COPYING". If not, write to: The Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301

As a special exception, Bruce Korb gives permission for additional uses of the text contained in his release of AutoOpts. The exception is that, if you link the AutoOpts library with other files to produce an executable, this does not by itself cause the resulting executable to be covered by the GNU General Public License.

Your use of that executable is in no way restricted on account of linking the AutoOpts library code into it. This exception does not however invalidate any other reasons why the executable file might be covered by the GNU General Public License. This exception applies only to the code released by Bruce Korb under the name AutoOpts.

If you copy code from other sources under the General Public License into a copy of AutoOpts, as the General Public License permits, the exception does not apply to the code that you add in this way. To avoid misleading anyone as to the status of such modified files, you must delete this exception notice from them. If you write modifications of your own for AutoOpts, it is your choice whether to permit this exception to apply to your modifications. If you do not wish that, delete this exception notice.

From:
ntp-4.2.4p0-1.fc7.src/ntp-4.2.4p0/ntp-4.2.4p0/readme.y2kfixes
AT&T Freeware Year 2000 Certification - This is the "readme" file for the freeware application which has been certified by AT&T Labs as part of the "Freeware Y2K Certification Project".

DISCLAIMER - For its own internal business purposes AT&T Labs has assessed various programs obtained from the Internet for Year-2000 (Y2K) readiness that were not sufficiently certified for AT&T's needs. As a service to the computing community AT&T Labs is freely releasing this information to the public as a series of "Y2K Application Updates", one update for what AT&T Labs considers an "application".

For use outside of AT&T, AT&T Labs is not certifying this information is correct, that any software, including repairs and tests, will help others in any way, survive the year 2000, nor work with current applications. Nor is AT&T taking any responsibility for repairing any Y2K problems that were overlooked nor repairing any bugs in any "Y2K Application Update". All risk of using this Y2K Application Update remains with the user who is expected to test that this update meets their needs.

LICENSE TO USE - AT&T's intent is to ensure these Y2K patches are freely available to the public but will not maintain a public web site for their distribution. Any copyright claims only only apply to the specific changes made by Y2K to the code. Any original copyright holders retain rights to unchanged code. Wherever possible patches will be returned to the current owner(s) of the code.

Owners and publishers are free to incorporate appropriate patches, upgrades, and tests within legal future distributions as long as they include the credit: Various Y2K updates and tests provided by AT&T Labs.

Copyright 1999 AT&T.
and any AT&T "comments" on the changed code remain intact. Any distributions of the updates must keep the entire update intact, without any change, including copyright and disclaimer information. If integrated with the original application items not needed for an integrated release may be omitted. When distributed on the same media as the original application there must be no charge for this "Y2k Application Update".

numactl 2.0.3-8

Software:	numactl
Version:	2.0.3-8
File or Package:	numactl-2.0.3-8.fc13.src.rpm

numactl-2.0.3-8.fc13.src/numactl-2.0.3/numactl-2.0.3/readme
Simple NUMA policy support. It consists of a numactl program to run other programs with a specific NUMA policy and a libnuma shared library ("NUMA API") to set NUMA policy in applications. See the manpages numactl.8 and numa.3 for details.

Copyright: numactl and the demo programs are under the GNU General Public License, v.2 libnuma is under the GNU Lesser General Public License, v2.1. The manpages are under the same license as the Linux manpages (see the files)

numademo links with a library derived from the C version of STREAM by John D. McCalpin and Joe R. Zagar for one sub benchmark. See stream_lib.c for the license. In particular when you publish numademo output you might need to pay attention there or filter out the STREAM results. It also uses a public domain Mersenne Twister implementation from Michael Brundage.

ocfs2-tools 1.4.3-5

Software:	ocfs2-tools
Version:	1.4.3-5
File or Package:	ocfs2-tools-1.4.3-5.fc13.src.rpm
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2, LGPLv2+, MIT/X11, Public Domain
Other Licenses:	Custom
URL:	
Group:	User Space libraries/Applications/System/ System Environment/Kernel/ System Environment/Base
Description:	OCFS2 Tools is a collection of utility programs to create, manage, debug and repair the OCFS2 filesystem. It includes utilities like mkfs.ocfs2(8), fsck.ocfs2(8), tunefs.ocfs2(8), mount.ocfs2(8) and debugfs.ocfs2(8). Oracle Cluster Filesystem version 2 Tools; OCFS stands for Oracle Cluster File System. It is a shared disk file system developed by Oracle Corporation and released under the GNU General Public License. Programs to manage the Ocfs2 cluster file system, including mkfs.ocfs2, tunefs.ocfs2 and fsck.ocfs2. Ocfs2 is a general purpose extent based shared disk cluster file system. It supports 64 bit inode numbers, and has automatically extending metadata groups which may also make it attractive for non-clustered use. Ocfs2 leverages some well tested kernel technologies, such as JBD - the same journaling subsystem in use by ext3.
Common Usage:	Docs, Tool, Utility
Package Size:	5.4 MB
Folders / Files:	46 / 424
Source Path:	wrlinux-4.0/layers/wrll-linux-2.6.34/packages
