

XEROX 2101 Fiery Installation Instructions

Direct Queue

1. Unzip the file and copy the fix file (generally ends in '.ps') to a PC that has the Command Workstation running.
2. In the Command Workstation* pulldown menu:
 - select **File ->Import -> Job**
3. In the Download Window:
 - select the **fix file** that was just copied to the PC
 - select **ADD**; the fix file will appear in the 'Files to be downloaded' window
 - select **EX2101 direct** from the Logical Printer pulldown menu
 - select **Import**
4. Wait at least 60 seconds and select "**Reboot System**" using the Fiery LCD located at the printer.
5. Let the Fiery come to 'Idle'.
6. Print out the configuration page.
7. The 'Update Information' section will contain the fix number just installed.

*NOTE: If you do not have Command Workstation 4 loaded onto a PC or the FACI kit, use the Customer Software CD to load the Command Workstation onto a PC.

(For additional information, see page 1-45 of the *User Software Install.pdf* on the *Fiery EX2101 Documentation CD*.)

If you do not have the Customer Software CD, open your Web Browser and enter the IP address of the Fiery:

- Select 'Installer'
- Select (double click) 'Command Workstation' in the 'Windows' section.
- Select 'Save' in the File Download window.
- Select 'Desktop'; 'Save'.
- Locate the 'cstaton.exe' file and double click to open.
