# 4 Driver Installation

The **English** version of the Xerox AccXES HDI AutoCAD 2004 Driver will be delivered as a self-extracting zip file called **AccXES91HDI_2004_Enu.exe**. Executing this program will extract the files to a default directory (c:\temp\Accxes91hdi_2004) or to a directory of the user's choice. Use the AutoCAD 2004 Add-A-Plotter Wizard to add the printer

1. Start AutoCAD 2004

2. Click "File" and select "Plotter Manager"

3. Double click on the Add-A-Plotter Wizard Icon.

4. Follow the instructions on the screen until the "Have Disk" button is displayed.   Click "Have Disk" and browse to the location where you unzipped the files (example: c:\temp\Accxes91hdi_2004). Select DRV_XES.HIF and click "Open".  The driver files will be updated on your AutoCAD 2004 system.

5. Select manufacturer Xerox.

6. Select the printer model you wish to install and follow the instructions.

The following files are installed when doing an **Add-A-Plotter** with the Have Disk button.

| Files | Destination |
|---|---|
| XES8.HDI | \DRV subdirectory of your AutoDesk product |
| XES8.DRC | \DRV subdirectory of your AutoDesk product |
| XES8RES.DLL | \DRV subdirectory of your AutoDesk product |
| 8830ansi.fin | \DRV subdirectory of your AutoDesk product |
| 8830arch.fin | \DRV subdirectory of your AutoDesk product |
| 8830iso.fin | \DRV subdirectory of your AutoDesk product |
| DRV_XES.HLP | \HELP subdirectory of your AutoDesk product |
| DRV_XES.CNT | \HELP subdirectory of your AutoDesk product |

# 5 Driver Removal

While AutoDesk provides a mechanism for removing the entire AutoCAD 2004 installation, they do not provide a mechanism for removing specific driver files.   The 8 files shown as installed in the previous section, may be removed by exploring and deleting the individual files.

1. Start Windows Explorer.
2. Delete the XES8.HDI, XES8.DRC,  XES8RES.DLL, 8830ansi.fin, 8830arch.fin, and 8830iso.fin files from the \DRV directory of AutoCAD 2004.
3. Delete the DRV_XES.CNT and DRV_XES.HLP files from the \HELP directory of AutoCAD 2004.
4. Exit Windows Explorer.
5. Empty your Recycle Bin and restart Windows.

# 6 Customer Issues Resolved

None at this time.

# 7 Known Issues

| Problem Description | Resolution |
|---|---|
| Grid fill and color Fill not printed on monochrome printers | Select 16Million colors. |
| Document Type not listed in Help | The document type allows the user to specify what image processing should be used for the document.  Options are: Lines&Text, Photo, and Graphics.<br><br>Lines & Text should be used for high contrast documents with fine details.<br><br>Photo should be used for pictures and images where shading is important.<br><br>Graphics mode is optimized for images with bold colors, and some shading. |
| Titleblock is not listed in Help | The Titleblock can be specified to indicate to the printer where the titleblock of image is. This is important when the document is going to be folded because it ensures that the document enters the folder in the proper orientation.<br><br>The Intelligent Titleblock feature instructs the printer to automatically correct improperly specified titleblock locations. |
| Line Scale Mode is not listed in Help | The Line Scale Mode feature, when enabled, informs the Printer that it should scale the width of the lines, not just the length. |
| Raster Halftone Method is not listed in Help | The Raster Halftone Method allows the user to optimize the processing of raster halftone images by selecting either **Error Diffusion**, or **Screen**.  Error diffusion will provide for smoother transitions from light to dark, but can magnify image Quality problems.  Screen will reproduce most consistently, but will appear more grainy. |
