1 Introduction

The Xerox Wide Format 8850 Print System Firmware Release 2.3.06-16 provides multinational software for Xerox 8850 and XES Synergix 510dp printers that are part of the XES Synergix Digital Solution. The languages supported are English, Deutsch, Espanol, Francais, Italiano, and Portugues. When downloading the firmware, download the appropriate primary and secondary language files also.

2 Release Deliverables

2.1 Xerox 8850 Print System Printer

The following upgrade file is provided for the Xerox 8850 Printer: 02030616.bin

Caution: *If you had a firmware version older than 02.02.18-16 loaded, these improvements may require the Tech Rep to visit for optimal Magnification adjustment!*

3 Recommended Configurations

This firmware works with all Xerox 8850 Print System Printers, or XES Synergix 510dp printers, and AccXES version 9.0 and later.

4 Release Installation

4.1 Download from website

The 8850 Printer Firmware can be downloaded from the www.xerox.com Support & Drivers website to your file system. From there it can be loaded to your printer's controller by using the Document Submit Tool feature of the AccXES Client Tools, the Synergix Web PMT or Unix as described below.

4.1.1 Installation for 8850 Printer

IMPORTANT NOTE*: The controller will only accept the installation when there are no active jobs being processed.*

Caution: *These improvements may require the Tech Rep to visit for optimal Magnification adjustment!*

AccXES Client Tools

Download the file named "02030616.bin". A printed status sheet will indicate that the download was successful.

Web PMT

Select PRINTER DEFAULTS > UTILITIES > Upload File. Use the Browse button to select the "02030616.bin" file. Click on the "Upload" button. A printed status sheet will indicate that the download was successful.

Unix

Download the software using LPR with the following command line:

lpr –P *printername* 02030616.bin

A printed status sheet will indicate that the download was successful.

5 Changes since 02.02.19-16

5.1.1 Improved reliability of Automatic Xerographic Setup

This firmware improves the results of the Automatic Xerographic Setup routine. This may result in darker images.

5.1.2 Folder Delay time fix

This firmware improves the algorithm used to control the delay time between sheets when using a Folder.

5.1.3 LL.24 Status Codes Removed

The LL.24 Status Codes have been removed from this firmware.
