For some people, it is not clear, what is the real intention of the author by using the GNU Lesser General Public License (LGPL) as the distribution license for GNU Pth. This is, because the LGPL and the GPL can be (and are often) interpreted very differently and some interpretations seem to be not compatible with others. So an explicit clarification for the use of the LGPL for GNU Pth from the authors point of view might be useful.

The author places this library under the LGPL to make sure that it can be used both commercially and non-commercially provided that modifications to the code base are always donated back to the official code base under the same license conditions. Please keep in mind that especially using this library in code not staying under the GPL or the LGPL is allowed and that any taint or license creep into code that uses the library is not the authors intention. It is just the case that including this library into the source tree of other applications is a little bit more

document version 1.4

inconvenient because of the LGPL. But it has to be this way for good reasons. And keep in mind that inconvenient doesn't mean not allowed or even impossible.

Even if you want to use this library in some BSD-style licensed packages, this `_is_` possible as long as you are a little bit carefully. Usually this means you have to make sure that the code is still clearly separated into the source tree and that modifications to this source area are done under the conditions of the LGPL. Read below for more details on the conditions. Contact the author if you have more questions.

All PulseAudio source files are licensed under the GNU Lesser General Public License. (see file LGPL for details). However, the server side links to the GPL-only library 'libsamplerate' which practically downgrades the license of the server part to GPL (see file GPL for details), exercising section 3 of the LGPL.

Hence you should treat the client library ('libpulse') of PulseAudio as being LGPL licensed and the server part ('libpulsecore') as being GPL licensed. Since the PulseAudio daemon and the modules link to

document version 1.4

'libpulsecore' they are of course also GPL licensed. Lennart Poettering,

The design goals of this code are: Very fast algorithm, SIMD-friendly algorithm, Low memory requirement, Good perceptual quality (and not best SNR)

Warning: This resampler is relatively new. Although I think I got rid of all the major bugs and I don't expect the API to change anymore, there may be something I've missed. So use with caution. This algorithm is based on this original resampling algorithm: Smith, Julius O. Digital Audio Resampling Home Page Center for Computer Research in Music and Acoustics (CCRMA), Stanford University, 2007. Web published at <http://www-ccrma.stanford.edu/~jos/resample/>.

There is one main difference, though. This resampler uses cubic interpolation instead of linear interpolation in the above paper. This makes the table much smaller and makes it possible to compute that  
document version 1.4

table on a per-stream basis. In turn, being able to tweak the table for each stream makes it possible to both reduce complexity on simple ratios (e.g. 2/3), and get rid of the rounding operations in the inner loop. The latter both reduces CPU time and makes the algorithm more SIMD-friendly.

#### A. HISTORY OF THE SOFTWARE

Python was created in the early 1990s by Guido van Rossum at Stichting Mathematisch Centrum (CWI, see <http://www.cwi.nl>) in the Netherlands as a successor of a language called ABC. Guido remains Python's principal author, although it includes many contributions from others.

In 1995, Guido continued his work on Python at the Corporation for National Research Initiatives (CNRI, see <http://www.cnri.reston.va.us>) in Reston, Virginia where he released several versions of the software.

In May 2000, Guido and the Python core development team moved to BeOpen.com to form the BeOpen PythonLabs team. In October of the same year, the PythonLabs team moved to Digital Creations (now Zope Corporation, see <http://www.zope.com>). In 2001, the Python Software Foundation (PSF, see <http://www.python.org/psf/>) was formed, a non-profit organization created specifically to own Python-related Intellectual Property. Zope Corporation is a sponsoring member of the PSF.

All Python releases are Open Source (see <http://www.opensource.org> for the Open Source Definition). Historically, most, but not all, Python releases have also been GPL-compatible; the table below summarizes the various releases.

Footnotes: (1) GPL-compatible doesn't mean that we're distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute a modified version without making your changes open source. The GPL-compatible licenses make it possible to combine Python with other software that is released under the GPL; the others don't.

(2) According to Richard Stallman, 1.6.1 is not GPL-compatible, because its license has a choice of law clause. According to CNRI, however, Stallman's lawyer has told CNRI's lawyer that 1.6.1 is "not incompatible" with the GPL.

Thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.

##### PYTHON SOFTWARE FOUNDATION LICENSE VERSION 2

1. This LICENSE AGREEMENT is between the Python Software Foundation ("PSF"), and the Individual or Organization ("Licensee") accessing and otherwise using this software ("Python") in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, PSF hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python alone or in any derivative version, provided, however, that PSF's License Agreement and PSF's notice of copyright, i.e., "**Copyright (c) 2001, 2002, 2003, 2004, 2005, 2006, 2007 Python Software Foundation; All Rights Reserved**" are retained in Python alone or in any derivative version prepared by Licensee.

3. In the event Licensee prepares a derivative work that is based on or incorporates Python or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python.

4. PSF is making Python available to Licensee on an "AS IS" basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES

Python is an interpreted, interactive object-oriented programming language suitable (amongst other uses) for distributed application development, scripting, numeric computing and system testing. Python is often compared to Tcl, Perl, Java, JavaScript, Visual Basic or Scheme. To find out more about what Python can do for you, point your browser to <http://www.python.org/>.

*From: python-2.5.1-25.fc9.src/Python-2.5.1/Python-2.5.1/Doc/commontex/license.tex*  
Python was created in the early 1990s by Guido van Rossum at Stichting Mathematisch Centrum (CWI, see [/url{http://www.cwi.nl/}](http://www.cwi.nl/)) in the Netherlands as a successor of a language called ABC. Guido remains Python's principal author, although it includes many contributions from others.

In 1995, Guido continued his work on Python at the Corporation for National Research Initiatives (CNRI, see [/url{http://www.cnri.reston.va.us/}](http://www.cnri.reston.va.us/)) in Reston, Virginia where he released several versions of the software.

In May 2000, Guido and the Python core development team moved to BeOpen.com to form the BeOpen PythonLabs team. In October of the same year, the PythonLabs team moved to Digital Creations (now Zope Corporation; see [/url{http://www.zope.com/}](http://www.zope.com/)). In 2001, the Python Software Foundation (PSF, see [/url{http://www.python.org/psf/}](http://www.python.org/psf/)) was formed, a non-profit organization created specifically to own Python-related Intellectual Property. Zope Corporation is a sponsoring member of the PSF.

All Python releases are Open Source (see [/url{http://www.opensource.org/}](http://www.opensource.org/) for the Open Source Definition). Historically, most, but not all, Python releases have also been GPL-compatible; the table below summarizes the various releases.

GPL-compatible doesn't mean that we're distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute a modified version without making your changes open source. The GPL-compatible licenses make it possible to combine Python with other software that is released under the GPL; the others don't.

Thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.

Python 2.4 license - This is the official license for the Python 2.4 release:

A. HISTORY OF THE SOFTWARE

Python was created in the early 1990s by Guido van Rossum at Stichting Mathematisch Centrum (CWI, see <http://www.cwi.nl>) in the Netherlands

document version 1.4

as a successor of a language called ABC. Guido remains Python's principal author, although it includes many contributions from others.

In 1995, Guido continued his work on Python at the Corporation for National Research Initiatives (CNRI, see <http://www.cnri.reston.va.us>) in Reston, Virginia where he released several versions of the software. In May 2000, Guido and the Python core development team moved to BeOpen.com to form the BeOpen PythonLabs team. In October of the same year, the PythonLabs team moved to Digital Creations (now Zope Corporation, see <http://www.zope.com>). In 2001, the Python Software Foundation (PSF, see <http://www.python.org/psf/>) was formed, a non-profit organization created specifically to own Python-related Intellectual Property. Zope Corporation is a sponsoring member of the PSF.

All Python releases are Open Source (see <http://www.opensource.org> for the Open Source Definition). Historically, most, but not all, Python releases have also been GPL-compatible; the table below summarizes the various releases.

Release Derived Year Owner GPL-from compatible? (1)

0.9.0 thru 1.2	1991-1995	CWI	yes	
1.3 thru 1.5.2	1.2	1995-1999	CNRI	yes

Footnotes:

(1) GPL-compatible doesn't mean that we're distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute a modified version without making your changes open source. The GPL-compatible licenses make it possible to combine Python with other software that is released under the GPL; the others don't.

(2) According to Richard Stallman, 1.6.1 is not GPL-compatible, because its license has a choice of law clause. According to CNRI, however, Stallman's lawyer has told CNRI's lawyer that 1.6.1 is "not incompatible" with the GPL. Thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.

2. Subject to the terms and conditions of this License Agreement, PSF hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python 2.4 alone or in any derivative version, provided, however, that PSF's License Agreement and PSF's notice of copyright, i.e., "**Copyright (c) 2001, 2002, 2003, 2004 Python Software Foundation; All Rights Reserved**" are retained in Python 2.4 alone or in any derivative version prepared by Licensee.

3. In the event Licensee prepares a derivative work that is based on or incorporates Python 2.4 or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python 2.4.

4. PSF is making Python 2.4 available to Licensee on an "AS IS" basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON 2.4 WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 2.4 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 2.4, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between PSF and Licensee. This License Agreement does not grant permission to use PSF trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By copying, installing or otherwise using Python 2.4, Licensee agrees to be bound by the terms and conditions of this License Agreement.

Python Software Foundation License - Python 2.1.1 license  
This is the official license for the Python 2.1.1 release:

### A. HISTORY OF THE SOFTWARE

Python was created in the early 1990s by Guido van Rossum at Stichting Mathematisch Centrum (CWI) in the Netherlands as a successor of a language called ABC. Guido is Python's principal author, although it includes many contributions from others. The last version released from CWI was Python 1.2. In 1995, Guido continued his work on Python at the Corporation for National Research Initiatives (CNRI) in Reston, Virginia where he released several versions of the software. Python 1.6 was the last of the versions released by CNRI. In 2000, Guido and the Python core development team moved to BeOpen.com to form the BeOpen PythonLabs team. Python 2.0 was the first and only release from BeOpen.com.

Following the release of Python 1.6, and after Guido van Rossum left CNRI to work with commercial software developers, it became clear that the ability to use Python with software available under the GNU Public License (GPL) was very desirable. CNRI and the Free Software Foundation (FSF) interacted to develop enabling wording changes to the Python license. Python 1.6.1 is essentially the same as Python 1.6, with a few minor bug fixes, and with a different license that enables later versions to be GPL-compatible. Python 2.1 is a derivative work of Python 1.6.1, as well as of Python 2.0.

After Python 2.0 was released by BeOpen.com, Guido van Rossum and the other PythonLabs developers joined Digital Creations. All intellectual property added from this point on, starting with Python 2.1 and its alpha and beta releases, is owned by the Python Software Foundation (PSF), a non-profit modeled after the Apache Software Foundation. See <http://www.python.org/psf/> for more information about the PSF.

Thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.

### B. TERMS AND CONDITIONS FOR ACCESSING OR OTHERWISE USING PYTHON PSF LICENSE AGREEMENT

1. This LICENSE AGREEMENT is between the Python Software Foundation ("PSF"), and the Individual or Organization ("Licensee") accessing and otherwise using Python 2.1.1 software in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, PSF hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python 2.1.1 alone or in any derivative version, provided, however, that PSF's License Agreement and PSF's notice of copyright, i.e., "**Copyright (c) 2001 Python Software Foundation; All Rights Reserved**" are retained in Python 2.1.1 alone or in any derivative version prepared by Licensee.

3. In the event Licensee prepares a derivative work that is based on or incorporates Python 2.1.1 or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python 2.1.1.

4. PSF is making Python 2.1.1 available to Licensee on an "AS IS" basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF

5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 2.1.1 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 2.1.1, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between PSF and Licensee. This License Agreement does not grant permission to use PSF trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By copying, installing or otherwise using Python 2.1.1, Licensee agrees to be bound by the terms and conditions of this License Agreement.

<b>Software:</b>	qemu
<b>Version:</b>	122208
<b>File or Package:</b>	qemu-122208.tar.bz2
<b>OSI Licenses:</b>	GPLv1+, GPLv2, GPLv2+, LGPLv2+, LGPLv2.1, LGPLv2.1+, BSDv1, BSDv2, MIT/X11
<b>Other Licenses:</b>	CYGWIN, Custom
<b>URL:</b>	
<b>Group:</b>	
<b>Description:</b>	QEMU is a processor emulator that relies on dynamic binary translation to achieve a reasonable speed while being easy to port on new host CPU architectures. In conjunction with CPU emulation, it also provides a set of device models, allowing it to run a variety of unmodified guest operating systems; it can thus be viewed as a hosted virtual machine monitor. It also provides an accelerated mode for supporting a mixture of binary translation (for kernel code) and native execution (for user code), in the same fashion as VMware Workstation and Microsoft Virtual PC.
<b>Common Usage:</b>	
<b>Package Size:</b>	20.9 MB
<b>Folders / Files:</b>	61 / 949
<b>Source Path:</b>	wrlinux-3.0/layers/wrll-wrlinux/packages

The following points clarify the QEMU license:

- 1) QEMU as a whole is released under the GNU General Public License
  - 2) Parts of QEMU have specific licenses which are compatible with the GNU General Public License. Hence each source file contains its own licensing information. In particular, the QEMU virtual CPU core library (libqemu.a) is released under the GNU Lesser General Public License.
- Many hardware device emulation sources are released under the BSD license.
- 3) The Tiny Code Generator (TCG) is released under the BSD license (see license headers in files).
  - 4) QEMU is a trademark of Fabrice Bellard.

Slirp was written by Danny Gasparovski.

**Copyright (c), 1995,1996 All Rights Reserved.**

Slirp is maintained by Kelly Price <tygris+slirp@erols.com>

Slirp is free software; "free" as in you don't have to pay for it, and you are free to do whatever you want with it. I do not accept any donations, monetary or otherwise, for Slirp. Instead, I would ask you to pass this potential donation to your favorite charity. In fact, I encourage everyone who finds Slirp useful to make a small donation to their favorite charity (for example, GreenPeace). This is not a requirement, but a suggestion from someone who highly values the service they provide. The copyright terms and conditions:

This basically means you can do anything you want with the software, except 1) call it your own, and 2) claim warranty on it. There is no warranty for this software. None. Nada. If you lose a million dollars while using Slirp, that's your loss not mine. So, USE AT YOUR OWN RISK!. If these conditions cannot be met due to legal restrictions (E.g. where it is against the law to give out Software without warranty), you must cease using the software and delete all copies you have.

MagniComp - End User License Agreement [www.MagniComp.com](http://www.MagniComp.com)  
RDist Version 6.1, Version of This Document: 19990724

GRANT. MagniComp grants you a non-exclusive license to use RDist version 6.1 and all subsequent versions called 6.1.X software (the "Software") free of charge.

This license does not entitle you to hard-copy documentation, support or telephone assistance. MagniComp reserves the right at any time to alter prices, features, specifications, capabilities, functions, licensing terms, general availability of the Software.

SCOPE OF GRANT.

You may: use the Software in any way you wish on any computer regardless of ownership of said computer; redistribute the Software in any form, including source and binary, to any party with or without charging a fee; copy the Software for any purpose.

You may not: remove or alter this notice; remove or alter any proprietary notices or labels on the Software.

REQUIREMENTS. All advertising materials mentioning features or use of this software must display the following acknowledgement: This product includes software developed by MagniComp ([www.MagniComp.com](http://www.MagniComp.com)) and its contributors.

Redistributions in binary form must reproduce this copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution. Neither name of MagniComp nor the names of its contributors may be used to endorse or promote products derived from this software without specific prior written permission.

TITLE. Title, ownership rights, and intellectual property rights in the Software shall remain in MagniComp and/or its suppliers. The Software is protected by copyright and other intellectual property laws and by international treaties. Title and related rights in the content accessed through the Software is the property of the applicable content owner and may be protected by applicable law. This license gives you no rights to such content.

TERMINATION. The license will terminate automatically if you fail to comply with the limitations described herein. Upon termination of this license, you agree to destroy all copies of the Software.

DISCLAIMER OF WARRANTY. The Software is provided on an "AS IS" basis, without warranty of any kind, including without limitation the warranties of merchantability, fitness for a particular purpose and non-infringement. The entire risk as to the quality and performance of the Software is borne by you. Should the Software prove defective, you and not MagniComp or its suppliers assume the entire cost of any service and repair. In addition, the security mechanisms implemented by MagniComp software have inherent limitations, and you must determine that the

© 2009 Wind River Systems, Inc.

Software sufficiently meets your requirements. This disclaimer of warranty constitutes an essential part of the agreement.

SOME JURISDICTIONS DO NOT ALLOW EXCLUSIONS OF AN IMPLIED WARRANTY, SO THIS DISCLAIMER MAY NOT APPLY TO YOU AND YOU MAY HAVE OTHER LEGAL RIGHTS THAT VARY BY JURISDICTION.

LIMITATION OF LIABILITY. UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, TORT, CONTRACT, OR OTHERWISE, SHALL MAGNICOOMP OR ITS SUPPLIERS OR RESELLERS BE LIABLE TO YOU OR ANY OTHER PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES.

IN NO EVENT WILL MAGNICOOMP BE LIABLE FOR ANY DAMAGES, EVEN IF MAGNICOOMP SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES, OR FOR ANY CLAIM BY ANY OTHER PARTY. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. FURTHERMORE, SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS LIMITATION AND EXCLUSION MAY NOT APPLY TO YOU.

HIGH RISK ACTIVITIES. The Software is not fault-tolerant and is not designed, manufactured or intended for use or resale as on-line control equipment in hazardous environments requiring fail-safe performance, such as in the operation of nuclear facilities, aircraft navigation or communication systems, air traffic control, direct life support machines, or weapons systems, in which the failure of the Software could lead directly to death, personal injury, or severe physical or environmental damage ("High Risk Activities"). MagniComp and its suppliers specifically disclaim any express or implied warranty of fitness for High Risk Activities.

MISCELLANEOUS. This Agreement represents the complete agreement concerning this license and may amended only by a writing executed by both parties. If any provision of this Agreement is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This Agreement shall be governed by California law (except for conflict of law provisions). The application the United Nations Convention of Contracts for the International Sale of Goods is expressly excluded.

### NOTICES:

*From:RMI-bootloader-1.6-*

*0.noarch/opt/rmi/1.6/bootloader/src/doc/license.txt*

The Bootloader source has both proprietary (developed at RMI) and GPL code. While the proprietary code is compiled as bootloader executable, the GPL code is compiled as modules. The modules are dynamically linked into the bootloader during runtime. All code under the directory rmiboot/modules/, except for the build system (Makefiles and other scripts), is non-proprietary code.

<b>Description:</b>	The RPM Package Manager (RPM) is a powerful command line driven package management system capable of installing, uninstalling, verifying, querying, and updating computer software packages. Each software package consists of an archive of files along with information about the package like its version, a description, and the like. There is also a library API, permitting advanced developers to manage such transactions from programming languages such as C or Python.

This is the copyright holder that gets inserted into the header of the \$(DOMAIN).pot file. Set this to the copyright holder of the surrounding package. (Note that the msgstr strings, extracted from the package's sources, belong to the copyright holder of the package.) Translators are expected to transfer the copyright for their translations to this person or entity, or to disclaim their copyright. The empty string stands for the public domain; in this case the translators are expected to disclaim their copyright.

**Group:**  
**Description:**

ruby-1.9.1-p0.tar.gz  
Development/Languages  
Ruby is the interpreted scripting language for quick and easy object-oriented programming. It has many features to process text files and to do system management tasks (as in Perl). It is simple, straight-forward, and extensible. Ruby is a dynamic, reflective, general purpose object-oriented programming language that combines syntax inspired by Perl with Smalltalk-like features. It is based on Perl, Smalltalk, Eiffel, Ada, and Lisp. Ruby supports multiple programming paradigms, including functional, object oriented, imperative and reflective. It also has a dynamic type system and automatic memory management; it is therefore similar in varying respects to Python, Perl, Lisp, Dylan, and CLU.

random.c - This file is under the new-style BSD license. A C-program for MT19937, with initialization improved 2002/2/10. Coded by Takuji Nishimura and Makoto Matsumoto. This is a faster version by taking Shawn Cokus's optimization, Matthe Bellew's simplification, Isaku Wada's real version. Before using, initialize the state by using `init_genrand(seed)` or `init_by_array(init_key, key_length)`.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

1. You may make and give away verbatim copies of the source form of the software without restriction, provided that you duplicate all of the original copyright notices and associated disclaimers.

2. You may modify your copy of the software in any way, provided that you do at least ONE of the following:

a) place your modifications in the Public Domain or otherwise make them Freely Available, such as by posting said modifications to Usenet or an equivalent medium, or by allowing the author to include your modifications in the software.

b) use the modified software only within your corporation or organization.

c) give non-standard binaries non-standard names, with instructions on where to get the original software distribution.

d) make other distribution arrangements with the author.

3. You may distribute the software in object code or binary form, provided that you do at least ONE of the following:

a) distribute the binaries and library files of the software, together with instructions (in the manual page or equivalent) on where to get the original distribution.

b) accompany the distribution with the machine-readable source of the software.

c) give non-standard binaries non-standard names, with instructions on where to get the original software distribution.

d) make other distribution arrangements with the author.

4. You may modify and include the part of the software into any other software (possibly commercial). But some files in the distribution are not written by the author, so that they are not under these terms. For the list of those files and their copying conditions, see the file LEGAL.

5. The scripts and library files supplied as input to or produced as output from the software do not automatically fall under the copyright of the software, but belong to whomever generated them, and may be sold commercially, and may be aggregated with this software.

c) rename any non-standard executables so the names do not conflict with standard executables, which must also be provided.

d) make other distribution arrangements with the author.

3. You may distribute the software in object code or executable form, provided that you do at least ONE of the following:

a) distribute the executables and library files of the software, together with instructions (in the manual page or equivalent) on where to get the original distribution.

b) accompany the distribution with the machine-readable source of the software.

c) give non-standard executables non-standard names, with instructions on where to get the original software distribution.

d) make other distribution arrangements with the author.

4. You may modify and include the part of the software into any other software (possibly commercial).

Incorporated code -

(i) Support for the TIGER cryptographic checksum algorithm is provided by the reference implementation, which includes the following statement:

**Tiger: A Fast New Hash Function**  
**Ross Anderson and Eli Biham**

Tiger has no usage restrictions nor patents. It can be used freely, with the reference implementation, with other implementations or with a modification to the reference implementation (as long as it still implements Tiger). We only ask you to let us know about your implementation and to cite the origin of Tiger and of the reference implementation.

The authors' home pages can be found both in <http://www.cs.technion.ac.il/~biham/> and in <http://www.cl.cam.ac.uk/users/rja14/>. The authors' email addresses are [biham@cs.technion.ac.il](mailto:biham@cs.technion.ac.il) and [rja14@cl.cam.ac.uk](mailto:rja14@cl.cam.ac.uk).

(ii) Support for testing write access by untrusted users to any element in the path of a file is provided by the public domain trustfile library, which includes the following statement:

Author information:

**Matt Bishop**  
Department of Computer Science  
University of California at Davis  
Davis, CA 95616-8562  
phone (916) 752-8060  
email [bishop@cs.ucdavis.edu](mailto:bishop@cs.ucdavis.edu)

This code is placed in the public domain. I do ask that you keep my name associated with it, that you not represent it as written by you, and that you

preserve these comments. This software is provided "as is" and without any guarantees of any sort.

(iii) Support for big integer arithmetic is provided by the bignum package (v. 1.2) by **Henrik Johansson**@Nexus.Comm.SE, which includes the following statement:

Everyone is allowed to distribute this package to anyone else, as long as all changes are recorded and mentioned. If you are including this in a commercial product, be sure to distribute `_all_` of the package with the product.

(...writing more stuff here later, but I guess everyone knows the approximate contents of it - no warranty, no charge, and so on. I guess it is like the GNU concept. Read that for further details...)

(iv) Support for compression is provided by the (mini) LZO library, which includes the following statement:

**Copyright (C) 1999 Markus Franz Xavier Johannes Oberhumer**  
**Copyright (C) 1998 Markus Franz Xavier Johannes Oberhumer**  
**Copyright (C) 1997 Markus Franz Xavier Johannes Oberhumer**

(vi) Support for the SHA-1 hash algorithm is provided by code from mhash which includes the following statement:

sha.c - Implementation of the Secure Hash Algorithm  
**Copyright (C) 1995, A.M. Kuchling**

Distribute and use freely; there are no restrictions on further dissemination and usage except those imposed by the laws of your country of residence.

SHA: NIST's Secure Hash Algorithm  
Based on SHA code originally posted to sci.crypt by Peter Gutmann in message <30ajo5\$oe8@ccu2.auckland.ac.nz>. Modified to test for endianness on creation of SHA objects by AMK. Also, the original specification of SHA was found to have a weakness by NSA/NIST. This code implements the fixed version of SHA.

(vii) Support for AVL Trees is provided by code from AVLTree which includes the following statement:

Depending on the compilation options used, samhain may use the SRP authentication algorithm (in an independent implementation, without any use of code from the SRP software). The original SRP software contains the following license statement:

The SRP License - SRP and all related technologies are free for both commercial and non-commercial use. They are distributed under a standard X11-style Open Source license which is shown below.

The SRP distribution contains parts from various freeware packages; these parts fall under both the SRP Open Source license and any existing licenses. Care has been taken to ensure that these licenses are compatible with Open Source distribution, but it is the responsibility of the licensee to comply with these licenses. The file "Copyrights" contains a list of the copyrights incorporated by portions of the software.

In addition, the following conditions apply:

1. Any software that incorporates the SRP authentication technology must display the following acknowledgment: "This product uses the 'Secure Remote Password' cryptographic authentication system developed by Tom Wu (tjw@CS.Stanford.EDU)."

2. Any software that incorporates all or part of the SRP distribution itself must also display the following acknowledgment: "This product includes software developed by **Tom Wu and Eugene Jhong** for the SRP Distribution (<http://srp.stanford.edu/srp/>)."

Arc4 random number generator for OpenBSD.

This code is derived from section 17.1 of Applied Cryptography, second edition, which describes a stream cipher allegedly compatible with RSA Labs "RC4" cipher (the actual description of which is a trade secret). The same algorithm is used as a stream cipher called "arcfour" in Tatu Ylonen's ssh package. Here the stream cipher has been modified always to include the time when initializing the state. That makes it impossible to regenerate the same random sequence twice, so this can't be used for encryption, but will generate good random numbers. RC4 is a registered trademark of RSA Laboratories.

This is a version (aka dlmalloc) of malloc/free/realloc written by **Doug Lea** and released to the public domain. Use, modify, and redistribute this code without permission or acknowledgement in any way you wish. Send questions, comments, complaints, performance data, etc to dl@cs.oswego.edu

## sapwood

<b>Software:</b>	sapwood
<b>Version:</b>	2.91.4-1ubuntu3
<b>File or Package:</b>	sapwood_2.91.4-1ubuntu3.tar.gz
<b>OSI Licenses:</b>	LGPLv2, LGPLv2+
<b>Other Licenses:</b>	Custom
<b>URL:</b>	
<b>Group:</b>	X11
<b>Description:</b>	Sapwood is a pixbuf-based 'theme' that allows you to configure the look of GTK-using programs. The programs need no modifications to use themes; the support is built into GTK+. The engine is similar to the pixbuf engine, but uses client-server design and pixmaps rather than pixbufs. It is faster and more memory efficient than the pixbuf engine, but doesn't do scaling or gradients.
<b>Common Usage:</b>	Theme
<b>Package Size:</b>	2.2 MB
<b>Folders / Files:</b>	78 / 210
<b>Source Path:</b>	wrlinux-3.0/layers/wrll-wrlinux/packages

APPLE PUBLIC SOURCE LICENSE Version 2.0 - August 6, 2003

Please read this License carefully before downloading this software. By downloading or using this software, you are agreeing to be bound by the terms of this License. If you do not or cannot agree to the terms of this License, please do not download or use the software.

Apple Note: In January 2007, Apple changed its corporate name from "Apple Computer, Inc." to "Apple Inc." This change has been reflected below and copyright years updated, but no other changes have been made to the APSL 2.0.

1. General; Definitions. This License applies to any program or other work which Apple Inc. ("Apple") makes publicly available and which contains a notice placed by Apple identifying such program or work as "Original Code" and stating that it is subject to the terms of this Apple Public Source License version 2.0 ("License"). As used in this License:

1.1 "Applicable Patent Rights" mean:

(a) in the case where Apple is the grantor of rights,

(i) claims of patents that are now or hereafter acquired, owned by or assigned to Apple and

(ii) that cover subject matter contained in the Original Code, but only to the extent necessary to use, reproduce and/or distribute the Original Code without infringement; and

(b) in the case where You are the grantor of rights,

(i) claims of patents that are now or hereafter acquired, owned by or assigned to You and

(ii) that cover subject matter in Your Modifications, taken alone or in combination with Original Code.

document version 1.4

1.2 "Contributor" means any person or entity that creates or contributes to the creation of Modifications.

1.3 "Covered Code" means the Original Code, Modifications, the combination of Original Code and any Modifications, and/or any respective portions thereof.

1.4 "Externally Deploy" means: (a) to sublicense, distribute or otherwise make Covered Code available, directly or indirectly, to anyone other than You; and/or (b) to use Covered Code, alone or as part of a Larger Work, in any way to provide a service, including but not limited to delivery of content, through electronic communication with a client other than You.

1.5 "Larger Work" means a work which combines Covered Code or portions thereof with code not governed by the terms of this License.

1.6 "Modifications" mean any addition to, deletion from, and/or change to, the substance and/or structure of the Original Code, any previous Modifications, the combination of Original Code and any previous Modifications, and/or any respective portions thereof. When code is released as a series of files, a Modification is: (a) any addition to or deletion from the contents of a file containing Covered Code; and/or (b) any new file or other representation of computer program statements that contains any part of Covered Code.

1.7 "Original Code" means

(a) the Source Code of a program or other work as originally made available by Apple under this License, including the Source Code of any updates or upgrades to such programs or works made available by Apple under this License, and that has been expressly identified by Apple as such in the header file(s) of such work; and

(b) the object code compiled from such Source Code and originally made available by Apple under this License

1.8 "Source Code" means the human readable form of a program or other work that is suitable for making modifications to it, including all modules it contains, plus any associated interface definition files, scripts used to control compilation and installation of an executable (object code).

1.9 "You" or "Your" means an individual or a legal entity exercising rights under this License. For legal entities, "You" or "Your" includes any entity which controls, is controlled by, or is under common control with, You, where "control" means

(a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or

(b) ownership of fifty percent (50%) or more of the outstanding shares or beneficial ownership of such entity.

2. Permitted Uses; Conditions & Restrictions. Subject to the terms and conditions of this License, Apple hereby grants You, effective on the date You accept this License and download the Original Code, a world-wide, royalty-free, non-exclusive license, to the extent of Apple's Applicable Patent Rights and copyrights covering the Original Code, to do the following:

2.1 Unmodified Code. You may use, reproduce, display, perform, internally distribute within Your organization, and Externally Deploy verbatim, unmodified copies of the Original Code, for commercial or non-commercial purposes, provided that in each instance:

(a) You must retain and reproduce in all copies of Original Code the copyright and other proprietary notices and disclaimers of Apple as they appear in the Original Code, and keep intact all notices in the Original Code that refer to this License; and

(b) You must include a copy of this License with every copy of Source Code of Covered Code and documentation You distribute or Externally Deploy, and You may not offer or impose any terms on such Source Code that alter or restrict this License or the recipients' rights hereunder, except as permitted under Section 6.

2.2 Modified Code. You may modify Covered Code and use, reproduce, display, perform, internally distribute within Your organization, and Externally Deploy Your Modifications and Covered Code, for commercial or non-commercial purposes, provided that in each instance You also meet all of these conditions:

(a) You must satisfy all the conditions of Section 2.1 with respect to the Source Code of the Covered Code;

(b) You must duplicate, to the extent it does not already exist, the notice in Exhibit A in each file of the Source Code of all Your Modifications, and cause the modified files to carry prominent notices stating that You changed the files and the date of any change; and

(c) If You Externally Deploy Your Modifications, You must make Source Code of all Your Externally Deployed Modifications either available to those to whom You have Externally Deployed Your Modifications, or publicly available. Source Code of Your Externally Deployed Modifications must be released under the terms set forth in this License, including the license grants set forth in Section 3 below, for as long as you Externally Deploy the Covered Code or twelve (12) months from the date of initial External Deployment, whichever is longer. You should preferably distribute the Source Code of Your Externally Deployed Modifications electronically (e.g. download from a web site).

2.3 Distribution of Executable Versions. In addition, if You Externally Deploy Covered Code (Original Code and/or Modifications) in object code, executable form only, You must include a prominent notice, in the code itself as well as in related documentation, stating that Source Code of the Covered Code is available under the terms of this License with information on how and where to obtain such Source Code.

2.4 Third Party Rights. You expressly acknowledge and agree that although Apple and each Contributor grants the licenses to their respective portions of the Covered Code set forth herein, no assurances are provided by Apple or any Contributor that the Covered Code does not infringe the patent or other intellectual property rights of any other entity. Apple and each Contributor disclaim any liability to You for claims brought by any other entity based on infringement of intellectual property rights or otherwise. As a condition to exercising the rights and licenses granted hereunder, You hereby assume sole responsibility to secure any other intellectual property rights needed, if any. For example, if a third party patent license is required to allow You to distribute the Covered Code, it is Your responsibility to acquire that license before distributing the Covered Code.

3. Your Grants. In consideration of, and as a condition to, the licenses granted to You under this License, You hereby grant to any person or

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system or board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

entity receiving or distributing Covered Code under this License a non-exclusive, royalty-free, perpetual, irrevocable license, under Your Applicable Patent Rights and other intellectual property rights (other than patent) owned or controlled by You, to use, reproduce, display, perform, modify, sublicense, distribute and Externally Deploy Your Modifications of the same scope and extent as Apple's licenses under Sections 2.1 and 2.2 above.

4. Larger Works. You may create a Larger Work by combining Covered Code with other code not governed by the terms of this License and distribute the Larger Work as a single product. In each such instance, You must make sure the requirements of this License are fulfilled for the Covered Code or any portion thereof.

5. Limitations on Patent License. Except as expressly stated in Section 2, no other patent rights, express or implied, are granted by Apple herein. Modifications and/or Larger Works may require additional patent licenses from Apple which Apple may grant in its sole discretion.

6. Additional Terms. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations and/or other rights consistent with the scope of the license granted herein ("Additional Terms") to one or more recipients of Covered Code. However, You may do so only on Your own behalf and as Your sole responsibility, and not on behalf of Apple or any Contributor. You must obtain the recipient's agreement that any such Additional Terms are offered by You alone, and You hereby agree to indemnify, defend and hold Apple and every Contributor harmless for any liability incurred by or claims asserted against Apple or such Contributor by reason of any such Additional Terms.

7. Versions of the License. Apple may publish revised and/or new versions of this License from time to time. Each version will be given a distinguishing version number. Once Original Code has been published under a particular version of this License, You may continue to use it under the terms of that version. You may also choose to use such Original Code under the terms of any subsequent version of this License published by Apple. No one other than Apple has the right to modify the terms applicable to Covered Code created under this License.

8. NO WARRANTY OR SUPPORT. The Covered Code may contain in whole or in part pre-release, untested, or not fully tested works. The Covered Code may contain errors that could cause failures or loss of data, and may be incomplete or contain inaccuracies. You expressly acknowledge and agree that use of the Covered Code, or any portion thereof, is at Your sole and entire risk.

THE COVERED CODE IS PROVIDED "AS IS" AND WITHOUT WARRANTY, UPGRADES OR SUPPORT OF ANY KIND AND APPLE AND APPLE'S LICENSOR(S) (COLLECTIVELY REFERRED TO AS "APPLE" FOR THE PURPOSES OF SECTIONS 8 AND 9) AND ALL CONTRIBUTORS EXPRESSLY DISCLAIM ALL WARRANTIES AND/OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES AND/OR CONDITIONS OF MERCHANTABILITY, OF SATISFACTORY QUALITY, OF FITNESS FOR A PARTICULAR PURPOSE, OF ACCURACY, OF QUIET ENJOYMENT, AND NONINFRINGEMENT OF THIRD PARTY RIGHTS.

APPLE AND EACH CONTRIBUTOR DOES NOT WARRANT AGAINST INTERFERENCE WITH YOUR ENJOYMENT OF THE COVERED CODE, THAT THE FUNCTIONS CONTAINED IN THE COVERED CODE WILL MEET YOUR REQUIREMENTS, THAT THE OPERATION OF THE COVERED CODE WILL BE UNINTERRUPTED OR ERROR-FREE, OR THAT DEFECTS IN THE COVERED CODE WILL BE CORRECTED. NO ORAL OR WRITTEN INFORMATION OR ADVICE GIVEN BY APPLE,

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system or board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

AN APPLE AUTHORIZED REPRESENTATIVE OR ANY CONTRIBUTOR SHALL CREATE A WARRANTY.

You acknowledge that the Covered Code is not intended for use in the operation of nuclear facilities, aircraft navigation, communication systems, or air traffic control machines in which case the failure of the Covered Code could lead to death, personal injury, or severe physical or environmental damage.

#### 9. LIMITATION OF LIABILITY.

TO THE EXTENT NOT PROHIBITED BY LAW, IN NO EVENT SHALL APPLE OR ANY CONTRIBUTOR BE LIABLE FOR ANY INCIDENTAL, SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES ARISING OUT OF OR RELATING TO THIS LICENSE OR YOUR USE OR INABILITY TO USE THE COVERED CODE, OR ANY PORTION THEREOF, WHETHER UNDER A THEORY OF CONTRACT, WARRANTY, TORT (INCLUDING NEGLIGENCE), PRODUCTS LIABILITY OR OTHERWISE, EVEN IF APPLE OR SUCH CONTRIBUTOR HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES AND NOTWITHSTANDING THE FAILURE OF ESSENTIAL PURPOSE OF ANY REMEDY. SOME JURISDICTIONS DO NOT ALLOW THE LIMITATION OF LIABILITY OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS LIMITATION MAY NOT APPLY TO YOU.

In no event shall Apple's total liability to You for all damages (other than as may be required by applicable law) under this License exceed the amount of fifty dollars (\$50.00).

10. Trademarks. This License does not grant any rights to use the trademarks or trade names "Apple", "Mac", "Mac OS", "QuickTime", "QuickTime Streaming Server" or any other trademarks, service marks, logos or trade names belonging to Apple (collectively "Apple Marks") or to any trademark, service mark, logo or trade name belonging to any Contributor. You agree not to use any Apple Marks in or as part of the name of products derived from the Original Code or to endorse or promote products derived from the Original Code other than as expressly permitted by and in strict compliance at all times with Apple's third party trademark usage guidelines which are posted at <http://www.apple.com/legal/guidelinesfor3rdparties.html>.

11. Ownership. Subject to the licenses granted under this License, each Contributor retains all rights, title and interest in and to any Modifications made by such Contributor. Apple retains all rights, title and interest in and to the Original Code and any Modifications made by or on behalf of Apple ("Apple Modifications"), and such Apple Modifications will not be automatically subject to this License. Apple may, at its sole discretion, choose to license such Apple Modifications under this License, or on different terms from those contained in this License or may choose not to license them at all.

#### 12. Termination.

12.1 Termination. This License and the rights granted hereunder will terminate:

(a) automatically without notice from Apple if You fail to comply with any term(s) of this License and fail to cure such breach within 30 days of becoming aware of such breach;

(b) immediately in the event of the circumstances described in Section 13.5(b); or

(c) automatically without notice from Apple if You, at any time during the term of this License, commence an action for patent infringement against Apple; provided that Apple did not first

document version 1.4

commence an action for patent infringement against You in that instance.

12.2 Effect of Termination. Upon termination, You agree to immediately stop any further use, reproduction, modification, sublicensing and distribution of the Covered Code. All sublicenses to the Covered Code which have been properly granted prior to termination shall survive any termination of this License. Provisions which, by their nature, should remain in effect beyond the termination of this License shall survive, including but not limited to Sections 3, 5, 8, 9, 10, 11, 12.2 and 13. No party will be liable to any other for compensation, indemnity or damages of any sort solely as a result of terminating this License in accordance with its terms, and termination of this License will be without prejudice to any other right or remedy of any party.

### 13. Miscellaneous.

13.1 Government End Users. The Covered Code is a "commercial item" as defined in FAR 2.101. Government software and technical data rights in the Covered Code include only those rights customarily provided to the public as defined in this License. This customary commercial license in technical data and software is provided in accordance with FAR 12.211 (Technical Data) and 12.212 (Computer Software) and, for Department of Defense purchases, DFAR 252.227-7015 (Technical Data -- Commercial Items) and 227.7202-3 (Rights in Commercial Computer Software or Computer Software Documentation). Accordingly, all U.S. Government End Users acquire Covered Code with only those rights set forth herein.

13.2 Relationship of Parties. This License will not be construed as creating an agency, partnership, joint venture or any other form of legal association between or among You, Apple or any Contributor, and You will not represent to the contrary, whether expressly, by implication, appearance or otherwise.

13.3 Independent Development. Nothing in this License will impair Apple's right to acquire, license, develop, have others develop for it, market and/or distribute technology or products that perform the same or similar functions as, or otherwise compete with, Modifications, Larger Works, technology or products that You may develop, produce, market or distribute.

13.4 Waiver; Construction. Failure by Apple or any Contributor to enforce any provision of this License will not be deemed a waiver of future enforcement of that or any other provision. Any law or regulation which provides that the language of a contract shall be construed against the drafter will not apply to this License.

13.5 Severability. (a) If for any reason a court of competent jurisdiction finds any provision of this License, or portion thereof, to be unenforceable, that provision of the License will be enforced to the maximum extent permissible so as to effect the economic benefits and intent of the parties, and the remainder of this License will continue in full force and effect. (b) Notwithstanding the foregoing, if applicable law prohibits or restricts You from fully and/or specifically complying with Sections 2 and/or 3 or prevents the enforceability of either of those Sections, this License will immediately terminate and You must immediately discontinue any use of the Covered Code and destroy all copies of it that are in your possession or control.

13.6 Dispute Resolution. Any litigation or other dispute resolution between You and Apple relating to this License shall take place in the Northern District of California, and You and Apple hereby consent to the personal jurisdiction of, and venue in, the state and federal courts within that District with respect to this License. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded.

This library allows you to use TrueType fonts to render text in SDL applications. Be careful when including fonts with your application, as many of them are copyrighted. The Microsoft fonts, for example, are not freely redistributable and even the free "web" fonts they provide are only redistributable in their special executable installer form (May 1998). There are plenty of freeware and shareware fonts available on the Internet though, and may suit your purposes.

This library is available under the GNU Library General Public License, see the file "COPYING" for details. Enjoy!

Note that this feature is covered by several Microsoft patents and should not be activated in any default build of the library. Note that there are important patent issues related to the use of the interpreter. By undefining this, you will only compile the code necessary to load TrueType glyphs without hinting.

If you define TT\_CONFIG\_OPTION\_UNPATENTED\_HINTING, a special version of the TrueType bytecode interpreter is used that doesn't implement any of the patented opcodes and algorithms.

<b>Group:</b>	Applications/Text
<b>Description:</b>	A GNU stream text editor; sed (Stream Editor) is a Unix utility which (a) parses text files and (b) implements a programming language which can apply textual transformations to such files. It reads input files line by line (sequentially), applying the operation which has been specified via the command line (or a sed script), and then outputs the line. GNU sed adds several new features, the most well-known being in-place editing of files (i.e., replace the original file with the result of applying the sed program).

PCRE LICENCE - PCRE is a library of functions to support regular expressions whose syntax and semantics are as close as possible to those of the Perl 5 language.

Permission is granted to anyone to use this software for any purpose on any computer system, and to redistribute it freely, subject to the following restrictions:

1. This software is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE.

document version 1.4

2. The origin of this software must not be misrepresented, either by explicit claim or by omission. In practice, this means that if you use PCRE in software that you distribute to others, commercially or otherwise, you must put a sentence like this "Regular expression support is provided by the PCRE library package, which is open source software, written by Philip Hazel, and **copyright by the University of Cambridge, England**" somewhere reasonably visible in your documentation and in any relevant files or online help data or similar.

A reference to the ftp site for the source, that is, to <ftp://ftp.csx.cam.ac.uk/pub/software/programming/pcre/> should also be given in the documentation. However, this condition is not intended to apply to whole chains of software. If package A includes PCRE, it must acknowledge it, but if package B is software that includes package A, the condition is not imposed on package B (unless it uses PCRE independently).

3. Altered versions must be plainly marked as such, and must not be misrepresented as being the original software.

4. If PCRE is embedded in any software that is released under the GNU General Purpose Licence (GPL), or Lesser General Purpose Licence (LGPL), then the terms of that licence shall supersede any condition above with which it is incompatible. The documentation for PCRE, supplied in the "doc" directory, is distributed under the same terms as the software itself.

SENDMAIL LICENSE - The following license terms and conditions apply, unless a different license is obtained from Sendmail, Inc., 6425 Christie Ave, Fourth Floor, Emeryville, CA 94608, USA, or by electronic mail at [license@sendmail.com](mailto:license@sendmail.com).

License Terms: Use, Modification and Redistribution (including distribution of any modified or derived work) in source and binary forms is permitted only if each of the following conditions is met:

1. Redistributions qualify as "freeware" or "Open Source Software" under one of the following terms:

(a) Redistributions are made at no charge beyond the reasonable cost of materials and delivery.

(b) Redistributions are accompanied by a copy of the Source Code or by an irrevocable offer to provide a copy of the Source Code for up to three years at the cost of materials and delivery. Such redistributions must allow further use, modification, and redistribution of the Source Code under substantially the same terms as this license. For the purposes of redistribution "Source

Code" means the complete compilable and linkable source code of sendmail including all modifications.

2. Redistributions of source code must retain the copyright notices as they appear in each source code file, these license terms, and the disclaimer/limitation of liability set forth as paragraph 6 below.

3. Redistributions in binary form must reproduce the Copyright Notice, these license terms, and the disclaimer/limitation of liability set forth as paragraph 6 below, in the documentation and/or other materials provided with the distribution. For the purposes of binary distribution the "Copyright Notice" refers to the following language: "Copyright (c) 1998-2004 Sendmail, Inc. All rights reserved."

4. Neither the name of Sendmail, Inc. nor the University of California nor the names of their contributors may be used to endorse or promote products derived from this software without specific prior written permission. The name "sendmail" is a trademark of Sendmail, Inc.

5. All redistributions must comply with the conditions imposed by the University of California on certain embedded code, whose copyright notice and conditions for redistribution are as follows:

(a) **Copyright (c) 1988, 1993 The Regents of the University of California. All rights reserved.**

(b) Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

(i) Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.

(ii) Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

(iii) Neither the name of the University nor the names of its contributors may be used to endorse or promote products derived from this software without specific prior written permission.

6. Disclaimer/Limitation of Liability: THIS SOFTWARE IS PROVIDED BY SENDMAIL, INC. AND CONTRIBUTORS "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED.

IN NO EVENT SHALL SENDMAIL, INC., THE REGENTS OF THE UNIVERSITY OF CALIFORNIA OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Since sendmail 8.11 and later includes hooks to cryptography, the following information from OpenSSL applies to sendmail as well.

PLEASE REMEMBER THAT EXPORT/IMPORT AND/OR USE OF STRONG CRYPTOGRAPHY SOFTWARE, PROVIDING CRYPTOGRAPHY HOOKS OR EVEN JUST COMMUNICATING TECHNICAL DETAILS ABOUT CRYPTOGRAPHY SOFTWARE IS ILLEGAL IN SOME PARTS OF THE WORLD.

SO, WHEN YOU IMPORT THIS PACKAGE TO YOUR COUNTRY, REDISTRIBUTE IT FROM THERE OR EVEN JUST EMAIL TECHNICAL SUGGESTIONS OR EVEN SOURCE PATCHES TO THE AUTHOR OR OTHER PEOPLE YOU ARE STRONGLY ADVISED TO PAY CLOSE ATTENTION TO ANY EXPORT/IMPORT AND/OR USE LAWS WHICH APPLY TO YOU. THE AUTHORS ARE NOT LIABLE FOR ANY VIOLATIONS YOU MAKE HERE. SO BE CAREFUL, IT IS YOUR RESPONSIBILITY.

If you use OpenSSL then make sure you read their README file which contains information about patents etc.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

This document is freely plagiarised from the 'Artistic Licence', distributed as part of the Perl v4.0 kit by Larry Wall, which is available from most major archive sites. I stole it from CrackLib.

This documents purpose is to state the conditions under which this Package (See definition below) viz: "Shadow", the Shadow Password Suite which is held by Julianne Frances Haugh, may be copied, such that the copyright holder maintains some semblance of artistic control over the development of the package, while giving the users of the package the right to use and distribute the Package in a more-or-less customary fashion, plus the right to make reasonable modifications. So there.

#### Definitions:

A "Package" refers to the collection of files distributed by the Copyright Holder, and derivatives of that collection of files created through textual modification, or segments thereof.

"Standard Version" refers to such a Package if it has not been modified, or has been modified in accordance with the wishes of the Copyright Holder.

"Copyright Holder" is whoever is named in the copyright or copyrights for the package.

"You" is you, if you're thinking about copying or distributing this Package.

"Reasonable copying fee" is whatever you can justify on the basis of media cost, duplication charges, time of people involved, and so on. (You will not be required to justify it to the Copyright Holder, but only to the computing community at large as a market that must bear the fee.)

"Freely Available" means that no fee is charged for the item itself, though there may be fees involved in handling the item. It also means that recipients of the item may redistribute it under the same conditions they received it.

1. You may make and give away verbatim copies of the source form of the Standard Version of this Package without restriction, provided that you duplicate all of the original copyright notices and associated disclaimers.

2. You may apply bug fixes, portability fixes and other modifications derived from the Public Domain or from the Copyright Holder. A Package modified in such a way shall still be considered the Standard Version.

3. You may otherwise modify your copy of this Package in any way, provided that you insert a prominent notice in each changed file stating how and when AND WHY you changed that file, and provided that you do at least ONE of the following:

a) place your modifications in the Public Domain or otherwise make them Freely Available, such as by posting said modifications to Usenet or an equivalent medium, or placing the modifications on a major archive site such as uunet.uu.net, or by allowing the Copyright Holder to include your modifications in the Standard Version of the Package.

b) use the modified Package only within your corporation or organization.

c) rename any non-standard executables so the names do not conflict with standard executables, which must also be provided, and provide separate documentation for each non-

document version 1.4

standard executable that clearly documents how it differs from the Standard Version.

d) make other distribution arrangements with the Copyright Holder.

4. You may distribute the programs of this Package in object code or executable form, provided that you do at least ONE of the following:

a) distribute a Standard Version of the executables and library files, together with instructions (in the manual page or equivalent) on where to get the Standard Version.

b) accompany the distribution with the machine-readable source of the Package with your modifications.

c) accompany any non-standard executables with their corresponding Standard Version executables, giving the non-standard executables non-standard names, and clearly documenting the differences in manual pages (or equivalent), together with instructions on where to get the Standard Version.

d) make other distribution arrangements with the Copyright Holder.

5. You may charge a reasonable copying fee for any distribution of this Package. You may charge any fee you choose for support of this Package. YOU MAY NOT CHARGE A FEE FOR THIS PACKAGE ITSELF. However, you may distribute this Package in aggregate with other (possibly commercial) programs as part of a larger (possibly commercial) software distribution provided that YOU DO NOT ADVERTISE this package as a product of your own.

6. The name of the Copyright Holder may not be used to endorse or promote products derived from this software without specific prior written permission.

7. THIS PACKAGE IS PROVIDED "AS IS" AND WITHOUT ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

**File or Package:** shared-mime-info-0.23-9.fc9.src.rpm  
**OSI Licenses:** GPLv2, GPLv2+ w/exception, MIT/X11  
**Other Licenses:** Custom  
**URL:** <http://download.fedora.redhat.com/pub/fedora/linux/releases/9/Fedora/source/SRPMS/shared-mime-info-0.23-9.fc9.src.rpm>  
**Group:** System Environment/Libraries  
**Description:** This is the freedesktop.org shared MIME info database. Many programs and desktops use the MIME system to represent the types of files. Frequently, it is necessary to work out the correct MIME type for a file. This is generally done by examining the file's name or contents, and looking up the correct MIME type in a database.  
**Common Usage:** Library  
**Package Size:** 4.5 MB  
**Folders / Files:** 4 / 75  
**Source Path:** wrlinux-3.0/layers/wrll-wrlinux/packages

<b>Group:</b>	
<b>Description:</b>	The SPARC Improved bootLOader (SILO) is the bootloader used by the SPARC port of the Linux operating system; it can also be used for Solaris as a replacement for the standard Solaris boot loader. SILO generally looks similar to the basic version of LILO, giving a "boot:" prompt, at which the user can press the Tab key to see the available images to boot. The configuration file format is reasonably similar to LILO's, as well as some of the command-line options. However, SILO differs significantly from LILO because it reads and parses the configuration file at boot time, so it is not necessary to re-run it after every change to the file or to the installed kernel images.

1. This LICENSE AGREEMENT is between the Python Software Foundation ("PSF"), and the Individual or Organization ("Licensee") accessing and otherwise using this software ("Python") in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, PSF hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python alone or in any derivative version, provided, however, that PSF's License Agreement and PSF's notice of copyright, i.e., "**Copyright (c) 2001, 2002, 2003, 2004, 2005, 2006 Python Software Foundation; All Rights Reserved**" are retained in Python alone or in any derivative version prepared by Licensee.

3. In the event Licensee prepares a derivative work that is based on or incorporates Python or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python.

4. PSF is making Python available to Licensee on an "AS IS" basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

#### CNRI LICENSE AGREEMENT FOR PYTHON 1.6.1

1. This LICENSE AGREEMENT is between the Corporation for National Research Initiatives, having an office at 1895 Preston White Drive, Reston, VA 20191 ("CNRI"), and the Individual or Organization ("Licensee") accessing and otherwise using Python 1.6.1 software in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, CNRI hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python 1.6.1 alone or in any derivative version, provided, however, that CNRI's License Agreement and CNRI's notice of copyright, i.e., "**Copyright (c) 1995-2001 Corporation for National Research Initiatives; All Rights Reserved**" are retained in Python 1.6.1 alone or in any derivative version prepared by Licensee. Alternately, in lieu of CNRI's License Agreement, Licensee may substitute the following text (omitting the quotes): "Python 1.6.1 is made available subject to the terms and conditions in CNRI's License Agreement. This Agreement together with Python 1.6.1 may be located on the Internet using the following unique, persistent identifier (known as a handle): 1895.22/1013. This Agreement may also be obtained from a proxy server on the Internet using the following URL: <http://hdl.handle.net/1895.22/1013>".

3. In the event Licensee prepares a derivative work that is based on or incorporates Python 1.6.1 or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python 1.6.1.

4. CNRI is making Python 1.6.1 available to Licensee on an "AS IS" basis. CNRI MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, CNRI MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON 1.6.1 WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. CNRI SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 1.6.1 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 1.6.1, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. This License Agreement shall be governed by the federal intellectual property law of the United States, including without limitation the federal copyright law, and, to the extent such U.S. federal law does not apply, by the law of the Commonwealth of Virginia, excluding Virginia's conflict of law provisions. Notwithstanding the foregoing, with regard to derivative works based on Python 1.6.1 that incorporate non-separable material that was previously distributed under the GNU General Public License (GPL), the law of the Commonwealth of Virginia shall govern this License Agreement only as to issues arising under or with respect to Paragraphs 4, 5, and 7 of this License Agreement. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between CNRI and Licensee. This License Agreement does not grant permission to use CNRI trademarks or trade name in a trademark

**Software:** socat  
**Version:** 1.6.0.1  
**File or Package:** socat-1.6.0.1.tar.bz2  
**OSI Licenses:** GPLv2, MIT/X11, Apache (variant)  
**Other Licenses:** Custom  
**URL:** <http://www.dest-unreach.org/socat/download/>  
socat-1.6.0.1.tar.bz2  
**Group:** Productivity/Networking/Other  
**Description:** SOcket CAT (socat) is a command line based utility that establishes two bidirectional byte streams and transfers data between them. Because the streams can be constructed from a large set of different types of data sinks and sources, and because lots of address options may be applied to the streams, socat can be used for many different purposes. Each of these data channels may be a file, pipe, device (terminal or modem etc.), socket (UNIX, IP4, IP6 - raw, UDP, TCP), a file descriptor (stdin etc.), a program, or any combination of two of these.  
**Common Usage:** Utility  
**Package Size:** 3.2 MB  
**Folders / Files:** 4 / 173  
**Source Path:** wrlinux-3.0/layers/wrll-wrlinux/packages

SoX (Sound eXchange) is the Swiss Army knife of sound processing tools: it translates sound files between many different file formats, and can apply many sound effects and transforms, as well as doing basic analysis and providing input to more capable analysis and plotting tools.

document version 1.4

SoX is distributed under the GNU GPL and GNU LGPL. To be precise: the sox program is distributed under the GPL, while the library libsox, in which most of SoX's functionality resides, is dual-licensed. Note that some optional components of libsox are GPL only: if you use these, you must use libsox under the GPL.

♦♦♦

*From: sox-14.0.1/sox-14.0.1/copying*

SoX source code is distributed under two main licenses. The two licenses are in the files LICENSE.GPL and LICENSE.LGPL.

sox.c, and thus SoX-the user application, is distributed under the GPL, while the files that make up libsox are licensed under the less restrictive LGPL. Note that some of the external packages that can be linked in to libsox are GPLed and/or may have licensing problems, so they can be disabled at configure time with the relevant--with- options. If libsox is built with such libraries, it must be distributed under the GPL.

[Editor's Note: Files license.gpl and license.lgpl not found in this package.]

*From: sox-14.0.1/sox-14.0.1/src/FFT.c*

Based on FFT.cpp from Audacity, with the following permission from its author, **Dominic Mazzoni** (in particular, relicensing the code for use in SoX):

I hereby license you under the LGPL all of the code in FFT.cpp from any version of Audacity, with the exception of the windowing function code, as I wrote the rest of the line [sic] that appears in any version of Audacity (or they are derived from Don Cross or NR, which is okay). - **Dominic Mazzoni** <dominic@audacityteam.org>, 18th November 2006

As regards the windowing function, WindowFunc, Dominic granted a license to it too, writing on the same day:

OK, we're good. That's the original version that I wrote, before others contributed. Some of this code was based on a free implementation of an FFT by Don Cross, available on the web at:  
<http://www.intersrv.com/~dcross/fft.html> [no longer, it seems]

The basic algorithm for his code was based on Numerical Recipes in Fortran. This file is now part of SoX, and is

There is no claim of copyright made on that page, but you should probably contact the author (Martin Porter - the inventor of the Porter Stemmer algorithm) if you want to use this test data in a commercial product of some kind. Welcome to Squashfs version 3.2. Please read the README-3.2 and CHANGES files for details of changes.

Squashfs is a highly compressed read-only filesystem for Linux. It uses zlib compression to compress both files, inodes and directories. Inodes in the system are very small and all blocks are packed to minimise data overhead. Block sizes greater than 4K are supported up to a maximum of 64K. Squashfs is intended for general read-only filesystem use, for archival use (i.e. in cases where a .tar.gz file may be used), and in constrained block device/memory systems (e.g. embedded systems) where low overhead is needed.

Some code in libl is under the LGPL, included in this file. This means that effectively the whole library is LGPL until/unless the LGPL code is replaced. However, most of the code is provided under a so-called BSD/X-style license. Each source code file in libl is marked with the license that applies to that file.

The compression code as implemented in "lzhuf.c" was taken from a BBS program written by Joachim Schurig <[jschurig@zedat.fu-berlin.de](mailto:jschurig@zedat.fu-berlin.de)>. He states that the code can be used freely for programs that are covered by a "freeware" license. This probably includes both BSD style licenses and the GPL.

The code in "loader.asm" is a reimplement of the uncompressor. It has been written from scratch and is hereby placed under the conditions of the GNU General Public License (GPL). The algorithm is outlined in "algorithm.doc". Thus, there are no copyright problems with using this code, but there still might be difficulties with software patents. These

patents are not legal in most parts of the world, but if you live in a country that honors software patents then you should verify that using these algorithms is legally permitted.

Unless you are absolutely sure, that there are no legal obstacles, you should use the code for educational purposes only (this assumes that your educational institution is exempted from patent laws). In general gPXE files are licensed under the GPL. GPLed files are in general either from Linux or have been explicitly put under GPL by the authors. The license for a file is usually documented at the top of the file. A few files are inherited from FreeBSD netboot and therefore can be used under BSD or GPL. Documented in this file are some of the non-GPL'ed files. If the internal documentation for a file disagrees with what is documented in this file, the internal documentation for the file shall be override this file.

As copyright holder, if I say it doesn't conflict with the GPL, then it doesn't conflict with the GPL. However, there's no point in causing people's brains to overheat, so yes, I grant permission for the code to be relicensed under the GPLv2. <b>Description:</b>	Sysstat is a collection of utilities designed to collect information about the performance of a Linux installation and record it over time. The sysstat package contains the sar, sadf, iostat, mpstat, and pidstat commands for Linux. The sar command collects and reports system activity information. The sadf command may be used to display data collected by sar in various formats. The iostat command reports CPU statistics and I/O statistics for tty devices and disks. The pidstat command reports statistics for Linux processes. The mpstat command reports global and per-processor statistics.

This implementation has been influenced by the CMU SNMP release, by Steve Waldbusser. However, this shares no code with that system. Additional ASN.1 insight gained from Marshall T. Rose's The Open Book. Earlier forms of this implementation were derived and/or inspired by an awk script originally written by C. Philip Wood of LANL (but later heavily modified by John Robert LoVerso). The copyright notice for that work is preserved below, even though it may not rightly apply to this file. Support for SNMPv2c/SNMPv3 and the ability to link the module against the libsmi was added by

This implementation has been influenced by the CMU SNMP release, by Steve Waldbusser. However, this shares no code with that system. Additional ASN.1 insight gained from Marshall T. Rose's *The Open Book*. Earlier forms of this implementation were derived and/or inspired by an awk script originally written by C. Philip Wood of LANL (but later heavily modified by John Robert LoVerso). The copyright notice for that work is preserved below, even though it may not rightly apply to this file. Support for SNMPv2c/SNMPv3 and the ability to link the module against the libsmi was added by

This source code is no longer held under any constraint of USA "cryptographic laws" since it was exported legally. The cryptographic functions were removed from the code and a "Bones" distribution was made. A Commodity Jurisdiction Request 012-94 was filed with the USA State Department, who handed it to the Commerce department. The code was determined to fall under General License GTDA under ECCN 5D96G, and hence exportable. The cryptographic interfaces were re-added by Eric Young, and then KTH proceeded to maintain the code in the free world.

ARPHIC PUBLIC LICENSE

**Copyright (C) 1999 Arphic Technology Co., Ltd.**

11Fl. No.168, Yung Chi Rd., Taipei, 110 Taiwan

**All rights reserved except as specified below.**

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is forbidden.

Preamble - The licenses for most software are designed to take away your freedom to share and change it. By contrast, the ARPHIC PUBLIC LICENSE specifically permits and encourages you to use this software, provided that you give the recipients all the rights that we gave you and make sure they can get the modifications of this software.

Legal Terms

0. Definitions:

Throughout this License, "Font" means the TrueType fonts "AR PL Mingti2L Big5", "AR PL KaitiM Big5" (BIG-5 character set) and "AR PL SungtiL GB", "AR PL KaitiM GB" (GB character set) which are originally distributed by Arphic, and the derivatives of those fonts created through any modification including modifying glyph, reordering glyph, converting format, changing font name, or adding/deleting some characters in/from glyph table.

"PL" means "Public License".

"Copyright Holder" means whoever is named in the copyright or copyrights for the Font.

"You" means the licensee, or person copying, redistributing or modifying the Font.

"Freely Available" means that you have the freedom to copy or modify the Font as well as redistribute copies of the Font under the same document version 1.4

conditions you received, not price. If you wish, you can charge for this service.

#### 1. Copying & Distribution

You may copy and distribute verbatim copies of this Font in any medium, without restriction, provided that you retain this license file (ARPHICPL.TXT) unaltered in all copies.

#### 2. Modification

You may otherwise modify your copy of this Font in any way, including modifying glyph, reordering glyph, converting format, changing font name, or adding/deleting some characters in/from glyph table, and copy and distribute such modifications under the terms of Section 1 above, provided that the following conditions are met:

- a) You must insert a prominent notice in each modified file stating how and when you changed that file.
- b) You must make such modifications Freely Available as a whole to all third parties under the terms of this License, such as by offering access to copy the modifications from a designated place, or distributing the modifications on a medium customarily used for software interchange.
- c) If the modified fonts normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the Font under these conditions, and telling the user how to view a copy of this License.

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Font, and can be reasonably considered independent and separate works in themselves, then this License and its terms, do not apply to those sections when you distribute them as separate works. Therefore, mere aggregation of another work not based on the Font with the Font on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

#### 3. Condition Subsequent

You may not copy, modify, sublicense, or distribute the Font except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Font will automatically retroactively void your rights under this License. However, parties who have received copies or rights from you under this License will keep their licenses valid so long as such parties remain in full compliance.

#### 4. Acceptance

You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to copy, modify, sublicense or distribute the Font. These actions are prohibited by law if you do not accept this License. Therefore, by copying, modifying, sublicensing or distributing the Font, you indicate your acceptance of this License and all its terms and conditions.

#### 5. Automatic Receipt

Each time you redistribute the Font, the recipient automatically receives a license from the original licensor to copy, distribute or modify the Font subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

#### 6. Contradiction

If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Font at all. For example, if a patent license would not permit royalty-free redistribution of the Font by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Font.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

#### 7. NO WARRANTY

BECAUSE THE FONT IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE FONT, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS OR OTHER PARTIES PROVIDE THE FONT "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE FONT IS WITH YOU. SHOULD THE FONT PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

#### 8. DAMAGES WAIVER

UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING, IN NO EVENT WILL ANY COPYRIGHTT HOLDERS, OR OTHER PARTIES WHO MAY COPY, MODIFY OR REDISTRIBUTE THE FONT AS PERMITTED ABOVE, BE LIABLE TO YOU FOR ANY DIRECT, INDIRECT, CONSEQUENTIAL, INCIDENTAL, SPECIAL OR EXEMPLARY DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE FONT (INCLUDING BUT NOT LIMITED TO PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA OR PROFITS; OR BUSINESS INTERRUPTION), EVEN IF SUCH HOLDERS OR OTHER PARTIES HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Description:	Kochi Subst Gothic & Mincho (ttf-kochi-mincho) is a Japanese mincho TrueType font without naga10, so it's DFSG-free. The family of ttf-kochi is very smooth compared with current free Japanese TrueType fonts. It has bitmap hinting information, so it's not jagged to display on the CRT. This font is suitable for both printing and displaying Japanese characters.

SciTech Nucleus License Agreement Version 1.0

PREAMBLE - SciTech Software has made a tremendous investment over many years in the development of SciTech Nucleus Device Driver architecture. SciTech is releasing the header files and device driver loader library source code under a special license that is different to the SciTech MGL Public License. The intent of this license is to all developers wishing to utilise the SciTech Nucleus device drivers in their applications or Operating Systems, the ability to do so without restriction.

However the SciTech Nucleus License Agreement specifically excludes use of the headers and source code to build device drivers that compete with SciTech Software's core, commercial products, free or otherwise. Hence if you are an application developer or operating system developer, you may use the headers and loader library source code to add support for Nucleus device drivers to your products. If you are a device driver developer, you may not use the Nucleus header files and loader library source to build device drivers products that are compatible with the SciTech Nucleus device driver architecture (ie: binary compatible drivers that can replace our commercial drivers).

## 1. Definitions.

1.1. "SciTech" means SciTech Software Inc, located at 180 East 4th Street, Suite 300, Chico, CA 95928 USA (<http://www.scitechsoft.com>).

1.2. "SciTech Display Doctor" means any version of the commercial device driver products developed and sold by SciTech.

1.3. "Covered Code" means the Original Code.

1.4. "Electronic Distribution Mechanism" means a mechanism generally accepted in the software development community for the electronic transfer of data.

1.5. "Executable" means Covered Code in any form other than Source Code.

1.6. "Larger Work" means a work which combines Covered Code or portions thereof with code not governed by the terms of this License.

1.7. "License" means this document.

1.8. "Source Code" means the preferred form of the Covered Code, including all modules it contains.

1.9. "You" means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, "You" includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means

(a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or

(b) ownership of fifty percent (50%) or more of the outstanding shares or beneficial ownership of such entity.

## 2. Source Code License.

### 2.1. The SciTech Grant.

SciTech hereby grants You a world-wide, royalty-free, non-exclusive license, subject to third party intellectual property claims: (a) to use, reproduce, display, perform, sublicense and distribute the Original Code WITHOUT Modifications, or as part of a Larger Work.

### 2.2. Modifications.

You may NOT under any circumstances make and/or distribute modifications to the Source Code. You may only use and distribute unmodified official versions of the Source Code as published by SciTech.

## 3. Distribution Obligations.

### 3.1. Application of License.

The Source Code version of Covered Code may be distributed only under the terms of this License, and You must include a copy of this License with every copy of the Source Code You distribute. You may not offer or impose any terms on any Source Code version that alters or restricts the applicable version of this License or the recipients' rights hereunder.

### 3.2. Distribution of Executable Versions.

You may distribute Covered Code in Executable form only if the requirements of Section 3.1-3.3 have been met for that Covered Code. You may distribute the Executable version of Covered Code under a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License. You hereby agree to indemnify the SciTech for any liability incurred by the SciTech as a result of any such terms You offer.

### 3.3. Larger Works.

You may create a Larger Work by combining Covered Code with other code not governed by the terms of this License and distribute the Larger

Work as a single product, provided that the Larger Work is NOT a device driver product that competes with SciTech Display Doctor, whether the Larger Work is free or sold for profit.

#### 4. Application of this License.

This License applies to code to which the SciTech has attached the notice in Exhibit A, and to related Covered Code.

#### 5. DISCLAIMER OF WARRANTY.

COVERED CODE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED CODE IS FREE OF DEFECTS, MERCHANTABILITY, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT.

THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED CODE IS WITH YOU. SHOULD ANY COVERED CODE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE SciTech OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED CODE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

#### 6. TERMINATION.

This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses to the Covered Code which are properly granted shall survive any termination of this License. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

#### 7. LIMITATION OF LIABILITY.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED CODE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO YOU OR ANY OTHER PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES.

THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THAT EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

#### 8. U.S. GOVERNMENT END USERS.

The Covered Code is a "commercial item," as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of "commercial computer software" and "commercial computer software documentation," as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Code with only those rights set forth herein.

#### 9. MISCELLANEOUS.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by California law provisions (except to the extent applicable law, if any, provides otherwise), excluding its conflict-of-law provisions. With respect to disputes in which at least one party is a citizen of, or an entity chartered or registered to do business in, the United States of America:

(a) unless otherwise agreed in writing, all disputes relating to this License (excepting any dispute relating to intellectual property rights) shall be subject to final and binding arbitration, with the losing party paying all costs of arbitration;

(b) any arbitration relating to this Agreement shall be held in Butte County, California, under the auspices of JAMS/EndDispute; and

(c) any litigation relating to this Agreement shall be subject to the jurisdiction of the Federal Courts of the Northern District of California, with venue lying in Butte County, California, with the losing party responsible for costs, including without limitation, court costs and reasonable attorneys fees and expenses.

The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License.

#### 10. RESPONSIBILITY FOR CLAIMS.

Except in cases where another Contributor has failed to comply with Section 3.4, You are responsible for damages arising, directly or indirectly, out of Your utilization of rights under this License, based on the number of copies of Covered Code you made available, the revenues you received from utilizing such rights, and other relevant factors. You agree to work with affected parties to distribute responsibility on an equitable basis.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system or board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

NOTE! This copyright does not cover the so-called "standalone" applications that use U-Boot services by means of the jump table provided by U-Boot exactly for this purpose - this is merely considered normal use of U-Boot, and does not fall under the heading of "derived work".

The header files "include/image.h" and "include/asm-u-boot.h" define interfaces to U-Boot. Including these (unmodified) header files in another file is considered normal use of U-Boot, and does not fall under the heading of "derived work". Also note that the GPL below is copyrighted by the Free Software Foundation, but the instance of code that it refers to (the U-Boot source code) is copyrighted by me and others who actually wrote it. - Wolfgang Denk

NOTE! This copyright does not cover the so-called "standalone" applications that use U-Boot services by means of the jump table provided by U-Boot exactly for this purpose - this is merely considered normal use of U-Boot, and does not fall under the heading of "derived work".

The header files "include/image.h" and "include/asm- u-boot.h" define interfaces to U-Boot. Including these (unmodified) header files in another file is considered normal use of U-Boot, and does not fall under the heading of "derived work". Also note that the GPL below is copyrighted by the Free Software Foundation, but the instance of code that it refers to (the U-Boot source code) is copyrighted by me and others who actually wrote it. - Wolfgang Denk

*[Above file contains a full copy of the GNU General Public License version 2 (GPLv2). A copy of the GPLv2 can be found in the addendum of this document.]*

NOTE! This copyright does not cover the so-called "standalone" applications that use U-Boot services by means of the jump table provided by U-Boot exactly for this purpose - this is merely considered normal use of U-Boot, and does not fall under the heading of "derived work".

The header files "include/image.h" and "include/asm- u-boot.h" define interfaces to U-Boot. Including these (unmodified) header files in another file is considered normal use of U-Boot, and does not fall under the heading of "derived work". Also note that the GPL below is copyrighted by the Free Software Foundation, but the instance of code that it refers to (the U-Boot source code) is copyrighted by me and others who actually wrote it. - Wolfgang Denk

document version 1.4

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system or board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

As a special exception, if other files instantiate templates or use macros or inline functions from these files, or you compile these files and link them with other works to produce a work based on these files, these files do not by themselves cause the resulting work to be covered by the GNU General Public License. However the source code for these files must still be made available in accordance with section (3) of the GNU General Public License. This exception does not invalidate any other reasons why a work based on this file might be covered by the GNU General Public License.

LICENSE - LZMA SDK is available under any of the following licenses:

- 1) GNU Lesser General Public License (GNU LGPL)
- 2) Common Public License (CPL)
- 3) Simplified license for unmodified code (read SPECIAL EXCEPTION)
- 4) Proprietary license

It means that you can select one of these four options and follow rules of that license.

1,2) GNU LGPL and CPL licenses are pretty similar and both these licenses are classified as "Free software licenses" at <http://www.gnu.org/> "OSI-approved" at <http://www.opensource.org/>

3) SPECIAL EXCEPTION - Igor Pavlov, as the author of this code, expressly permits you to statically or dynamically link your code (or bind by name) to the files from LZMA SDK without subjecting your linked code to the terms of the CPL or GNU LGPL. Any modifications or additions to files from LZMA SDK, however, are subject to the GNU LGPL or CPL terms. SPECIAL EXCEPTION allows you to use LZMA SDK in applications with closed code, while you keep LZMA SDK code unmodified.

SPECIAL EXCEPTION 2: Igor Pavlov, as the author of this code, expressly permits you to use this code under the same terms and conditions contained in the License Agreement you have for any previous version of LZMA SDK developed by Igor Pavlov. SPECIAL EXCEPTION 2 allows owners of proprietary licenses to use latest version of LZMA SDK as update for previous versions.

SPECIAL EXCEPTION 3: Igor Pavlov, as the author of this code, expressly permits you to use code of the following files: BranchTypes.h, LzmaTypes.h, LzmaTest.c, LzmaStateTest.c, LzmaAlone.cpp, LzmaAlone.cs, LzmaAlone.java as public domain code.

4) Proprietary license - LZMA SDK also can be available under a proprietary license which can include: 1) Right to modify code without subjecting modified code to the terms of the CPL or GNU LGPL. 2) Technical support for code. To request such proprietary license or any additional consultations, send email message from that page: <http://www.7-zip.org/support.html>

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307. You should have received a copy of the Common Public License along with this library.

This code implements the MD5 message-digest algorithm. The algorithm is due to Ron Rivest. This code was written by Colin Plumb in 1993, no copyright is claimed. This code is in the public domain; do with it what you wish.

Equivalent code is available from RSA Data Security, Inc. This code has been tested against that, and is equivalent, except that you don't need to include two pages of legalese with every copy.

The Nios port does NOT include ANY sources that Altera has the copyright. This was a conscious decision ... not an accident. The Altera license is not clear in terms of distributing Altera sources (when altera silicon is not involved). This isn't really a problem as little, if any, of the Altera source contains features that are not already available in U-Boot.

provided by U-Boot exactly for this purpose - this is merely considered normal use of U-Boot, and does not fall under the heading of "derived work".

The header files "include/image.h" and "include/asm-u-boot.h" define interfaces to U-Boot. Including these (unmodified) header files in another file is considered normal use of U-Boot, and does not fall under the heading of "derived work".

Also note that the GPL below is copyrighted by the Free Software Foundation, but the instance of code that it refers to (the U-Boot source code) is copyrighted by me and others who actually wrote it. - Wolfgang Denk

Copyright (C) 1999-2007 Igor Pavlov

LICENSE - LZMA SDK is available under any of the following licenses:

- 1) GNU Lesser General Public License (GNU LGPL)
- 2) Common Public License (CPL)
- 3) Simplified license for unmodified code (read SPECIAL EXCEPTION)
- 4) Proprietary license

It means that you can select one of these four options and follow rules of that license.

1,2) GNU LGPL and CPL licenses are pretty similar and both these licenses are classified as

- "Free software licenses" at <http://www.gnu.org/>  
 - "OSI-approved" at <http://www.opensource.org/>

### 3) SPECIAL EXCEPTION

Igor Pavlov, as the author of this code, expressly permits you to statically or dynamically link your code (or bind by name) to the files from LZMA SDK without subjecting your linked code to the terms of the CPL or GNU LGPL. Any modifications or additions to files from LZMA SDK, however, are subject to the GNU LGPL or CPL terms.

SPECIAL EXCEPTION allows you to use LZMA SDK in applications with closed code, while you keep LZMA SDK code unmodified.

SPECIAL EXCEPTION 2: Igor Pavlov, as the author of this code, expressly permits you to use this code under the same terms and conditions contained in the License Agreement you have for any previous version of LZMA SDK developed by Igor Pavlov.

SPECIAL EXCEPTION 2 allows owners of proprietary licenses to use latest version of LZMA SDK as update for previous versions.

SPECIAL EXCEPTION 3: Igor Pavlov, as the author of this code, expressly permits you to use code of the following files:

BranchTypes.h, LzmaTypes.h, LzmaTest.c, LzmaStateTest.c, LzmaAlone.cpp, LzmaAlone.cs, LzmaAlone.java as public domain code.

### 4) Proprietary license

LZMA SDK also can be available under a proprietary license which can include:

- 1) Right to modify code without subjecting modified code to the terms of the CPL or GNU LGPL
- 2) Technical support for code

To request such proprietary license or any additional consultations, send email message from that page: <http://www.7-zip.org/support.html>

Credits: The parser routines proper are all original material, first written Dec 2000 and Jan 2001 by Larry Doolittle. The execution engine, the builtins, and much of the underlying support has been adapted from busybox-0.49pre's lash, which is **Copyright (C) 2000 by Lineo, Inc.**, and written by Erik Andersen <andersen@lineo.com>, <andersee@debian.org>. That, in turn, is based in part on ladsh.c, by Michael K. Johnson and Erik W. Troan, which they placed in the public domain. I don't know how much of the Johnson/Troan code has survived the repeated rewrites.

This code implements the MD5 message-digest algorithm. The algorithm  
is due to Ron Rivest. This code was written by Colin Plumb in 1993, no  
copyright is claimed. This code is in the public domain; do with it what  
you wish.

Equivalent code is available from RSA Data Security, Inc. This code has  
been tested against that, and is equivalent, except that you don't need to  
include two pages of legalese with every copy.

of this document.]  
NOTE! This copyright does not cover the so-called "standalone"  
applications that use U-Boot services by means of the jump table  
provided by U-Boot exactly for this purpose - this is merely considered  
normal use of U-Boot, and does not fall under the heading of "derived  
work".

The header files "include/image.h" and "include/asm-u-boot.h" define  
interfaces to U-Boot. Including these (unmodified) header files in another  
file is considered normal use of U-Boot, and does not fall under the  
heading of "derived work".

Also note that the GPL below is copyrighted by the Free Software
