## Installation Notes

### Patch File

Patch Install File	1265334v1.dlm
Patch Uninstall File	1265334v1_un.dlm

Save the files to a convenient location at your workstation and unzip the files if necessary.

### Installation Instructions

If your current machine version is not within the range noted below, contact your Xerox Customer Support representative to obtain the necessary software before installing the patch.

Version Requirements Before Software Install	Minimum	Maximum
System Software Version	100.xxx.028. <b>05200</b>	100.xxx.028. <b>05200</b>

1. From a Web browser, enter the Xerox device's IP address to access the Web UI.
2. Go to Properties → General Setup → Machine Software → Manual Upgrade.
3. Press [Browse] to locate the software file.
4. Press [Install Software]

Software Installation will begin several minutes after the software file has been submitted to the machine. The installation progress can be monitored from the Local UI. When installation completes, the Network Controller version shown on the printed Configuration Report will be appended with 1265334v1.

Note: If the patch needs to be uninstalled, repeat the upgrade process using the uninstall file 1265334v1\_un
