

# Feed Roll Cleaning Kit

Xerox - **DOCUMENT** WorkCentre 450c / 450cp

The purpose of the instructions is to provide a step by step procedure to **correct a paper feed problem**. Read all the instructions before performing this procedure.

**Contents of kit:** · Feed Roll Cleaning Pad · Repair Instructions

### CUSTOMER PREPARATION:

- Unpack the repair kit and read the Repair Instructions.

**NOTE:** Good lighting is required in order to see inside the **WorkCentre 450c / 450cp**

Check off the box after each Step is completed.

1.  Remove all paper and the clear plastic Printer Output Tray in front of the paper tray. (See Figure 1)
2.  Insert approximately a ¼ inch thick stack of 20 lb. paper (measure it) into the Paper Tray.
3.  Insert the Feed Roll Cleaning Pad (provided in Kit) in front of the paper stack (Long-Edge-Down) with the green side (coarse side) facing out.

4.  Press the **Feed** button for approximately one second and release (See Figure 2). This will engage the feed rollers for a short period of time and allow the Feed Roll Cleaning Pad to clean and restore the surface texture of the feed rollers. Repeat this process approximately 10 times.
6.  Reverse the Feed Roll Cleaning Pad in the paper Tray (long edge down) with the white side facing out.
7.  Press the **Feed** button for approximately one second and release. This will allow the Feed Roll Cleaning Pad to clean off the residue. Repeat this process approximately 5 times.
8.  Remove the Feed Roll Cleaning Pad with the ¼ inch stack of paper and insert fresh 20 lb. paper. Insert the Printer Output Tray and make a print.
