1	Patch 1-ZZJED.ps

## Prerequisites

- Previous working knowledge with the DocuColor 250/240 bustled Fiery color server.
- The DocuColor 250/240 bustled Fiery color server must be at version 1.2 prior to performing this install. This software is supplemental to the version 1.2 launch software.
- 1-XVE1A Patch
- 1-YNN0J Patch

## Installation Instructions

**Note:** This patch is Exclusive which means it must be installed independently and the server rebooted/restarted once. After which, other patches can be applied to the server.

1. Download/Import the patch file 1-ZZJED.ps with Command Workstation to the Direct queue.
2. You should wait approximately 60 secs and/or when the file is done processing after the patch file is downloaded/imported before rebooting the system. This will ensure the patch file is completely processed.
3. From either Command Workstation or the Fiery LCD, select Shut Down and then Reboot System.
4. Wait until the Fiery has come to idle and print out the configuration page.

**Note:** This patch is Exclusive which means it must be installed independently and the server rebooted/restarted once. After which, other patches can be applied to the server.

5. Verify the **Update Info** section. It should contain the patch number 1-ZZJED.
