FreeFlow[™] Accxes HP-GL/2 and PostScript Printer Driver

Customer Release Notes

Version 14.0.4

Release Content

This release is provided to add support for 6604/6605 systems..

This release includes both HP-GL/2 and PostScript printer drivers.

This release is provided with English, German, French, Italian, Spanish, and Portuguese languages.

To install, run XFAInstaller.exe and follow the directions.

New or Changed in this Release:

This release adds the following:

- Support for 6604/6605 printers
- Support for Accxes 14.0
- Support for the “**Job is reprintable**” feature
- Support for the “**Display Thumbnail**” feature
- An installer
- Bug fixes
- **This release does not support Windows 2000.**

“Job is Reprintable” details

In the printer driver, there are three choices for “Job is Reprintable”:

- “**Printer Default**” causes the jobs submitted by the printer driver to have the default reprintable attribute that is set on the Accxes server they are sent to.
- “**Always**” causes the jobs submitted by the printer driver to be reprintable, if the reprintable jobs feature is enabled on the Accxes server they are sent to. If the reprintable jobs feature is disabled on the Accxes server they are sent to, printer driver jobs are not reprintable even if they are sent with this setting.
- “**Never**” causes the jobs submitted by the printer driver to not be reprintable.

For complete details on the reprintable jobs feature of Accxes, refer to the Accxes User Guide.

“Display Thumbnail” details

If the “**Display Thumbnail**” checkbox is checked, jobs submitted by the printer driver will have thumbnails displayed, if the Thumbnail Creation feature is enabled on the Accxes server they are sent to. If the “**Display Thumbnail**” checkbox is checked, jobs submitted by the printer driver will **not** have thumbnails displayed.

For complete details on the Thumbnail Creation feature of Accxes, refer to the Accxes User Guide.

Known Issues

Last Active Tab

The Last Active Tab feature does not work from within applications; this is a limitation of Windows.

Vista and Server 2008 Help

The “?” button in the tabs and dialogs is not supported in Vista and Server 2008. However, selecting a control and pressing F1 will bring up the help (for controls which the user can interact with).

User defined media sizes

You cannot save a user defined size from within an application. The user defined size has to be created and saved in the driver's printing preferences.

Internet Protocol version 6

This is only supported with Microsoft Windows Vista and Microsoft Server 2008.

Default All button not translated

The “Default All” button text has not been translated. Instead, the existing word for “Default” was used and the english word “ALL” was appender. The correct translations will be in the next release.

Printer Driver Installation

New driver install:

Follow the procedure in the Xerox Wide Format with FreeFlow Accxes clients & drivers installation guide.

Using Standard TCP/IPv6:

This driver supports the use of IPv6 on Vista and Server 2008.
