

Xerox ColorQube™ 9201/9202/9203 Software Identification

Release Date: May 7, 2010

dc10cd010

ALERT! A new model of the ColorQube 9201/9202/9203 family is now available. The new model uses a different firmware file than the previous model. You must download the correct file to match the model of your machine.

Determine Which Files to Download

Use the following chart to determine which file to download.

If the System Software version starts with:	Then the model you have is the:
060.050.xxx.xxxxx	Previous Model
060.080.xxx.xxxxx	New Model

Determine the Current System Software Version

You can determine the current system software version at the machine and at your workstation.

To determine the current system software version at the machine:

A. Press the **Machine Status** button.

B. Note the **System Software Version**.

To determine the current system software version from your workstation:

1. Open your web browser. In the Address or Location field enter the IP address of the machine. Press **Enter**.
2. Select the **Status** tab.
3. Select the **Configuration Report**
4. Scroll down to the **Software Versions** section to see the **System Software** version.
