**DesignPro Tools Professional 3.00.32**  
**Transformation Suite 8.00.32**  
**PageMiner 4.00.32**  
**RELEASE NOTES**  
**June 14, 2011**

These release notes describe changes to the above products and contain descriptions of features not in our documentation. All updates are cumulative; changes made in previous updates are included in this release. This release must be applied on top of the base release 3.00, and will update each of the above products if installed.

## **Fixes**

### **Visual PPFA**

#### **Correct Output Generates For Duplex Media**

Proofing generates correct output for jobs with CopyGroup offset (Vertical and/or Horizontal) equal to 0.000 for Duplex media.

#### **Parsers (PPFA)**

##### **SRC PageDef Loads without Error**

The subcommand "\*" for position parses successfully and hence, error message no longer displays on loading the customer specific APF source file.

### **Form Editor**

#### **Parsers (OGL)**

##### **Close Sub-Command Parses Successfully**

The Close sub-command of PATH parses properly without generating any error messages.

### **Converter (OGL)**

#### **Optimal SETTEXT Command Created**

OGL Converter no longer creates the unnecessary SETTEXT command for each line.

### **Converter (LCDS/Metacode)**

#### **Image Displays Properly**

Metacode converter places the image according to the mentioned JSL and hence, image displays properly in Elixir Viewer.
