

PDL Reference Guide for the Xerox Phaser 7800 Color Printer Customer Tip

Phaser 7800

September 27, 2012

Accessing Extended Features

Overview

This document describes how to access the extended features of the Phaser 7800 Color Printer in environments for which Xerox does not make a custom driver.

Note: Some of the commands and syntax used in this document requires familiarity with either PostScript (PS) or Printer Command Language (PCL).

This document provides the Printer Description Language (PDL) commands and syntax for each feature. The following tables are also included:

- features supported by the Phaser 7800 Color Printer
- commands to use in a PCL print job
- commands to use in a PS print job

This information is not intended as a PS or PCL reference manual, but a guide for using the extended features in PS, PCL or ASCII print jobs.

Using this Guide

1. Refer to the Feature List for the feature you want to implement. Select the page number to jump to that page.
2. Follow the syntax listed for the command you select. Read the “Dependencies/Caveats” section. You can access features using several methods:
 - PCL or PS commands
 - PJL SET commands
 - Xerox specific COMMENT command.

Feature Listing

PCL and ASCII print jobs can use PJL commands or PCL commands to access the attributes of the printer. If there is more than one method listed to access a specific feature, determine the best method for your application and use that method.

PostScript print jobs can use Document Structuring Commands (DSC) or PS commands. If there is more than one method listed to access a specific feature, determine the best method for your application and use that method.

In this document, both PJL COMMENT and DSC are referred to as Comment commands. **IMPORTANT NOTE:** The Phaser 7800 may not support all of the PJL Comment commands and DSC Comment commands mentioned in this document.

Getting Started

PCL and ASCII print jobs can use PJL commands or PCL commands to access the attributes of the device. If there is more than one method listed to access a specific feature, determine the best method for your application and use that method.

Comment Commands

To process all PJL COMMENT commands and DSC, enclose them with XRXBegin and XRXEnd commands.

Example for a PCL or ASCII print job:

```
@PJL COMMENT XRXbegin  
@PJL COMMENT OID_ATT_START_SHEET OID_VAL_JOB_SHEET_NONE;  
@PJL COMMENT XRXend
```

Example PS print job:

```
%%XRXbegin  
%%OID_ATT_START_SHEET OID_VAL_JOB_SHEET_NONE;  
%%XRXend
```

- The first parameter of the command is an attribute followed by a value.
- Comment commands must end with a semicolon except for the XRXbegin and XRXend commands.
- A comment command not enclosed by XRXbegin and XRXend is NOT a Xerox specific command and is treated as a real comment with no functional attachment to its contents.
- The comment commands in this document are specific to the ColorQube 57xx Series. The Phaser 7800 may not support all of the PJL and DSC Comment commands mentioned in this document.

PJL SET Commands

PJL SET commands are available for some features. If you choose to use these commands, do not enclose them with the XRXBegin and XRXEnd commands.

PJL SET commands do not require a semicolon at the end of the command line.

PCL Commands

PCL commands are available for some features. If you choose to use these commands do not enclose them with the XRXBegin and XRXEnd commands. Refer to a PCL reference manual for more specific information regarding PCL commands.

PS Commands

PS commands are for some features. If you choose to use these commands, do not enclose them with the XRXBegin and XRXEnd commands. Refer to a PS reference manual for more specific information regarding PS commands.

REFERENCE TOPICS

XRXBegin	
When the interpreter receives this command it begins to parse PJL COMMENT commands to check for Xerox-specific commands until it receives the command to stop parsing.	
PJL COMMENT Command	DSC Comment Command
@PJL COMMENT XRXbegin	%%XRXbegin

XRXEnd	
When the interpreter receives this command it stops parsing PJL COMMENT commands.	
PJL COMMENT Command	DSC Comment Command
@PJL COMMENT XRXend	%%XRXend

General Commands

Job Name	
The value for Job Name is stored for printing on the banner page.	
PJL COMMENT Command	DSC Comment Command
@PJL COMMENT OID_ATT_JOB_NAME “ <i>string</i> ”;	%%OID_ATT_JOB_NAME “ <i>string</i> ”;
Where <i>string</i> is a maximum of 40 characters. This appears as the first item on the banner sheet.	

Job Owner	
The value for Job Owner is stored for printing on the banner page.	
PJL COMMENT Command	DSC Comment Command
@PJL COMMENT OID_ATT_JOB_OWNER “ <i>string</i> ”;	%%OID_ATT_JOB_OWNER “ <i>string</i> ”;
Where <i>string</i> is a maximum of 40 characters. This appears as the second item on the banner sheet.	

Copies		
Use the following commands to specify the number of copies or collated sets of a document.		
Language	Collated	Uncollated
PS	<</NumCopies <i>int</i> /Collate true >> setpagedevice	<</NumCopies <i>int</i> /Collate false >> setpagedevice
PJL	@PJL SET QTY= <i>int</i>	@PJL SET COPIES = <i>int</i>
PCL5	No PCL5 command available, use PJL	<Esc>&#X

Job Type	
The Job Type command indicates a job that requires special handling.	
PJL COMMENT Command	DSC Comment Command
@PJL COMMENT OID_ATT_JOB_TYPE OID_VAL_JOB_TYPE <i>string</i> ;	%%OID_ATT_JOB_TYPE OID_VAL_JOB_TYPE <i>string</i> ;
Where <i>string</i> is one of the following:	
PRINT	Indicates a normal print job.
PROOF_PRINT	Comparable to Sample Set in a driver. This job type allows you to specify multiple copies with the @PJL SET COPIES command. One set prints for review. Then you can release or delete the job.

Banner Sheet (Start Sheet)	
This command turns on/off the banner sheet that prints at the beginning of every job. It only applies to the job that contains the command; it does not affect any other jobs. If the device is configured to disable banner sheets, this command is ignored.	
PJL COMMENT Command	DSC Command
@PJL COMMENT OID_ATT_START_SHEET OID_VAL_JOB_SHEET_” <i>string</i> ”;	%%OID_ATT_START_SHEET OID_VAL_JOB_SHEET_” <i>string</i> ”;
Where <i>string</i> is:	
NONE	Do not create a banner sheet for this job.
FULL	Create a banner sheet for this job. By default, if the START SHEET comment is not included a banner sheet is generated unless the device has banner sheet disabled.
USER	A custom start sheet is included in this job.

Media Commands

Media Source	
This command specifies the tray to supply the job's media.	
PS	<</MediaPosition <i>int</i> >> setpagedevice where <i>int</i> is from the table below.
PCL5	<Esc>&#H where # is from the table below.
PCL6	ubyte ## attr_ubyte MediaSource Tray 1 example: 0xc0 0x04 0xf8 0x26 where ## is the hex number assigned to each selection.

Tray	PS int	PCL5 #	PCL6
Auto select	null	7	0x01
1	1	4, 2, 3, or 6	0x04
2	2	1	0x05
3	3	5 or 23	0x07
4	4	8 or 24	0x08
5	5	21	0x0A

PCL5 Command Tray Mapping Tool

A user with Administrator access rights to the device has the opportunity to change the PCL5 command used to identify a specific paper tray.

A user can do this by opening CentreWare® Internet Services by entering the printer's IP address in their favorite Web browser.

To get to the PCL Tray Mapping page select the Properties tab → Services → Printing → Page Description Languages → PCL → Tray Mapping. Once there the user is able to select which listed command will be used for a paper tray.

Note: Changing the device's default mapping may cause issues when trying to select a paper tray with the PCL 5 driver.

The screenshot shows the 'Properties' tab selected in the navigation bar. Under 'Page Description Languages', the 'PCL' tab is active. The 'Tray Mapping' sub-tab is highlighted. On the left, a sidebar lists various configuration categories like General Setup, Connectivity, Services, Printing, and Page Description Languages (PostScript®, PCL, TIFF, WSD). The 'PCL' option under 'Page Description Languages' is also highlighted. The main content area displays a table mapping PCL commands to paper trays. The table has two columns: 'Options' (PCL command) and 'Tray Mapping' (selected tray). The options listed are: <esc>&J0H maps to, <esc>&J1H maps to, <esc>&J2H maps to, <esc>&J3H maps to, <esc>&J4H maps to, <esc>&J5H maps to, <esc>&J6H maps to, <esc>&J7H maps to, <esc>&J8H maps to, <esc>&J20H maps to, <esc>&J21H maps to, <esc>&J22H maps to, <esc>&J23H maps to, <esc>&J24H maps to, <esc>&J30H maps to, <esc>&J31H maps to, <esc>&J32H maps to, and <esc>&J33H maps to. The tray mappings are: Auto Select, Tray 2, Auto Select, Auto Select, Tray 1, Tray 3, Tray 5, Auto Select, Tray 4, Tray 4, Tray 5, Auto Select, and Auto Select. At the bottom right are buttons for 'Restore Feature Defaults', 'Undo', and 'Apply'.

Options	Tray Mapping
<esc>&J0H maps to	Auto Select
<esc>&J1H maps to	Tray 2
<esc>&J2H maps to	Auto Select
<esc>&J3H maps to	Auto Select
<esc>&J4H maps to	Tray 1
<esc>&J5H maps to	Tray 3
<esc>&J6H maps to	Tray 5
<esc>&J7H maps to	Auto Select
<esc>&J8H maps to	Tray 4
<esc>&J20H maps to	Tray 4
<esc>&J21H maps to	Tray 5
<esc>&J22H maps to	Auto Select
<esc>&J23H maps to	Auto Select
<esc>&J24H maps to	Tray 4
<esc>&J30H maps to	Auto Select
<esc>&J31H maps to	Auto Select
<esc>&J32H maps to	Auto Select
<esc>&J33H maps to	Auto Select

Media Size							
This command specifies the size of media on which to print the job.							
Note: some sizes may not apply to every printer model.							
PCL5			PS				
<Esc> &#A			<</PageSize [width height] /CustomPageSize false >> setpagedevice

NOTE: When sending a job with a media size, there must be a MEDIA COLOR “Unspecified” and MEDIA TYPE “Unspecified” PJL COMMENT command issued in the PDL.

Custom Media Sizes	
This command specifies the custom media size on which to print the job. Insert a media size command within the PCL portion of the print job.	
PS	<</PageSize [width height] /CustomPageSize true >> setpagedevice where [width height] is the physical dimension of the paper at 72 points/inch (PS points)
PCL5	[Esc]&f#####I [Esc]&f#####J [Esc]&I101A where ##### is the physical dimension of the paper at 720 points/inch (decipoints).
PCL6	uint16_xy x y attr_ubyte CustomMediaSize ubyte eTenthsOfAMillimeter attr_ubyte CustomMediaSizeUnits ISO B6 example: 0xd1 0xe2 0x04 0xe0 0x06 0xf8 0x2f 0xc0 0x02 0xf8 0x30 where x is the width (1/10mm) in hex (lsb, msb) and y is the length (1/10mm) in hex (lsb, msb)

Media Type	
Media types are used to distinguish the type of media a job requires. If using the Media Source command, set the Media Type command to Unspecified.	
PS	<</MediaType (string) >> setpagedevice
PCL5	<Esc>&n#Wd string where # is the length of string+1, and string from the table below
PCL6	ubyte_array uint16 ## ## string attr_ubyte MediaType Example: 0xc8 0xc1 0x0C 0x00 transparency 0xf8 0x27 where ## ## is the length of the string in hex (lsb, msb), and string from the table below.

Formatting Commands

Simplex / Duplex Printing			
This command specifies if a job is to print on one side or both sides of the sheet. Choose one of the methods below for indicating this feature.			
Simplex/Duplex	PS	PCL5	PJL
one-sided	<< /Duplex false /Tumble false >> setpagedevice	<Esc>&I0S	@PJL SET DUPLEX=OFF
two-sided long-edge	<< /Duplex true /Tumble false >> setpagedevice	<Esc>&I1S	@PJL SET DUPLEX= ON @PJL SET BINDING= LONGEDGE
two-sided short-edge	<< /Duplex true /Tumble true >> setpagedevice	<Esc>&I2S	@PJL SET DUPLEX= ON @PJL SET BINDING= SHORTEXGE

Finishing Commands

Offset	
This feature provides a physical offset of hard copy that distinguishes between sets or stacks within a job.	
PJL	PS
@PJL SET JOBOFFSET= string	<< /Jog int >> setpagedevice
Where string is ON or OFF	Where int is: 0 = no offset 3 = offset each set

Output Destination		
Indicates the output bin where the print job is sent.		
Output Tray	PS	PJL Comment Command
Simple Catch Tray Offset Catch Tray	<< /OutputType (MiddleTray) >> setpagedevice	@PJL COMMENT OID_ATT_OUTPUT_BINS OID_VAL_OUTPUT_BIN_MIDDLE;
Top output tray of finisher	<< /OutputType (TopTray) >> setpagedevice	@PJL COMMENT OID_ATT_OUTPUT_BINS OID_VAL_OUTPUT_BIN_TOP;
Finisher stacker tray	<< /OutputType (Stacker) >> setpagedevice	@PJL COMMENT OID_ATT_OUTPUT_BINS OID_VAL_OUTPUT_BIN_STACKER;

Staple		
This command indicates use and location of staple(s).		
PJL COMMENT Command	PS	
@PJL COMMENT XRXSTAPLE= <i>string</i> ;		<< /Staple <i>int</i> /StapleDetails << /Type 1 /StapleLocation (<i>string</i>) >> >> setpagedevice
Where string is: PORTRAIT LANDSCAPE DUAL For multiple staples (4) use the command below: @PJL COMMENT OID_ATT_FINISHING OID_VAL_FINISHING_STAPLE_MULTIPLE;		Where int is: 0 = No Staple 3 = Staple at end of set Where string is: SinglePortrait SingleLandscape DualLandscape Multiple

Hole Punch		
This command indicates hole punches for a print job on a device with hole punch capability.		
PJL COMMENT Command	DSC Comment Command	PS
@PJL COMMENT OID_ATT_PUNCH <i>int</i> ;	%%OID_ATT_PUNCH <i>int</i> ;	<< /Punch <i>int1</i> /PunchDetails << /Type 6 /NumHoles <i>int2</i> >> >> setpagedevice
Where int is: 0 = Punch Off 1 = Punch On 2 = Use 2 Hole Punch 3 = Use 3 Hole Punch 4 = Use 4 Hole Punch Note: <i>int</i> 1 will be emitted to invoke the default punch setting on the device.		Where int1 is: 0 = Punch Off 4 = Punch On (after each showpage or copy page operation) Where int2 is: 0 = Punch Off 1 = Punch On 2 = 2 Hole Punch 3 = 3 Hole Punch 4 = 4 Hole Punch Note: Setting NumHoles to 1 causes a punch with the default number of holes.

Booklet Fold		
This command indicates an optional fold type generated by the professional finisher. The short edge feed command is also required to use the booklet fold command.		
Note: Some booklet options may not be available on every product model.		
PJL COMMENT Command	DSC Comment Command	PS

Image Quality Commands

Print Quality	
This command sets the resolution value.	
PS	<pre><</PostRenderingEnhance true /PostRenderingEnhanceDetails currentpagedevice 1 index get 1 dict copy dup /Type 33 put dup /OutputMode (string) put >> setpagedevice</pre> <p>where string is one of the following. standard enhanced photographic</p>

Color Mode	
Use this command to adjust the delivery of color rendering.	
PS	For color: << /ProcessColorModel /DeviceCMYK >> setpagedevice For monochrome/grayscale: << /ProcessColorModel /DeviceGray >> setpagedevice
PCL5	There is no page-level PCL5 command for this attribute.
PCL6	There is no page-level PCL6 command for this attribute.

Cover Commands

Front Cover Only	
This command specifies a job has a front (only) cover sheet and whether the cover sheet is imaged (TRUE) or blank (FALSE).	
PJL COMMENT Command	DSC Comment Command
@PJL COMMENT OID_ATT_FIRST_PAGE_IMAGED “ string ”;	%%OID_ATT_FIRST_PAGE_IMAGED “ string ”;
Where string is TRUE or FALSE	

Front Cover Only Media Color	
This command indicates the first page of a job is to print on media of a specified color. Requires that OID_ATT_FIRST_PAGE_IMAGED is also used.	
PJL COMMENT Command	DSC Comment Command
@PJL COMMENT OID_ATT_FIRST_PAGE_MEDIA_COLOR “ string ”;	%%OID_ATT_FIRST_PAGE_MEDIA_COLOR “ string ”;
Where string is one of the following. Entries are case sensitive. White, Yellow, Green, Buff, Red, Ivory, Gray, Clear, Pink, Goldenrod, Orange, Unspecified, Blue, Other, Custom1, Custom2, Custom3, Custom4, Custom5, Custom6, Custom7	

Front Cover Only Media Size	
This command indicates the first page of a job is to print on media of a specified size. Requires that OID_ATT_FIRST_PAGE_IMAGED is also used.	
PJL COMMENT Command	DSC Comment Command
@PJL COMMENT OID_ATT_FIRST_PAGE_MEDIA_SIZE “ ww hh ”;	%%OID_ATT_FIRST_PAGE_MEDIA_SIZE “ ww hh ”;
Where ww hh is one of the metric sizes listed in the MEDIA SIZE table.	

Front Cover Only Media Type	
This command indicates the first page of a job is to print on media of a specified type. Requires that OID_ATT_FIRST_PAGE_IMAGED is also used.	
PJL COMMENT Command	DSC Comment Command
@PJL COMMENT OID_ATT_FIRST_PAGE_MEDIA_TYPE “ <i>string</i> ”;	
Where <i>string</i> is one of the following. Entries are case sensitive. Standard, Transparency, Labels, Drilled, Recycled, Preprinted, Envelopes, Cardstock, HeavyWeight2, Bond, Lightweight, LightCardStock, LightCardStock2, LightGlossy, LightGlossy2, HeavyGlossy, HeavyGlossy2, Tabs, Letterhead, Custom1, Custom2, Custom3, Custom4, Custom5, Custom6, Custom7, Unspecified, Other, System-Default	

Front And Back Cover	
This command indicates the first and last pages of a job are covers. Do not use this command in conjunction with the FIRST_PAGE_IMAGED.	
PJL COMMENT Command	DSC Comment Command
@PJL COMMENT OID_ATT_FIRSTLAST_PAGE_IMAGED “ <i>string</i> ”;	%%OID_ATT_FIRSTLAST_PAGE_IMAGED “ <i>string</i> ”;
Where <i>string</i> is TRUE or FALSE	

Front And Back Cover Media Color	
This command indicates the first and last page of a job is to print on media of a specified color. Requires that OID_ATT_FIRSTLAST_PAGE_IMAGED is also used.	
PJL COMMENT Command	DSC Comment Command
@PJL COMMENT OID_ATT_FIRSTLAST_PAGE_MEDIA_ COLOR “ <i>string</i> ”;	%%OID_ATT_FIRSTLAST_PAGE_MEDIA_COLOR “ <i>string</i> ”;
Where <i>string</i> is one of the following. Entries are case sensitive. White, Yellow, Green, Buff, Red, Ivory, Gray, Clear, Pink, Goldenrod, Orange, Unspecified, Blue, Other, Custom1, Custom2, Custom3, Custom4, Custom5, Custom6, Custom7	

Front And Back Cover Media Size	
Overrides the document's media size for the first and last sheet. Requires OID_ATT_FIRSTLAST_PAGE_IMAGED to be used also.	
PJL COMMENT Command	DSC Comment Command
@PJL COMMENT OID_ATT_FIRSTLAST_PAGE_MEDIA_SIZE “ <i>ww hh</i> ”;	%%OID_ATT_FIRSTLAST_PAGE_MEDIA_SIZE “ <i>ww hh</i> ”;
Where <i>ww hh</i> is one of the metric sizes listed in the MEDIA SIZE table.	

Front And Back Cover Media Type	
Overrides the document's media type for the first and last sheet. Requires OID_ATT_FIRSTLAST_PAGE_IMAGED to be used also.	

PJL COMMENT Command	DSC Comment Command
@PJL COMMENT OID_ATT_FIRSTLAST_PAGE_MEDIA_TYPE “ <i>string</i> ”;	%%OID_ATT_FIRSTLAST_PAGE_MEDIA_TYPE “ <i>string</i> ”;
Where <i>string</i> is one of the following. Entries are case sensitive.	
Standard, Transparency, Labels, Drilled, Recycled, Preprinted, Envelopes, Cardstock, HeavyWeight2, Bond, Lightweight, LightCardStock, LightCardStock2, LightGlossy, LightGlossy2, HeavyGlossy, HeavyGlossy2, Tabs, Letterhead, Custom1, Custom2, Custom3, Custom4, Custom5, Custom6, Custom7, Unspecified, Other, System-Default.	

Interleave	
This command identifies the type of page to insert between sets.	
PJL COMMENT Command	DSC Comment Command
@PJL COMMENT OID_ATT_INTERLEAVE OID_VAL_INTERLEAVE_ <i>string</i> ;	%%OID_ATT_INTERLEAVE OID_VAL_INTERLEAVE_ <i>string</i> ;
Where <i>string</i> is one of the following:	
NONE BLANK IMAGED	

Interleave Media Color	
This command identifies the color of the interleaved pages.	
PJL COMMENT Command	DSC Comment Command
@PJL COMMENT OID_ATT_INTERLEAVE_COLOR “ <i>string</i> ”;	%%OID_ATT_INTERLEAVE_COLOR “ <i>string</i> ”;
Where <i>string</i> is one of the following. Entries are case sensitive.	
White, Blue, Yellow, Green, Pink, Clear, Ivory, Gray, Buff, Goldenrod, Red, Orange, Other, Custom1, Custom2, Custom3, Custom4, Custom5, Custom6, Custom7	

PJL/PCL Dependencies/Caveats

- Locate all PJL commands in the beginning of the file before the image data starts (PS or PCL).
- To combine printer escape commands (not including PJL commands):
 - The first two characters after the <esc> MUST be the same.
 - All alpha characters MUST be lowercase, except the final terminating character.
 - The commands are read left to right. Combine them in the order you wish them executed.
For example, print 5 copies (<ESC>&15X) and use letter size (<ESC>&12A) is combined as: <ESC>&15x2A
- In case of duplicate commands, the last one requested takes precedence.
- The PJL SET COPIES command takes precedence over the PCL command (<Esc>&I#X) to determine number of copies. In general, PJL commands takes precedence over PCL commands.
- When printing a job with an odd number of pages and duplex front and back imaged covers, the printer always prints on both sides of the front and back covers. The remaining pages are printed on the document body media type and color with a blank page inserted to allow an image on both sides of the back cover.
- When using the Blank Front or the Blank Front & Back Cover command, the Cover Media Size command is optional. If the cover size command is not in the PDL, the printer assumes the cover media size is the same as the document body.
- Use one of the following methods to specify media selection:
 - Describe the media attributes with size, color, and type to allow the device to select the matching source tray. If this media description method is used, leave the tray source command out of the job, or set to Auto. If not, the tray source command takes precedence over the tray selection capabilities of the device.
 - Indicate the tray source for the job. If the tray source command is used, the system automatically defaults paper type to the defined SYSTEM DEFAULT unless specified otherwise. This prevents inadvertent use of special paper types. To override, include a paper type specification of UNSPECIFIED in the job.

DSC/PS Dependencies/Caveats

- All % % commands (DSC comments) must be in the first 64KB of the job.
- The following media sizes do not print duplex: A6, B6, 5 x 7" Postcard (4.5 x 6"), envelopes and any custom sized media where the page width is less than 5.5". A request to duplex these media sizes is ignored.
- Jobs that indicate Transparencies, Labels, Envelopes or Tab-Stock do not support duplex commands. The duplex print request is ignored when any of these media types are used.
- When printing an odd number of pages in a document with duplex front and back imaged covers, the printer always prints on both sides of the front and back covers. The remaining pages print on the document body media type and color with a blank page inserted to allow an image on both sides of the back cover.
- When using the Blank Front or the Blank Front and Back Cover command, the Cover Media Size command is optional. If the Cover Media Size command is not in the PDL, the printer assumes the cover media size as that of the document body.
- Use one of the following methods to specify media selection:
 - Describe the media attributes with size, color, and type to allow the device to select the matching source tray. If this media description method is used, leave the tray source command out of the job, or set to Auto. If not, the tray source command takes precedence over the tray selection capabilities of the device.
 - Indicate the tray source for the job. If the tray source command is used, the system automatically defaults paper type to the defined SYSTEM DEFAULT unless specified otherwise. This prevents inadvertent use of special paper types. To override, include a paper type specification of UNSPECIFIED in the job.

Examples

Basic PCL/PJL Template

This section illustrates a standard PCL template example that is used to access general print features. This example lists each feature and the syntax, both PCL commands and PJL, required to use these features.

Note: This section is only an example that may include features and commands that do not exist for every product model.

Note:

This print job specifies the following items:

- Job owner
- Job name
- 11 x 17 paper size
- Heavyweight
- Green paper
- 1 staple
- Draft mode

Note:

The quotations in the Job Name and Job Owner lines are required.

Section 1 (Opening Command, Required for all files)

```
<Esc>%-12345X
```

Section 2 (PJL Set Commands)

```
@PJL SET RESOLUTION=600  
@PJL SET COPIES=1  
@PJL SET DENSITY=4  
@PJL SET JOBOFFSET=ON
```

Section 3 (XRXbegin – Opening Comment Statement, Required)

```
@PJL COMMENT XRXbegin
```

Section 4 (PJL Comments)

```
@PJL COMMENT OID_ATT_JOB_NAME "Readme.txt";  
@PJL COMMENT OID_ATT_START_SHEET OID_VAL_JOB_SHEET_NONE;  
@PJL COMMENT OID_ATT_JOB_OWNER "John Smith";  
@PJL COMMENT OID_ATT_JOB_TYPE OID_VAL_JOB_TYPE_PRINT;  
@PJL COMMENT OID_ATT_DEFAULT_MEDIUM_TYPE "Cardstock";  
@PJL COMMENT OID_ATT_DEFAULT_MEDIUM_COLOUR "Green";  
@PJL COMMENT OID_ATT_PRINT_QUALITY OID_VAL_PRINT_QUALITY_DRAFT;  
@PJL COMMENT OID_ATT_FINISHING OID_VAL_FINISHING_STAPLE;  
@PJL COMMENT XRXSTAPLE=PORTRAIT;
```

Section 5 (XRXend - Closing Statement for Comment Section, Required)

```
@PJL COMMENT XRXend
```

Section 6 (PCL Code used to invoke PCL Language)

```
@PJL ENTER LANGUAGE=PCL
```

Section 7 (PCL Data Stream or ASCII Document inserted here for Options such as Selecting Different Fonts, Simplex, Duplex, etc.)

[Document or Text to print inserted here]

Section 8 (Closing Command, Required at end of Document)

```
<Esc>%-12345X
```

Sample PJL Headers

Note: This section is only an example that may include features and commands that do not exist for every product model.

Note:

This is a simple print job header specifying the Job Owner and Job Name and one copy.

The quotations in the Job Owner and Job Name lines are required.

Note:

This is a proof print job header that requests 6 copies.

Note:

This is a proof print job header requesting the staple option. You must send the job to the stacker using the native PCL command.

Example 1 Header for Simple Print

```
<Esc>%-12345X
@PJL SET COPIES= 1
@PJL COMMENT XRXbegin
@PJL COMMENT OID_ATT_JOB_OWNER "John Smith";
@PJL COMMENT OID_ATT_JOB_NAME "Print Job";
@PJL COMMENT XRXend
@PJL ENTER LANGUAGE=PCL
[Insert PCL document or text to be printed here]
<Esc>%-12345X
```

Example 2 Header for Proof Print

```
<Esc>%-12345X
@PJL SET COPIES= 6
@PJL COMMENT XRXbegin
@PJL COMMENT OID_ATT_JOB_TYPE OID_VAL_JOB_TYPE_PROOF_PRINT
@PJL COMMENT XRXend
@PJL ENTER LANGUAGE=PCL
[Insert PCL document or text to print here]
<Esc>%-12345X
```

Example 3 Header for Finishing Options

```
<Esc>%-12345X
@PJL COMMENT XRXbegin
@PJL COMMENT OID_ATT_JOB_OWNER "John Smith"
@PJL COMMENT OID_ATT_JOB_TYPE OID_VAL_JOB_TYPE_PROOF_PRINT;
@PJL COMMENT OID_ATT_FINISHING OID_VAL_FINISHING_STAPLE;
@PJL COMMENT XRXSTAPLE=PORTRAIT;
@PJL COMMENT XRXend
@PJL ENTER LANGUAGE=PCL
<Esc>&I2G
[Insert PCL document or text to print here]
<Esc>%-12345X
```

Basic PostScript/DSC Template

This section is an example of a standard PostScript template that is used to access general print features. This template lists each feature and the syntax, both Postscript commands and DSC (Document Structuring Conventions) required.

Note: This section is only an example that may include features and commands that do not exist for every product model.

Note:

The print job specifies the following items:

- Job owner
- Job name
- 11 x 17 paper size
- Drilled
- Ivory paper
- 1200 x 1200 resolution
- Staple off
- Landscape
- Sample set
- Draft mode
- Offset off
- Banner sheet off
- Duplex long edge
- One copy

The quotations in the Job Name and Job Owner lines are required.

Section 1 (Adobe Reference Command)

%!PS

Section 2 (XRXbegin - Opening Comment Statement, Required)

%%XRXbegin

Section 3 (OID Commands)

```
%%OID_ATT_JOB_OWNER "John Smith";
%%OID_ATT_JOB_TYPE OID_VAL_JOB_TYPE_PRINT;
%%OID_ATT_START_SHEET OID_VAL_JOB_SHEET_NONE;
%%OID_ATT_JOB_NAME "Readme.txt";
%%OID_ATT_PRINT_QUALITY OID_VAL_PRINT_QUALITY_DRAFT;
```

Section 4 (XRXend - Closing statement for Comment Section, Required)

%%XRXend

Section 5 (Options Such as Selecting Different Fonts, Simplex, Duplex, etc.)

```
<< /PostRenderingEnhance false >> setpagedevice
<< /Staple 0 >> setpagedevice
<< /Jog 0 >> setpagedevice
<< /ManualFeed false >> setpagedevice
<< /MediaType (Drilled) >> setpagedevice
<< /MediaColor (Ivory) >> setpagedevice
<< /DeviceRenderingInfo << /Type 4 /ValuesPerColorComponent 2 >> >>
setpagedevice
<< /HWResolution [1200 1200] >> setpagedevice
<< /PageSize [792 1224] >> setpagedevice
<< /Duplex true /Tumble false >> setpagedevice
<< /Collate false >> setpagedevice
```

Section 6 (Postscript Data Stream Inserted Here)

[Postscript]

Section 7 (EOF - Closing Statement for PostScript File, Required)

%%EOF

Note:

The header for simple print specifies the Job Owner, Job Name, and one copy.

The quotations in the Job Owner and Job Name lines are required.

Note:

This is a proof print job header. This job requests 6 copies.

Note:

This job header specifies the following items:

- 10 copies
- Duplex
- Collated
- Stapled
- Sent to the main tray
- Job name
- Bold image quality

Note: To use the staple and collate features, you must send the output to the stacker.

Example 1 Header for Simple Print0

```
%!PS  
%%XRXbegin  
%%OID_ATT_JOB_OWNER "John Smith";  
%%OID_ATT_JOB_NAME "Print Job";  
%%OID_ATT_COPY_COUNT 1;  
%%XRXend
```

Example 2 Header for Proof Print

```
%!PS  
%%XRXbegin  
%%OID_ATT_JOB_TYPE OID_VAL_JOB_TYPE_PROOF_PRINT;  
%%OID_ATT_COPY_COUNT 6;  
%%XRXend
```

Example 3 Header for Finishing Options

```
%!PS  
%%XRXbegin  
%%OID_ATT_JOB_OWNER "John Smith";  
%%XRXend  
<< /PageSize [612 792] >> setpagedevice  
<< /OutputType (MainTray) >> setpagedevice  
<< /Staple 3 >> setpagedevice  
<< /Duplex true /Tumble false >> setpagedevice  
<< /PostRenderingEnhance true >> setpagedevice  
<< /Collate true >> setpagedevice  
<< /NumCopies 10 >> setpagedevice
```
