Availability

SAP device types and documentation are available from the SAP Support Portal via SAP Note 1447606. The SAP device types can also be downloaded from the Xerox website.

XEROX® INTELLIGENT BARCODE PRINTING SOLUTION

The Xerox® Intelligent Barcode Printing Solution allows Xerox® Devices to print SAP standard barcodes in PostScript and PCL. There are two different Xerox® Intelligent Barcode Printing Solution downloads. One contains PostScript barcode fonts, the other has PCL barcode fonts.

The intelligent barcode printing solution supports the following barcode functions:

- Check digit calculation
- Placement of start/stop and middle bar characters into data string
- Data string compression and encoding
- Barcode rotation of 90 or 270 degrees

To install barcode fonts, the Xerox® Intelligent Barcode Printing Solution requires the Xerox Font Management Utility, which is a separate download. Instructions on how to use the Font Management Utility to install barcode fonts can be found in the Xerox® Intelligent Barcode Printing Solution download.

XEROX® INTELLIGENT BARCODE PRINTING SOLUTION FOR SAP POSTSCRIPT

The Xerox® Intelligent Barcode Printing Solution is a printer based solution that enables Xerox® Devices automated and error free barcode printing from SAP R/3, SAP R/3 Enterprise, SAP ERP Central Components, MS Word or other ERP applications that support PostScript printing. Once installed, the Xerox® Intelligent Barcode Printing Solution seamlessly integrates into the SAP system and allows the printing of Postscript barcodes on any appropriately configured Xerox®

SAP Device Types and Solutions for Xerox® Devices

Devices in the SAP network. PostScript barcode printing can be enabled on Xerox® Devices by obtaining the Xerox® Intelligent Barcode Printing Solution and Font Management Utility. Both can be downloaded free of charge. See below for availability. The height and length of the printed barcodes in the PostScript solution are adjustable to allow for proper page formatting or to improve barcode scanning.

Xerox® Intelligent Barcode Printing Solution contents:
- Installation and user guide
- EULA (End User License Agreement)
- Barcode Fonts for Postscript printing

Availability

To obtain the Xerox® Intelligent Barcode Solution, please contact your Xerox sales representative.

A link to download the Xerox Font Management Utility is available on the support web pages of all supported devices.

Xerox® Intelligent Barcode Printing Solution contents:
- Installation and user guide

XEROX® INTELLIGENT BARCODE PRINTING SOLUTION FOR SAP PCL

The Xerox® Intelligent Barcode Printing Solution is a printer-based solution that enables Xerox® Printers automated and error free barcode printing from SAP R/3 Enterprise and SAP ERP Central Components. PCL barcode printing can be enabled on Xerox® Devices by obtaining the Xerox® Intelligent Barcode Printing Solution and Font Management Utility. Both can be downloaded free of charge. See the following for availability.

Note: For some Xerox® Devices, printing PCL barcodes requires only the SAP device type. The PCL barcode fonts are native on these devices: WorkCentre® 65xx/71xx/72xx/72xxi, VersaLink® B4xx/C4xx/C5xx/C6xx/B70xx/C70xx, Xerox® Color C60/C70, Xerox® D95/D110/D125/D136.

Availability

To obtain the Xerox® Intelligent Barcode Solution, please contact your Xerox sales representative.

A link to download the Xerox Font Management Utility is available on the support web pages of all supported printers.

XEROX® INTELLIGENT PRINTING SOLUTION FOR SAP UNICODE

The Unicode Standard is a character coding system designed to support the worldwide interchange, processing and display of the diverse languages of the modern world. Unicode removes the limitations of traditional character encodings, such as those defined by the ISO 8859 standard which finds wide usage in various countries of the world but remains largely incompatible with each other. For more information on Unicode, refer to http://www.unicode.org. Some Xerox® Devices can be enabled for Unicode printing from an SAP application, which offers simple and convenient printing of most standard and special characters for nearly all of the world's languages. Unicode will allow global, multinational enterprises to consolidate the number of printing devices containing individual local language support solutions, where the same device with the same generic set-up can print any document in a local

language. Simplifying device management provides significant savings in development, consumables and support costs, and greatly reduces system complexity.

Availability

SAP UTF-8 device types and documentation are available from the SAP Support Portal via SAP Note 1447606. The UTF-8 device types can also be downloaded from the Xerox website.

To enable International Unicode printing on a Xerox® Device, obtain the Xerox® International Unicode Printing kit for models that support the UTF-8 character set. This optional kit includes Andale fonts for Japanese, Simplified Chinese, Traditional Chinese and Korean language sets. Please contact your Xerox sales representative.

SAP Device Types and Solutions for Xerox® Devices

For ordering the Xerox® Intelligent Printing Solutions for International Unicode, please contact your customer sales representative or technical support at 1-800-821-2797 (USA).
