

VI Design Express – Remove Dependency

Installation procedure of “VI Design Express – Remove Dependency” plugin is same as VI Design Express. After installing the “VI Design Express – Remove Dependency” plugin in the system user needs to restart the Adobe InDesign application (if it is already open) and follow the below steps to remove the VDE dependency from the InDesign documents.

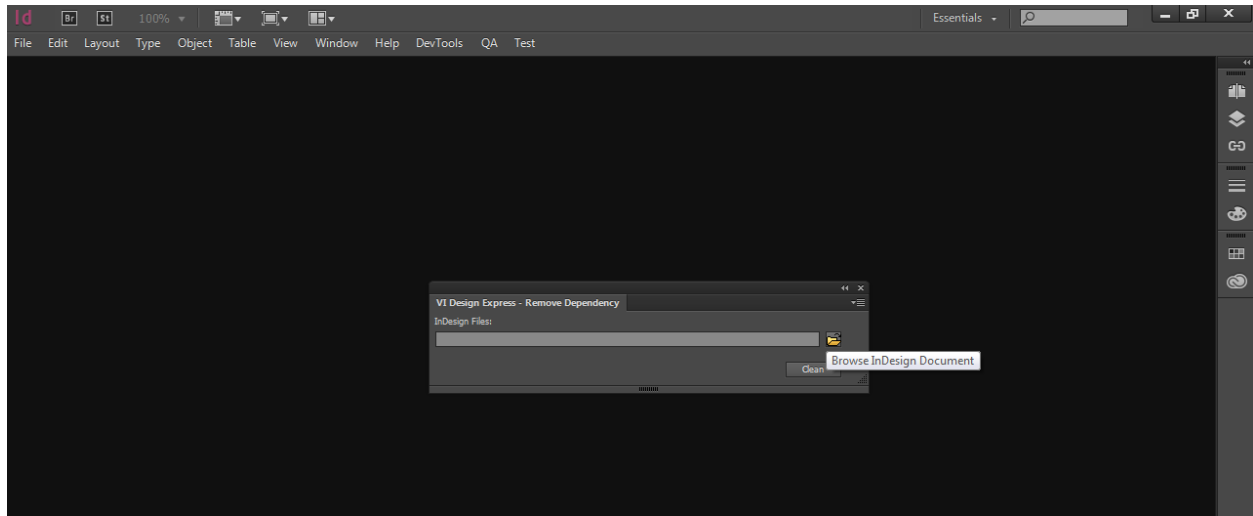

Step 1:

Launch the Adobe InDesign and navigate to **Window -> VI Design Express - Remove Dependency**

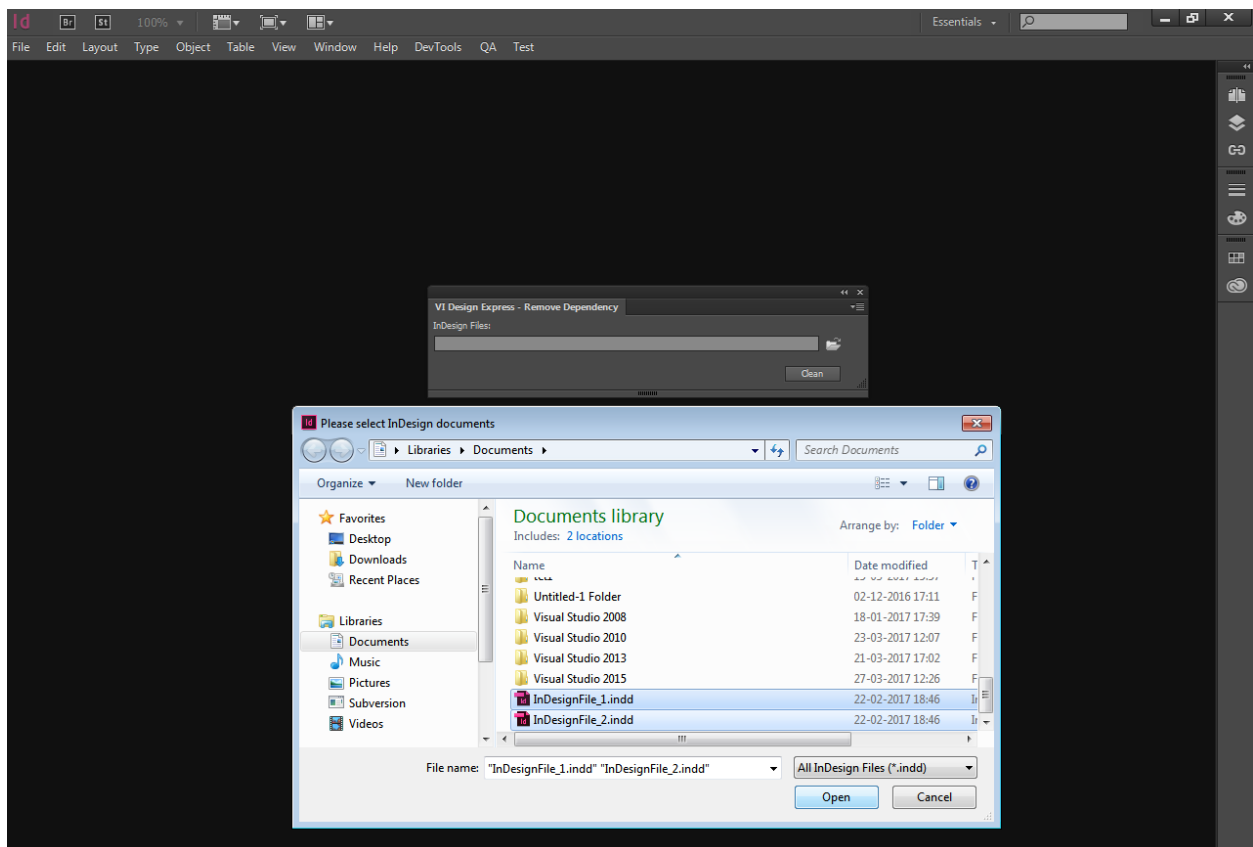

Step 2:

Click on **“Browse InDesign Document”** it will open a dialog where user can select document(s). It supports single and multi document selection.

Step 3:

Choose document for which VDE dependency needs to be removed from the document and click on **“Open”**

Step 4:

After choosing the documents Click on **“Clean”** button which may take few seconds to process the documents and it removes the VDE dependency from the selected document. For detailed information please refer the log file, the location of the log file is displayed in the completion dialog.
