Accessing Extended Features

Overview

This document enables users to access the extended features of the VersaLink B600/B605/B610/B615 and VersaLink C500/C505/C600/C605 when the device is in an environment that does not use a Xerox Print Driver.

Note: Some of the commands and syntax used in this document requires familiarity with either PostScript (PS) or Printer Command Language (PCL).

This document provides the following:

- A PostScript table that describes the PostScript features the VersaLink B600/B605/B610/B615 and VersaLink C500/C505/C600/C605 supports and the syntax to use the feature.
- A PCL table that describes the PCL features the VersaLink B600/B605/B610/B615 and VersaLink C500/C505/C600/C605 supports and the syntax to use the feature.

This document is not intended to be a complete PS or PCL reference manual:

Refer to these additional reference materials:

- PostScript Language Reference Manual, Third Edition, ISBN 0-201-38922-8
- PCL5 Printer Language Technical Reference Manual
- Printer Job Language Technical Reference Manual, Hewlett-Packard Manual.

Using this Guide

1. Search the Feature Table to determine whether the feature you wish to use is supported.
2. Verify that the feature is supported by the platform. For example, the Versalink must have the Finisher option installed to use stapling commands.
3. Following across the table to find the syntax listed for the PDL examples shown.
4. Read the Dependencies/Caveats section.

Custom Paper Size	Not in PJL command. You have to specify by PCL: <code><ESC>&1101A</code>	Width of Custom Paper is specified by <code><ESC>&#l</code> where # = decipoints for (76.2 – 215.9)mm. Length of Custom Paper is specified by <code><ESC>&#J</code> where # = decipoints for (127 - 355.6)mm. For instance: 4.25-inch x 5.5-inch will give <code><ESC>&f3060I3960J</code> by 4.25-inch x 720 decipoints/inch = 3060 and 5.5-inch x 720 decipoints/inch = 3960.

PCL/PJL Feature Dependencies/Caveats

- All PJL commands must be in the first 2,500 bytes of the job.
- To combine printer escape commands (not including PJL commands):
 - The first two characters after the <esc> MUST be the same.
 - All alpha characters MUST be lowercase, except the final terminating character.
 - The commands are read left to right. Combine commands in the order you wish them to execute.
For example, combine print 5 copies (<ESC>&|5X) and use letter size (<ESC>&|2A) as <ESC>&|5x2A.
- In case of duplicate commands, the last one requested takes precedence.

- The @PJL SET COPIES takes precedence over the PCL Escape Command (<ESC>& | int X>) to set copies. In general, a PJL command takes precedence over a PCL command.
- Valid media sizes for duplexing are between 139.7 x 203.2mm and 215.9 x 355.6mm.
- Valid media sizes for stapling include A4 (210 x 297mm), B5(JIS) (182 x 257mm), B5(ISO) (176 x 250mm), Executive (7.25 x 10.5"), 8 x 10", Letter (8.5 x 11"), 215 x 315mm, 8.5 x 13", Legal (8.5 x 14"), for Finisher GA4.
