Scanning and Emailing

The printer is connected typically to a network rather than a single computer, so you select a destination for the scanned image at the printer.

This guide covers techniques to scan documents without preparing special setups:

- Scanning documents to an email address.
- Scanning documents to a saved Favorite, Address Book listing, or USB Flash drive
- Scanning documents to the Public folder on the printer hard drive, and retrieving them using your Web browser.

For details and more scan setups, see the *Scanning* chapter in the *User Guide*. For details about address book and workflow template setup, see the *System Administrator Guide*.

Select the **Default Public Folder**, then click **Go** to download the scan.

Click **Update View** to refresh the list.

Select **Download** to save the file to your computer.

Select **Reprint** to print the saved file again.

Select **Delete** to permanently remove the stored job.

Faxing

You can send a fax in one of four ways:

- **Embedded Fax** scans the document and sends it directly to a fax machine.
- **Server Fax** scans the document and sends it to a fax server, which transmits the document to a fax machine.
- **Internet Fax** scans the document and emails it to a recipient.
- **LAN Fax** sends the current print job as a fax.

For details, see the *Faxing* chapter in the *User Guide*. For details about LAN Fax, see the print driver software. For details about fax setup and advanced settings, see the *System Administrator Guide*.
