

Xerox WorkCentre™ 7655/7665/7675

ALERT! Revision 2.0 of the WC7655/7665/7675 family is now available. You must download the correct file to match the software version of your machine. It is important that you use the driver and documentation designed for the software version on your machine.

Contact your Sales Representative if you have questions about upgrading a Rev 1.0 machine to a Rev 2.0 machine.

1. Determine Which Files to Download

Use the chart below to determine which file to download.

If the System Software version starts with:	Then the correct file name includes:
40.32.xxxxx (or ESS 040.032.xxxxx)	Rev 1.0
40.33.xxxxx (or ESS 040.033.xxxxx)	Rev 2.0

2. Determine the Current System Software Version

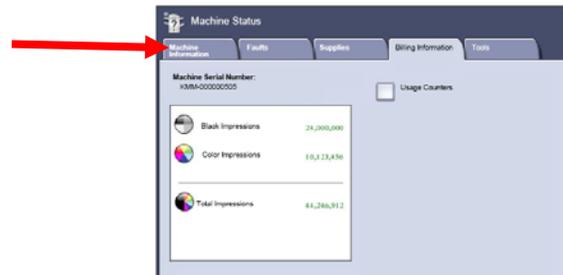

You can determine the current system software version at the machine and at your workstation.

To determine the current system software version at the machine:

A. Press the **Machine Status** button.

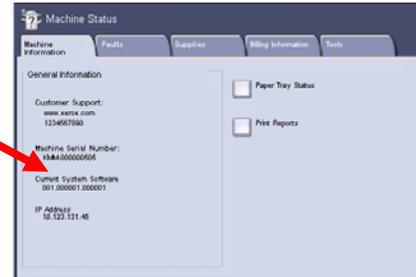

B. Touch the **Machine Information** tab.

Xerox WorkCentre™ 7655/7665/7675

- C. On the **Machine Information** tab, read the **Current System Software** level and make a note of it.

To determine the current system software version from your workstation:

1. Open your web browser. In the Address or Location field, enter the TCP/IP address of the machine. Press **Enter**.
2. Click the **Properties** tab.
3. Click **General Setup**, then click **Configuration**.
4. Scroll down to the **Printer Setup** area to see your System Software Version.
