WorkCentre Pro M165/175 ST DLM ReadMe Copyright (c) 2005 Xerox Ltd. All Rights Reserved For upgrading from 07.47.30.000 or later to 07.57.32.004. Last updated 13:50, 9May05. 1. Purpose _____ The purpose of this Readme is to enable Technicians and System Administrators to upgrade a WorkCentre to version 07.57.32.004 The upgrade process will take up to half an hour. The WorkCentre will be inoperable during this time. Please make sure that the WorkCentre is free of faults and jams before commencing any part of the upgrade. 2. Upgrade Requirements _____ To perform this upgrade, the following will be required: a. The D075732004 00 1.DLM upgrade file ***As extracted from the D075732004 00 1.exe or D075732004 00 1.zip file supplied.*** b. A PC with network access to the WorkCentre. c. The WorkCentre must have the HTTP option enabled. 3. Upgrade Process _____ Downloading the new software set: a. Power on the machine and wait for a config. sheet to be printed. b. Open a Web Browser (e.g. Internet Explorer, Netscape, etc.). c. Enter the URL, using the format "http://xx.xxx.xxx" (where "xx.xxx.xxx" is the WorkCentre IP Address), or select it from the drop-down list if previously used. d. Select the 'index' icon e. From index select Machine Software (Upgrades) f. Enter "admin" as the User Name (must be lower case), then enter the Key Operator password (default is "1111", but this may have been changed by the Key Operator or System Administrator). Select OK. g. Select the Browse button and locate the file

g. Select the Browse button and locate the file D075732004 00 1.DLM Click Open. h. Select the "Install Software" option. After a short time, a web browser pop-up will be shown with the message 'File has been submitted'; click OK.

The job will appear in the "Job Status" queue on the WorkCentre after it has been refreshed.

It will remain at "Processing" for 5 to 10 minutes, after which a message will be displayed on the WorkCentre User Interface, indicating that the software upgrade is in progress. During the actual upgrade, the WorkCentre will not be available via the network.

Soon after this, the Upgrade Interface window will be displayed on the WorkCentre User Interface, showing the upgrade progress of all relevant modules.

When completed, the system will automatically reboot. The message "Restoring Configuration Settings; Please Wait" will then be displayed.

After the Reboot has completed, the system will display the message "Ready - Select features to Scan your job". The upgrade is now complete. The NC will initialise and automatically print a Configuration Report. All the settings will have been restored, and the WorkCentre will automatically re-connect to the network.

i. Once the upgrade is complete, confirm the new software version by pressing the Machine Status hard key on the WorkCentre User Interface, then select the "Machine Details" button. Check the system software version is now 07.57.32.004

The WorkCentre is now ready for use.
