1. Introduction

This guide provides detailed information about the job ticket features that are available for each printer supported by the Xerox Production Print Services software.

About this guide

Before you perform any procedures in this guide, become familiar with its contents and conventions.

Contents

This document contains printer job ticket features used by various common client software.

Conventions

This guide includes the following conventions:

- Angle brackets: Variable information that is displayed on your window or that can be entered as part of a command line is enclosed within angle brackets. Examples include "Unable to copy <filename>," "set -p <printer>."
- Square brackets: Square brackets are used for the following:
 - Names of menu options that you select; for example, [Printer Default]
 - Names of buttons that you select; for example, [OK] and [Cancel]
 - Names of text boxes, list boxes, and fields; for example, "the [From] text box," "the [Directories] list box," "the [Color Source] field"
- Italics: Document and diskette names are shown in italics; for example, Xerox Production Print Services Distribution Disc for Windows and Macintosh.

- **Bold:** Boldface type is used for the following:
 - Directory paths; for example, "Browse to the **Win_nt40/Xeroxdrv** directory."
 - Text that you enter; for example, "Enter **purple** or **XDS**."
 - Calling attention to text that is particularly important; for example, "Select [Stop] on the user interface window. **Do not press the red stop button on the controller.**"
 - Introductory words or phrases that begin items in a list; for example,

[Hold job]: The document is held at the printer...

[Cancel job]: The document is not printed...

- **Note:** Notes are hints that help you perform a task or understand the text. Notes are presented in italics, in separate paragraphs. Example:

NOTE: •

You cannot submit a job unless the printer is connected to your workstation.

Related documentation

Further information on the specific Xerox printer and the print server or controller that is part of your printing system may be obtained by referring to the documentation that was delivered with the elements of the system.

Customer Support

To place a customer service call, dial the direct TTY number for assistance. The number is 800-735-2988.

2. Job ticket features by printer

This chapter identifies the supported job ticket features that may be specified when using the Xerox Production Print Services, XPPS, software according to the Xerox printer model or type. Refer to the following tables to determine which job ticket features and options are supported for your selected printer.

NOTE:

Due to the growing number of supported printers, not all supported printers may be listed in this document. All feature information provided here should be used as a guideline. For a complete listing of features for your connected printer, refer to the specifications that are provided with your printer or contact your Customer Support Representative.

NOTE:

Not all elements of the XPPS software may provide the ability to program all supported features for the selected printer. If a feature is indicated as being supported on a printer but is not available at the point of submission, the feature can be programmed at the printer.
